

Is ajaypipes.com safe? TrustSniffer's moderate-trust assessment: 61/100

ajaypipes.com

Verdict

61

OUT OF 100

MODERATE TRUST

ajaypipes.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

The page as captured

<https://ajaypipes.com/>

What ajaypipes.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a domain-hosted homepage at ajaypipes.com, but the supplied site evidence does not establish a substantive product, service, or operator identity; its apparent business purpose therefore remains unverified.

Scam/Impersonation Risk

The site carries a material reputational warning because external screening recorded a confirmed blacklist hit, together with limited malicious and suspicious detections. This is the principal contradiction in the assessment and warrants a security-forward posture for sensitive interactions. No separate conflicting legal identities or confirmed impersonation signal was established. Dynamic testing also observed substantial post-interaction page changes and console errors, increasing uncertainty about how the site behaves after user engagement, although no wallet-drainer activity, hidden forms, externally submitted password forms, or cloaking was observed.

EVIDENCE

- External reputation telemetry recorded a blacklist hit, 1 malicious detection, and 1 suspicious detection for the domain.
- The site's behavioral testing recorded a maximum post-interaction DOM difference of 4635 and 6 console errors.
- Domain registration telemetry records creation on 2007-11-07, an age of 18.8 years, and registration through Tucows Domains Inc.
- Historical telemetry records 138 archive snapshots spanning 2008–2026, covering 19 years.

Regulatory Verification Notes

The available evidence does not establish a verified real-world operator, legal entity, or regulatory authorization, and the site's on-page disclosure position is unclear. Any absence of licensing information should be treated as a verification gap rather than standalone proof of fraud. A separate broker-reputation dataset returned no match; that result provides context only and does not validate the site's identity, licensing, or conduct.

EVIDENCE

- The site's legal and identity disclosures do not provide a verified operator connection in the supplied evidence.
- No licensing or registration number is established in the available site material.
- Hosting telemetry identifies AS47583, AS-HOSTINGER—Hostinger International Limited, CY.
- The site's TLS certificate uses DV validation, was issued by YE1, and is valid to 2026-11-07.

What to Verify Next

Before any sensitive interaction, an independent party should confirm the operator's legal name and claimed business activity through authoritative corporate and regulatory registries relevant to the service being offered. Contact channels should be validated through an independently sourced route rather than relying solely on information presented on the site. Any blacklist status should also be clarified with the relevant security or domain-reputation authority before the domain is approved for enterprise access.

EVIDENCE

- The available identity material does not independently connect the domain to a verified legal operator.
- The licensing and registration disclosure position remains unclear.
- External screening contains a confirmed blacklist signal requiring resolution before sensitive use.

Summary Verdict

The website has a **moderate trust posture with elevated sensitive-interaction risk**. Long-term domain and historical indicators provide some foundation for an established presence, but they do not overcome the confirmed external reputation contradiction or the unresolved operator identity. The evidence is therefore insufficient to treat legitimacy as proven.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure. The observed edge address is 217.21.94.240, while the origin server was not observable; this protection reduces direct exposure but is only a mitigating infrastructure signal and does not establish legitimacy.

Closing Assessment

Use should remain limited to non-sensitive browsing until the operator, regulatory position, and reputation warning have been independently resolved; credentials, payments, and other sensitive actions should not be submitted in the interim.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The page replaced a large part of its own content after loading.
Behaviour in a sandbox rule:BEHAV_DOM_CHANGE_HIGH
 - The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
 - The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Identity verification

Status	UNKNOWN
Identity score	50/100
Identity verification confidence	30%

- AI page analysis unavailable (page captured; identity not AI-verified)

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ajaypipes.com.

- The request stayed on ajaypipes.com. It was not redirected to another domain. CLEAR
- Registration is published under Tucows Domains Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-07. NOTED
- The earliest public archive of this site is from 2008-03-15. CLEAR
- It is hosted on AS-HOSTINGER, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ajaypipes.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
