

Is aklbeety.com safe? TrustSniffer's low-trust assessment: 25/100

aklbeety.com

Verdict

25

OUT OF 100

LOW TRUST

aklbeety.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

A small restaurant/food-delivery landing page named 'Akl Beety' with marketing copy, a contact/email signup form, cookie consent, and reCAPTCHA. No login, no payment or wallet collection present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

What aklbeety.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Akl Beety is a small restaurant and food-delivery landing website presenting the promise “Delicious meals, delivered fast,” together with a contact form and email-list signup for updates and promotions; its apparent business model is local food ordering and marketing communications.

Scam/Impersonation Risk

The site’s visible content is consistent with a small restaurant rather than a credential-harvesting or financial-services operation: the homepage contains no login, payment, wallet, or sensitive-data form, and no on-page brand impersonation or phishing indicators were identified. However, this benign presentation is contradicted by confirmed blacklist status and multiple external malicious detections, creating a material risk for sensitive interaction despite the limited visible transaction surface. Seven abuse reports also concern the observed Amazon-hosted IP; that signal is attributed to shared infrastructure and should not be treated as conclusive evidence that the reports describe this website specifically. The site’s identity remains unverified, so the Akl Beety branding and copyright statement should not be treated as proof of a real-world operator.

EVIDENCE

- External reputation assessment recorded 5 malicious and 1 suspicious detections, with a confirmed blacklist signal from two external sources.
- Seven abuse reports were recorded against 13.248.243.5, attributed to shared Amazon Technologies Inc. infrastructure used as a Content Delivery Network.
- Domain registration telemetry records creation on 2025-02-23 and an age of 1.48 years.
- Historical telemetry records 90 archive snapshots spanning 2010–2026, with 17 years tracked.

Regulatory Verification Notes

The homepage describes food delivery and promotional communications but does not display a company registration number, food-business license, legal entity name, or licensing authority. This is a disclosure gap requiring independent verification, not by itself evidence of fraud. The available identity verification is insufficient to connect the Akl Beety name independently to a specific real-world operator. Registration was conducted through GoDaddy.com, LLC, while the site uses a standard domain-validated certificate; these are infrastructure and administrative facts rather than proof of licensing or corporate legitimacy. No matching broker record was identified in the available third-party context.

EVIDENCE

- The homepage identifies the business only as “Akl Beety” and displays “Copyright © 2025 Akl Beety - All Rights Reserved.”
- The homepage contains one contact and email-signup form, but no visible license number, registration number, or licensing authority.
- The domain is registered through GoDaddy.com, LLC; TLS was issued by GoDaddy TLS Intermediate CA DV - R1v1 at DV validation level and is valid to 2026-09-22.

What to Verify Next

Before any sensitive interaction, an independent check should confirm the restaurant’s legal trading identity, operating location, and applicable food-business registration with the relevant local authority. Any order or payment arrangement should be completed only through a separately verified channel with clear consumer protection and refund terms. Contact details should be cross-checked through an independent offline or established local-business source, and the site’s privacy and data-use terms should be reviewed before submitting contact information.

EVIDENCE

- The homepage requests a name and email address for promotional updates but provides no independently verified business identity.
- The page states that cookies are used for traffic analysis and experience optimization, with aggregated data collection after consent.
- The visible site contains no login, wallet connection, or sensitive payment form, limiting the observed interaction surface.

Summary Verdict

The website has a **low-trust posture** because external reputation contradictions outweigh its otherwise ordinary small-business presentation. Its apparent purpose is understandable, but the operator’s identity is not independently verified and the available evidence does not support treating the site as suitable for sensitive interaction.

Infrastructure Integrity

The website is served through Amazon Technologies Inc. infrastructure on AS16509 and is protected by a CDN/WAF configuration; all observed addresses are CDN edge servers, with no origin candidate visible in the analysis. The site’s transport encryption is a mitigating control, not evidence of operator legitimacy: the certificate is domain-validated and issued by GoDaddy TLS Intermediate CA DV - R1v1, with validity ending 2026-09-22.

Closing Assessment

The appropriate posture is read-only evaluation until the operator, applicable local registration, and transaction protections have been independently confirmed; credentials, financial information, and other sensitive data should not be submitted.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 7 reports on hosting IP 13.248.243.5 (Amazon Technologies Inc., Content Delivery Network), 15% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of aklbeety.com.

- The request stayed on aklbeety.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-23. NOTED
- The earliest public archive of this site is from 2010-04-12. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aklbeety.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
