

Is aksfleet.com legit? TrustSniffer's high-trust assessment: 100/100

aksfleet.com

Verdict

100

OUT OF 100

HIGH TRUST

aksfleet.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Official-looking site for AKS Fleet Solution offering vehicle leasing and fleet management. Includes company history, services, partners, contact details and app information. No solicitation for deposits or crypto, and no credential-harvesting elements detected.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

AKS Fleet Solution is a corporate website presenting long-term leasing of passenger and light commercial vehicles together with full fleet-management services, vehicle servicing, insurance and registration support, tyre replacement, vehicle assessment, and access to the MyAFS Car fleet application; its apparent business model is B2B leasing and related fleet-management fees.

Scam/Impersonation Risk

No contradictions were observed. The website presents a coherent corporate-service model rather than deposit-taking, cryptocurrency, or other high-risk financial solicitation, and the available page and behavior evidence found no brand-impersonation, phishing, credential-harvesting, wallet-connection, or sensitive-form indicators. The apparent legitimacy is supported by consistent service descriptions, company-history material, partner references, contact functionality, and linked social profiles, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage describes long-term vehicle leasing, full fleet management, vehicle servicing, insurance and registration assistance, and fleet monitoring.
- The contact page contains a contact/newsletter form without a password or other sensitive-data field; no login form or hidden sensitive form was detected.
- Technical behavior recorded two successful runs, zero external XHR/fetch activity, zero wallet-provider or wallet-drainer activity, and no cloaking classification.
- The domain was registered on 2016-09-28 and is approximately 9.9 years old; 48 archive snapshots are recorded from 2016 through 2026.

Regulatory Verification Notes

The site appears to operate as a conventional vehicle-leasing and fleet-services business, and its pages provide business descriptions, partner references, contact details, and a privacy-policy route. No licensing claim or license number is presented in the supplied evidence; for this business model, that is a regulatory-transparency point requiring confirmation rather than evidence of deception. The available external reputation signals contain no reported malicious or blacklist finding, while coverage was partial; this supports the low-risk assessment but is not a legal or licensing determination. The site's apparent identity is therefore evidence-consistent, not independently proven.

EVIDENCE

- The homepage and services pages identify the business as a provider of long-term vehicle leasing and fleet-management services for corporate clients.
- The domain registrar is Tucows Domains Inc.; registration runs from 2016-09-28T13:00:16Z to 2027-09-28T13:00:16Z.
- The site is served from AS6700, BEOTEL-AS - TELEKOM SRBIJA a.d., RS.
- TLS uses issuer YR1 with DV validation and is valid to 2026-10-11T18:29:06+00:00.

What to Verify Next

Before entering into a leasing or fleet-management agreement, independently confirm the legal contracting entity, its registration with the relevant commercial registry, and any authorization applicable to the proposed services. Review the contractual provisions governing vehicle condition, maintenance responsibility, insurance, early termination, fees, and dispute handling. Contact details should also be validated through an independent business directory or offline channel, and payment arrangements should preserve ordinary commercial protections.

EVIDENCE

- The site provides dedicated contact, privacy-policy, service, vehicle-catalogue, and leased-vehicle pages that can be compared against the proposed contract.
- The homepage states that fleet-management support and monitoring are included in service packages; the scope and pricing of those inclusions should be matched to written terms.
- The site links to partner or industry-related domains, which can be checked independently when validating commercial relationships.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate corporate website and supports a high-trust, low-risk posture. No scam or impersonation contradiction was identified. The operator connection remains likely rather than independently verified, so the assessment supports legitimacy of the online presentation without proving the real-world identity of the contracting party.

Infrastructure Integrity

The site resolves to a directly hosted Telekom Srbija infrastructure footprint rather than a detected CDN or WAF edge network, with one identified IP and one likely origin. This is a neutral infrastructure characteristic, while the valid transport encryption provides a baseline protection for communications; hosting infrastructure alone is not proof of legitimacy.

EVIDENCE

- Hosting provider: BEOTEL-AS - TELEKOM SRBIJA a.d., RS, on AS6700, registered through RIPE NCC, country code RS.
- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP; no CDN vendor was detected.

Closing Assessment

Prospective counterparties should proceed with ordinary independent checks of the contracting entity, commercial terms, and payment protections before credential or payment interactions.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of aksfleet.com.

- The request stayed on aksfleet.com. It was not redirected to another domain. CLEAR
- Registration is published under Tucows Domains Inc.. CLEAR
- DNS for this domain is served by beotel.net, across 2 name servers. NOTED
- The registration is paid up to 2027-09-28. NOTED
- The earliest public archive of this site is from 2016-12-02. CLEAR
- It is hosted on BEOTEL-AS, from a server in RS. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aksfleet.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
