

Is alahmed.com.sa safe? TrustSniffer's low-trust assessment: 40/100

alahmed.com.sa

Verdict

40

OUT OF 100

LOW TRUST

alahmed.com.sa is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Arabic-language website for 'شركة أحمد محمد الأحمد للمحاماة والاستشارات القانونية' (AMA). Presents firm description, services (contracts, labor, IP, disputes, foreign investment, litigation), contact phone numbers, email (info@alahmed.com.sa), office hours and legal blog entries. Appears to be an informational/corporate site for a law firm.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is an Arabic-language corporate site for “شركة أحمد محمد الأحمد للمحاماة والاستشارات القانونية” (AMA), presenting a Saudi legal-services firm offering legal consultations, contracts, labor matters, intellectual property, disputes, foreign investment, litigation, professional credentials, office hours, and contact channels.

Scam/Impersonation Risk

Scam and impersonation risk is elevated. The site itself presents a coherent law-firm profile, with no detected login form, phishing mechanism, brand-impersonation indicator, or other on-page fraud pattern. However, external threat intelligence recorded three malicious detections and a confirmed blacklist presence, which is a material contradiction to the otherwise conventional corporate presentation. The available evidence does not establish that the site is an impersonation of another identified firm, but the external detections warrant treating sensitive interaction as unsafe until independently resolved.

EVIDENCE

- The homepage presents the AMA law-firm identity, legal practice areas, professional biographies, and legal blog content.
- Behavioral inspection recorded no login form, hidden sensitive form, password-exfiltration form, wallet connection, cloaking, or suspicious inline scripts.
- External reputation assessment recorded 3 malicious detections and a confirmed blacklist presence.
- Domain registration continuity is dated to 2011, with an age of approximately 15.41 years.
- Web-archive records contain 113 snapshots spanning 2011–2025, covering 15 tracked years.

Regulatory Verification Notes

The website describes a traditional legal-services business and includes a section referring to official certifications and licenses, but the supplied pages do not identify a licensing authority or provide a license or registration number that can be independently checked. The operator identity remains unverified despite the site's detailed professional presentation, so the displayed firm name and credentials should be treated as on-site claims rather than proof of the real-world entity. No separate broker-reputation match was identified, which provides no additional adverse signal but does not resolve the external threat detections.

EVIDENCE

- The services and credentials content describes legal consultation, contracts, labor, construction and franchising, intellectual property, customs disputes, foreign investment, and litigation.
- The site's credentials section refers to "official certifications and licenses" without supplying a licensing authority or license number in the reviewed content.
- Hosting is on AS26337, OIS1 - Oso Grande IP Services, LLC, US.
- The site uses a DV TLS certificate issued by YR2, valid until 2026-09-30T16:21:03+00:00.

What to Verify Next

Before any sensitive engagement, an independent party should confirm that the named Saudi legal practice is recorded with the relevant professional or governmental registry and that the published office and telephone details correspond to that entity. Contact-channel validation should be performed through an independently sourced directory, registry, or offline business record rather than relying solely on information presented by the website. Pending those checks, account creation, credential submission, document upload, and financial transactions should remain suspended.

EVIDENCE

- The contact content publishes office hours, a main telephone number, a WhatsApp number, and an employment contact route.
- The site contains no account-login or sensitive-data submission form in the reviewed pages.
- The reviewed pages provide no independently verifiable licensing authority or registration identifier.

Summary Verdict

The website has a plausible and professionally structured legal-services presentation, but its overall trust posture is low because confirmed external threat detections and blacklist presence outweigh the benign page content and stable technical behavior. The real-world operator identity is not independently verified, and sensitive interaction should therefore be regarded as carrying elevated risk.

Infrastructure Integrity

The site resolves directly to a single likely origin address hosted by OIS1 - Oso Grande IP Services, LLC in the United States, with no detected CDN or WAF edge layer. Its valid DV TLS certificate protects transport confidentiality, but that control authenticates the connection to the domain rather than the legal identity or legitimacy of the operator.

Closing Assessment

The proportionate course is passive review only until the operator, professional standing, and contact channels are independently confirmed; credentials, documents, and financial commitments should not be submitted in the interim.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alahmed.com.sa.

- The request stayed on alahmed.com.sa. It was not redirected to another domain.

CLEAR

- The earliest public archive of this site is from 2011-03-22. CLEAR
- It is hosted on OIS1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alahmed.com.sa at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
