Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Moroccan Arabic-language electronic newspaper presenting current reporting and commentary on politics, national affairs, economics, sport, culture, international affairs, and history, with audience engagement, application distribution, and advertising supporting its publishing model.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other deceptive patterns were observed. The long-established registration aligns with a mature, content-rich news operation, while the ordinary search and account-login facilities submit no credentials to an external destination. External threat intelligence was clean, with no malicious or suspicious classifications, reported abuse, or signature matches.

- The homepage identifies the publication as an independent Moroccan electronic newspaper and presents extensive, internally consistent editorial coverage.
- Domain-registration records identify AWAL Media as the owner and ADK MEDIA as the registrar; registered 2014-10-13 (~11.8 years old), with expiry on 2026-10-13.
- The homepage contains two ordinary forms—search and login—with no hidden forms or externally directed password submission.
- Reputation checks recorded 0 malicious classifications, 0 suspicious classifications, and 0 abuse reports for the observed infrastructure.

Regulatory Verification Notes

The site presents a news-and-media business rather than an investment, brokerage, deposit-taking, or crypto service, so the absence of financial licensing claims is consistent with its stated activity and is not a scam indicator. No conflicting legal-entity names or questionable regulatory representations were identified. Its transport security is valid, and its established registration and clean reputation provide affirmative support for legitimate operation.

- The homepage describes an advertising-supported journalism and audience-engagement model, without offering financial products or soliciting investments.
- The homepage's identified subject matter comprises conventional editorial categories, including Moroccan politics, society, cities, economics, sport, culture, opinion, and international news.
- The site's transport encryption uses a TLS certificate issued by WE1 with DV validation, valid to 2026-09-23.
- Hosting telemetry records service from AS13335, operated by Cloudflare, Inc.

What to Verify Next

For institutional onboarding or formal commercial engagement, the contracting party should be matched to the registered owner, and authority to represent the publication should be established through corporate documentation. Advertising buyers and content partners should also confirm commercial terms, editorial-placement rules, and payment instructions through independently established organizational channels.

- The registration record names AWAL Media, providing a concrete identity against which contractual documentation can be reconciled.
- The homepage advertises placements and application distribution, creating identifiable commercial activities for due-diligence scoping.
- The homepage links to established profiles on Facebook, X, YouTube, and Instagram, offering independent channels through which organizational representation can be corroborated.

Summary Verdict

The website is legitimate, established, and trustworthy. Its identity, mature publishing activity, clean external reputation, and benign interaction behavior converge without contradiction, supporting a high-confidence assessment that routine use is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN and WAF, with all four observed addresses belonging to its edge network and no separate origin candidate exposed during the assessment. This mainstream protective architecture reduces direct origin exposure and supports operational resilience, although infrastructure protection alone is not evidence of organizational legitimacy.

Closing Assessment

Normal browsing, account login, and standard use are appropriate; prospective commercial counterparties may apply routine organizational due diligence before entering contractual or payment arrangements.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alakhbar.press.ma.

- The request stayed on alakhbar.press.ma. It was not redirected to another domain. CLEAR

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alakhbar.press.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
