Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Kuwait-based local-services and commercial sales site for water-treatment and tank-cooling products, presenting company information, product categories, installation, after-sales support, and customer contact options for residential, commercial, and industrial customers.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other contradictory signal was observed. The homepage presents a coherent commercial model involving RO filters, centralized water systems, tank-cooling equipment, alkaline-water devices, desalination plants, booster pumps, installation, warranties, and after-sales service. Claims such as being a leading or “best” provider are promotional assertions rather than independently established facts, but they are consistent with the stated local-services business model. Available external checks recorded no malicious or suspicious detections, and site behavior showed no login form, hidden sensitive form, wallet connection, clipboard activity, or suspicious script pattern. The real-world operator remains independently unverified, so the evidence supports an apparently legitimate established site rather than proving the operator’s identity.

EVIDENCE

- The homepage presents a Kuwait water-treatment and tank-cooling business with product, installation, warranty, and after-sales-service content; page-level analysis recorded no fraud indicators.
- The site's observed behavior completed 2 successful runs, with 0 external XHR requests, 0 external POST requests, 0 hidden forms, and 0 wallet-drainer runs.
- The domain was registered on 2018-07-16 and is 8.1 years old.
- Historical records show 35 archive snapshots spanning 2019–2026, covering 8 years.

Regulatory Verification Notes

The About page states that the company was established in 2001 and describes more than twenty years of experience, but those on-site statements should not be treated as independent proof of the operating legal entity. The reviewed material does not present a licensing authority or registration number; for a local product-and-services seller, this is a verification and disclosure gap rather than evidence of a scam. The contact and service material provides a business address and telephone contact options, supporting ordinary commercial engagement, while the available evidence does not establish regulatory status or independently verify the operator. Transport security is present through a domain-validated certificate.

EVIDENCE

- The About page states that the business was established in 2001 and claims more than twenty years of experience in water treatment and tank cooling.
- The reviewed legal and company material contains no stated licensing authority or registration number.
- The site is served from AS209341, WHG-FRA - WHG Hosting Services Ltd, GB.
- TLS is issued by YR2 at DV validation level and is valid to 2026-10-20.

What to Verify Next

Before credential or payment interactions, an independent check should match the company name and trading details against the relevant Kuwait commercial registry or applicable sector authority. The stated warranty, installation, maintenance, spare-parts, and return terms should be obtained in writing, with the payment beneficiary checked against the verified merchant identity. Contact details should also be confirmed through an independent route rather than relying solely on information supplied by the website.

EVIDENCE

- The About page supplies the company name and operating-history claim for independent identity matching.
- The product and service content refers to warranties and after-sales support, creating a basis for requesting written commercial terms.
- The contact page provides the available address and telephone details for out-of-band confirmation.

Summary Verdict

The overall posture is high trust and low risk, and the site is apparently legitimate and evidence-consistent with an established local business. No contradiction was identified, although the available evidence does not

independently verify the real-world operator identity.

Infrastructure Integrity

The site is directly hosted rather than observed behind a detected CDN or named WAF vendor, resolving to a single likely origin address. This provides a straightforward hosting posture but is only a mitigating technical observation and does not independently establish legitimacy.

Closing Assessment

Ordinary browsing is proportionate; before submitting credentials or making a payment, the prospective customer should complete the independent merchant-identity, commercial-terms, and payment-protection checks described above.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alarabi-kw.com.

- The request stayed on alarabi-kw.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by supercp.com, across 4 name servers. NOTED
- The registration is paid up to 2027-07-16. NOTED
- The earliest public archive of this site is from 2019-04-20. CLEAR
- It is hosted on WHG-FRA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alarabi-kw.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
