What alatsmk.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is an Indonesian-language online gambling platform branded as Slot88 and Slot Gacor. It presents online slots, live casino, sports, race, togel, crash games, poker, e-sports, and related promotional content, with account registration, deposits, withdrawals, and an Android APK download as part of its apparent deposit-and-wager business model.

Scam/Impersonation Risk

The site presents a **confirmed blacklist contradiction**, creating a serious risk for sensitive interaction. Its homepage promotes “gampang jackpot” and frequent wins, solicits account creation and deposits before any service is delivered, and encourages installation of an Android APK from an external source. The combination of deposit-driven gambling, opaque value flows, promotional claims that are not supported by clear evidence, a persistent login interface, and the APK sideloading prompt materially increases exposure to credential theft, payment loss, or unwanted software. The available evidence does not establish brand impersonation or a conflicting legal identity, but the blacklist finding alone warrants a clearly defensive posture.

EVIDENCE

- The homepage is categorized as gambling/casino content and advertises slots, live casino, sports, race, togel, crash games, poker, e-sports, and “gampang jackpot” promotions.
- The homepage provides login and registration controls together with deposit and withdrawal information, and promotes Android APK installation from an external source.
- External reputation checking records the domain as blacklisted; separate checks recorded 1 malicious and 2 suspicious detections.
- The hosting IP 64.20.51.118 has 7 abuse reports attributed to shared Interserver infrastructure, so that IP-level signal is relevant context but is not by itself proof that every report concerns this website.

Regulatory Verification Notes

The public material describes a wagering operation but does not state a gambling license, licensing authority, or license number. That is a material regulatory-disclosure gap for a site accepting deposits and presenting betting-related services. The registration record identifies Boby Hermawan and PT. Toludata, but the available evidence does not independently verify that these parties operate the website; legitimacy and operator identity therefore remain unverified. A valid domain registration and transport certificate show technical continuity and encryption, not regulatory authorization.

EVIDENCE

- The site’s homepage identifies the service through Slot88/Slot Gacor branding but contains no stated license authority or license number.
- The domain was registered on 2015-05-02 and is approximately 11.31 years old; the registrar is PDR Ltd. d/b/a PublicDomainRegistry.com, with expiration on 2027-05-02.
- The registration record lists Boby Hermawan as owner and PT. Toludata as organization; independent connection between that record and the operating entity is unverified.
- The site is hosted on AS19318, Interserver, Inc., US; its TLS certificate is issued by YR2 at DV validation level and is valid to 2026-11-15T08:16:17+00:00.

What to Verify Next

Before any sensitive interaction, an independent check should confirm that the named operator is authorized by the gambling regulator applicable to the prospective user’s jurisdiction and that the authorization covers online wagering. The operator’s legal identity, dispute process, deposit protection, withdrawal terms, and data-handling obligations should be confirmed through authoritative records rather than relying on the site’s promotional pages. Any application installation should be obtained only through a trusted official distribution channel, and payment activity should be avoided unless the authorization and withdrawal protections are independently substantiated.

EVIDENCE

- The homepage supplies promotional and account-access content but no independently validated regulatory reference.
- The site's stated business model depends on player deposits and wagering, making authorization and withdrawal controls central verification points.
- The observed browser behavior includes a prominent APK download call to action and a persistent login interface, warranting separate review of software provenance and credential handling.

Summary Verdict

The website has a **critical sensitive-interaction risk posture**. The confirmed blacklist contradiction, high-risk deposit-driven business model, APK distribution flow, and unverified operating identity outweigh the domain's technical continuity and basic encryption indicators.

Infrastructure Integrity

The site resolves to a single likely origin IP, with no CDN or WAF detected and no edge IPs identified. It is directly hosted on AS19318, Interserver, Inc., US; this infrastructure is identifiable, but it provides no CDN-layer mitigation and should not be treated as evidence of legitimacy.

Closing Assessment

The appropriate operational posture is passive viewing only until independent regulatory, operator-identity, software-provenance, and payment-protection checks produce satisfactory results; login, credential submission, APK installation, and financial activity should not proceed beforehand.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, behaviour in a sandbox.

01 **Sensitive Interaction Risk**

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
  Analysis engine `signal:direct_threat`
- The structure of the page changed sharply while it was loading.
  Behaviour in a sandbox `rule:BEHAV_DOM_DENSITY_SPIKE`
- The page replaced a large part of its own content after loading.
  Behaviour in a sandbox `rule:BEHAV_DOM_CHANGE_HIGH`
- Most of what the page loaded came from other domains rather than from this one.
  Behaviour in a sandbox `rule:BEHAV_EXTERNAL_RATIO_HIGH`
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
  Behaviour in a sandbox `rule:BEHAV_DOM_DIFF_AFTER_INTERACTION`

Signals weighed against the site

- AbuseIPDB: 7 reports on hosting IP 64.20.51.118 (Interserver, Inc, Data Center/Web Hosting/Transit), 28% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alatsmk.com.

- The request stayed on alatsmk.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by rumahweb.com, across 4 name servers. NOTED
- The registration is paid up to 2027-05-02. NOTED
- The earliest public archive of this site is from 2016-02-25. CLEAR
- It is hosted on IS-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alatsmk.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
