

Is albpharmacanada.com legit? TrustSniffer's high-trust assessment: 75/100

albpharmacanada.com

Verdict

75

OUT OF 100

HIGH TRUST

albpharmacanada.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Regional pharmaceutical distributor site (Albpharma Canada sh.p.k) listing product categories such as vitamins, supplements, cosmetics, and personal care. Page contains category/menu text and a brief company description indicating import and wholesale/retail activity. No forms, no obvious trackers, and no investment or credential-harvesting features detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website presents itself as Albpharma Canada sh.p.k., a regional pharmaceutical distributor operating in Albania and offering wholesale and retail health-related products, including over-the-counter medicines, vitamins, supplements, cosmetics, personal-care goods, and related categories.

Scam/Impersonation Risk

No phishing, impersonation, or conflicting-identity indicators were observed. The homepage describes a conventional pharmaceutical distribution and retail model rather than an investment, credential-harvesting, or cryptocurrency scheme; testing also found no login form, sensitive form, wallet connection, hidden form, suspicious script, or external data submission. Historical website records show continuity without detected repurposing, which supports an established-site interpretation even though the current registration record is recent. The available evidence is therefore consistent with a legitimate, low-risk website, while not independently

proving the real-world operator's identity. The operator-identity limitation is attributable to the identity-verification status being unverified, rather than to a detected identity contradiction.

EVIDENCE

- The homepage identifies Albpharma Canada sh.p.k. and describes import and wholesale/retail activity in Albania.
- Browser testing recorded no external network activity, hidden forms, password submissions, wallet-drainer activity, clipboard manipulation, or cloaking.
- Historical provenance records 143 archive snapshots from 2010-05-12 through 2024-12-09, spanning 15 years; the archive-derived domain age is 16.27378507871321 years.
- The current registration record shows creation on 2026-07-31T12:08:33Z, an age of 0.05 years, expiry on 2027-07-31T12:08:33Z, and registration through Hosting Concepts B.V. d/b/a Registrar.eu; the older continuous archive record is the controlling provenance signal. The recent registration age is therefore a provenance inconsistency to note, discounted by the longer archive history rather than treated as evidence of repurposing.

Regulatory Verification Notes

The site provides a company profile and a stated commercial activity, but the available pages do not disclose a license number, registration reference, or independently verifiable pharmaceutical authorization. This disclosure gap is attributable to the site's unclear on-page regulatory-disclosure state and is a regulatory-transparency item for confirmation, not evidence of a scam. The available external reputation checks found no adverse-list or malicious indicators, although coverage was partial; the separate broker-context source returned no match and is not a licensing determination. The operator identity remains independently unverified because the identity-verification status is unverified, while the single legal name observed does not create an identity contradiction.

EVIDENCE

- The company-profile content states that Albpharma Canada sh.p.k. conducts commercial activity in Albania involving import and wholesale/retail sales.
- Hosting is identified as AS209341, WHG-FRA - WHG Hosting Services Ltd, GB.
- The site's transport encryption uses a DV TLS certificate issued by YR1, valid to 2026-10-29T14:36:39+00:00. This supports encrypted transport but does not independently verify the operator's identity.
- External checks recorded zero malicious detections, zero suspicious detections, no Google Safe Browsing malicious result, no adverse external-list result, and zero AbuseIPDB reports; reputation coverage was partial, so these checks do not establish regulatory authorization or operator identity.

What to Verify Next

Before credential or payment interactions, independently match the stated company name and Albanian operating activity against the relevant corporate and pharmaceutical-sector registries. Confirm that the products and distribution activity are authorized for the applicable market, and review the merchant's returns, delivery, refund, and payment-protection arrangements. Official contact channels should also be confirmed through an independent route rather than relying solely on page content.

EVIDENCE

- The company profile supplies the legal name and operating territory needed for independent registry matching.
- The stated business model involves regulated health-related goods, making product and distribution authorization checks materially relevant.
- The available page content is primarily informational and category-based, so transaction terms and merchant protections should be established independently before payment.

Summary Verdict

The overall posture is **high trust and low risk**, and the evidence is consistent with an established, apparently legitimate website. This classification supports ordinary website interaction, but it does not constitute proof of the real-world operator's identity because independent identity verification is unavailable.

Infrastructure Integrity

The site resolves through ordinary hosting provided by WHG-FRA - WHG Hosting Services Ltd, with no CDN or WAF detected and a single likely origin address visible in the supplied infrastructure assessment. The absence of CDN or WAF protection provides limited infrastructure-based mitigation, but it is not a negative indicator of fraud and does not create a contradiction with the site's otherwise benign technical behavior.

Closing Assessment

Proceed with normal business diligence, including independent merchant-identity, returns-policy, product-authorization, and payment-protection checks before submitting credentials or making payments.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of albpharmacanada.com.

- The request stayed on albpharmacanada.com. It was not redirected to another domain. CLEAR
- Registration is published under Hosting Concepts B.V. d/b/a Registrar.eu. CLEAR
- DNS for this domain is served by supercp.com, across 4 name servers. NOTED

- The registration is paid up to 2027-07-31. NOTED
- The earliest public archive of this site is from 2010-05-12. CLEAR
- It is hosted on WHG-FRA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about albpharmacanada.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
