

Is alchemy.com legit? TrustSniffer's high-trust assessment: 100/100

alchemy.com

Verdict

100

OUT OF 100

HIGH TRUST

alchemy.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-24 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-looking marketing and technical documentation for a blockchain infrastructure platform offering RPC, data APIs, webhooks, and enterprise-grade managed infrastructure for developers and businesses.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1998.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Alchemy.com presents an established-looking blockchain infrastructure and developer-services platform. Its homepage promotes RPC access, blockchain data APIs, webhooks, token services, support for more than 100 chains, and managed infrastructure for developers and businesses, with monetization through subscriptions, enterprise services, and paid platform offerings.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist, or malicious-content indicators. The homepage's technical and commercial presentation is coherent with a SaaS developer platform, and external reputation checks returned clean results. Behavioral monitoring recorded some non-whitelisted external requests, but this was not accompanied by an abuse pattern or an impersonation signal; the observed site behavior did not indicate credential harvesting, wallet-draining activity, or cloaking.

EVIDENCE

- The homepage identifies the service as “Alchemy | Blockchain infrastructure for developers” and presents a coherent developer-platform product structure.
- The domain registration record shows registration on 1993-03-24T05:00:00Z, with an age of 33.44 years.
- Web-archive records contain 1,353 snapshots spanning 1998-02-08T22:25:44Z to 2026-08-24T17:20:07Z, covering 29 tracked years.
- Behavioral telemetry recorded 34 external XHR requests, 6 non-whitelisted XHR requests, 24 external POST requests, 0 wallet-connect runs, and 0 wallet-drainer runs.

Regulatory Verification Notes

Available evidence is consistent with an established, apparently legitimate software-services business, but the real-world operator identity is not independently verified. The reviewed site material does not present a financial-services license, licensing authority, or registration number; this is a regulatory-disclosure gap rather than evidence of a scam, particularly because the presented model is infrastructure software rather than an investment or brokerage offering. Any contractual engagement should therefore identify the legal counterparty and determine whether the relevant service arrangement requires sector-specific registration.

EVIDENCE

- The homepage presents developer subscriptions, enterprise or managed infrastructure, and paid platform services rather than a displayed investment-return proposition.
- The site is served through AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- The transport certificate is issued by WE1 at DV validation level and is valid to 2026-09-28T14:11:51+00:00.
- No broker-dataset match was returned; this is contextual reputational information and is not a licensing determination.

What to Verify Next

Before credential or payment interactions, the prospective counterparty should independently confirm the contracting legal entity, review the applicable terms, pricing, cancellation and payment-protection provisions, and check any relevant corporate or sector registry. Support and sales contact channels should be confirmed through independently sourced corporate information rather than relying solely on an initial webpage encounter.

EVIDENCE

- The homepage provides distinct About, Security, Pricing, Contact sales, and Sign in entry points for follow-up review.
- Two behavioral assessment runs completed successfully without detection of a sensitive form or wallet connection.
- The domain registration record extends through 2030-03-25T04:00:00Z, providing a concrete renewal date for future continuity checks.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence consistent with an established, apparently legitimate website. No scam or impersonation contradiction was identified, although the operator's real-world identity remains unverified.

Infrastructure Integrity

The site is protected by Akamai CDN/WAF infrastructure, while the observed hosting organization is CLOUDFLARENET - Cloudflare, Inc., US, on AS13335. All observed addresses were CDN-edge addresses, and no origin-server candidate was identified in the observed resolution; this protective architecture mitigates direct infrastructure exposure but is not, by itself, proof of legitimacy.

Closing Assessment

Normal browsing and ordinary service evaluation are proportionate to the assessed posture, while credentials or payments should follow the ordinary independent checks of merchant identity, applicable terms, and payment protection described above.

Written analysis generated 2026-08-24 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alchemy.com.

- The request stayed on alchemy.com. It was not redirected to another domain. CLEAR
- Registration is published under Cloudflare, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2030-03-25. CLEAR
- The earliest public archive of this site is from 1998-02-08. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alchemy.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
