

Is alera.in legit? TrustSniffer's high-trust assessment: 100/100

alera.in

Verdict

100

OUT OF 100

HIGH TRUST

alera.in appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 70%.

What this site appears to be

Alera Consulting Services is an Indian-based consulting firm offering ERPNext and Vtiger CRM implementation, AI-driven automation, and related digital services. The site includes service descriptions, case studies, partner logos, contact details and a demo/consultation CTA.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Alera Consulting Services is an India-based professional IT consulting and systems-integration website offering ERPNext and Vtiger CRM implementation, AI-driven automation, application development, e-commerce services, and related business-technology support through consultation, demonstration, deployment, and ongoing client engagements.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate-services model, with named ERPNext, Vtiger CRM, AI, mobile-app, web-app, WhatsApp-bot, and e-commerce offerings rather than investment, cryptocurrency, or credential-harvesting activity. The site has no detected brand-impersonation, phishing, hidden-form, password-collection, wallet-drainer, or cloaking indicators, and its contact form is identified as a non-sensitive lead-capture form. The available evidence is therefore consistent with an established, apparently legitimate consulting website, although the real-world operator identity has not been independently verified.

EVIDENCE

- The homepage describes ERPNext implementation, Vtiger CRM integration, AI automation, case studies, client references, and consultation services.
- The contact page contains one contact/lead-capture form with no sensitive fields or untrusted submission destination.
- The site's historical record shows 422 archive snapshots spanning 2021-11-25 to 2026-06-06, with 6 years tracked.
- The domain was registered on 2021-02-18 and is approximately 5.5 years old.

Regulatory Verification Notes

The site appears to operate as a commercial IT consultancy rather than a financial or otherwise regulated service provider. Its pages identify Alera Consulting Services and describe ERPNext and Vtiger CRM implementation, automation, and support, but the supplied content does not identify a professional license, regulatory registration number, or licensing authority. This is a transparency item for commercial engagement diligence, not evidence of deception. The site's apparent legitimacy is supported by substantive service pages, partner and technology references, a continuous historical presence, a known registrar, valid transport encryption, and the absence of observed malicious or blacklist contradictions. Those signals support an established-site assessment, while the operator's independent real-world identity remains unverified.

EVIDENCE

- The homepage title identifies "Alera Consulting Services," ERPNext, Vtiger CRM, AI solutions, and Nagpur, India; the service and product pages provide detailed implementation categories.
- The domain registrar is GoDaddy.com, LLC; registration runs from 2021-02-18 to 2029-02-18.
- The website is served from AS32475, SINGLEHOP-LLC - Internap Holding LLC, US.
- TLS uses issuer YR1 with DV validation and is valid through 2026-11-17T10:41:14+00:00.

What to Verify Next

Before a material commercial engagement, the prospective customer should independently confirm the contracting entity's legal name, business registration, physical operating details, and authority to make any stated ERPNext partner or deployment claims. The customer should also obtain written scope, service-level, warranty, data-processing, confidentiality, and termination terms, and confirm payment protections and refund or remediation provisions before transferring funds or granting production-system access. Contact and support channels should be confirmed through an independent route, and client references or case-study claims should be validated directly where the engagement is consequential.

EVIDENCE

- The homepage makes ERPNext partner and deployment claims and presents performance figures including stores deployed, active users, leads per month, and conversion lift.
- The homepage, case-study area, and consultation flow provide the relevant points for validating references, deliverables, and commercial representations.
- The contact page provides the site's stated engagement channel for matching proposed contracts and invoices to the actual contracting entity.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a low-risk trust posture and no observed scam or impersonation contradiction. The assessment supports ordinary business engagement in principle, subject to normal independent confirmation of the counterparty before credentials, payments, or privileged system access are involved.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, which provides a mitigating layer against direct exposure and common web-traffic abuse. This protection supports infrastructure resilience but does not independently establish the operator's identity or commercial standing.

Closing Assessment

The proportionate course is to proceed through a documented business-engagement process, completing independent counterparty, contractual, reference, and payment-protection checks before any sensitive access or significant financial commitment.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alera.in.

- The request stayed on alera.in. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)

- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2029-02-18. CLEAR
- The earliest public archive of this site is from 2021-11-25. CLEAR
- It is hosted on SINGLEHOP-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alera.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
