

Is alevgroup.com legit? TrustSniffer's high-trust assessment: 100/100

alevgroup.com

Verdict

100

OUT OF 100

HIGH TRUST

alevgroup.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A corporate WordPress site (Alev Group) for industrial conveyor repair equipment and rubber covering products. The page lists product categories, highlights services and support, and includes contact/navigation elements. No forms requesting sensitive data or financial transactions are present in the captured DOM.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What alevgroup.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Alev Group is a corporate WordPress website presenting a B2B catalogue for conveyor-repair equipment, vulcanizing presses, rubber-covering products, and related repair materials, with an apparent business model based on equipment supply, product sales, and technical support.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent industrial-supplier profile rather than a financial, credential-harvesting, or investment proposition, and the available evidence contains no phishing, impersonation, malicious-content, or confirmed blacklist indicators. The homepage and captured site behavior show no login form, sensitive-data form, wallet interaction, or financial transaction mechanism. The domain is also long-established, which supports continuity of the presented web presence, although it does not independently verify the real-world operator.

EVIDENCE

- The homepage presents Alev Group as an industrial supplier of conveyor-repair equipment and rubber-covering materials, with no deceptive financial or investment claims.
- The captured site contained 0 forms requesting sensitive data, no login form, 0 wallet-connect runs, 0 wallet-sensitive runs, and 0 wallet-drainer runs.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, no Google Safe Browsing malicious result, and no confirmed blacklist result.
- Domain registration record: created 2006-06-05T12:20:59Z; age 20.22 years; expiry 2028-06-05T12:20:59Z.

Regulatory Verification Notes

Available evidence is consistent with an established, apparently legitimate commercial website, but the real-world operator identity is not independently verified. The corporate and catalogue material identifies the site as Alev Group and describes products and services, while no licensing authority or registration number is stated in the available business content; for an industrial equipment supplier, this is a transparency and merchant-verification point rather than evidence of impersonation. Registration is held through ODTU Gelistirme Vakfi Bilgi Teknolojileri Sanayi Ve Ticaret Anonim Sirketi, with registrant details privacy-protected as an administrative registration feature. A third-party broker dataset produced no name match, providing no additional reputational concern but also no regulatory validation.

EVIDENCE

- The homepage navigation identifies “Alev Group,” product categories, company information, and contact functionality.
- The domain registrar is ODTU Gelistirme Vakfi Bilgi Teknolojileri Sanayi Ve Ticaret Anonim Sirketi.
- Hosting telemetry identifies AS24940, HETZNER-AS - Hetzner Online GmbH, DE.
- The site uses a valid DV TLS certificate issued by YR1, valid to 2026-10-17T22:26:52+00:00.

What to Verify Next

Before credential or payment interactions, an interested counterparty should independently confirm the legal entity behind Alev Group, validate the appropriate commercial registration or sector requirements through the relevant registry, and obtain written purchase, warranty, delivery, and returns terms. Contact details should be confirmed through an independently sourced business channel, and any payment should use protections appropriate to a B2B transaction rather than an irreversible method.

EVIDENCE

- The homepage provides contact and navigation elements but no captured sensitive-data or payment form.
- The available page content describes product supply and support, making merchant identity, fulfilment, warranty, and returns the relevant due-diligence areas.
- The site is a WordPress corporate/product-catalogue deployment with no external links captured for independent corporate corroboration.

Summary Verdict

The overall posture is high trust and low risk, with converging evidence supporting an established, apparently legitimate commercial website and no observed scam or impersonation contradiction. The principal residual uncertainty concerns independent attribution of the operating entity, not evidence of malicious activity.

Infrastructure Integrity

The website is protected by a CDN/WAF arrangement, with observed edge infrastructure associated with AS24940 and Hetzner Online GmbH in Germany; one potential origin candidate was also identified. This protective architecture is a mitigating security measure that can reduce direct exposure, but it is not proof of operator legitimacy.

Closing Assessment

Normal browsing and ordinary business engagement are proportionate to the assessed posture, while independent merchant-identity, contractual, and payment-protection checks should be completed before credentials or funds are committed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alevgroup.com.

- The request stayed on alevgroup.com. It was not redirected to another domain. CLEAR
- Registration is published under ODTU Gelistirme Vakfi Bilgi Teknolojileri Sanayi Ve Ticaret Anonim Sirketi. CLEAR
- DNS for this domain is served by kebirhost.com, across 2 name servers. NOTED
- The registration is paid up to 2028-06-05. CLEAR
- The earliest public archive of this site is from 2007-07-12. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alevgroup.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
