What alexik.com.ua served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2012.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is a marketing and booking site for the “Алексік” SPA hotel in Truskavets, presenting accommodation, paid stay packages, pools, saunas, meals, massages, excursions, conference facilities, and related guest services as a direct hospitality business.

Scam/Impersonation Risk

The site’s visible content is consistent with a conventional hotel website: it presents accommodation and SPA services, includes booking and contact functionality, and has no detected login form, wallet-connect behavior, or page-level impersonation indicators. However, this benign presentation is outweighed by a confirmed blacklist status and multiple external malicious or suspicious detections. These are material contradictions for a site accepting bookings or payments, even though the available evidence does not establish a specific impersonated brand or a particular fraudulent mechanism. The domain also has substantial historical continuity, which is a mitigating provenance signal but does not neutralize the current reputation risk.

EVIDENCE

- The homepage is classified as a hotel/accommodation page with room bookings, paid packages, SPA services, meals, excursions, and conference rental.
- The booking/contact interface contains one form and no detected login or hidden sensitive form.
- External reputation results recorded 3 malicious detections and 1 suspicious detection; the domain was also recorded on a confirmed blacklist.
- Domain registration is recorded from 2019-06-26T08:46:46Z, with an age of 7.15 years and expiry on 2027-06-26T08:46:46Z.

Regulatory Verification Notes

The public site presents the “Алексік” hotel identity and a Truskavets hospitality operation, but the operator’s real-world identity is not independently verified by the available evidence. No license or registration number is claimed on the analysed pages, and the available disclosure state is unclear; for a hotel business this is a verification gap rather than, by itself, proof of fraud. The recorded registrar is ТОВ “Інтернет Інвест”. A mid-level page-authority signal and a non-matched broker-reputation record provide limited context only and do not establish legal status or regulatory standing.

EVIDENCE

- The homepage identifies the business as “СПА-готель ‘Алексік’, Трускавець” and provides public booking and contact navigation.
- WHOIS records the registrar as ТОВ “Інтернет Інвест”.
- The site does not claim a license number or licensing authority in the analysed content.
- The archive contains 2,109 snapshots spanning 2012–2026, representing 15 years tracked with a maximum recorded gap of 2 years.

What to Verify Next

Before any payment or sensitive submission, the hotel’s physical operation and booking beneficiary should be confirmed through an independently sourced telephone number or local accommodation directory rather than relying solely on the website. The legal operator, refund terms, cancellation conditions, and payment recipient should be matched against an appropriate Ukrainian business or tourism registry. Any booking confirmation should be validated directly with the property, and payment should use a method offering transaction dispute protection.

EVIDENCE

- The homepage exposes a booking/contact form as the principal transaction pathway.
- The page content identifies Truskavets as the operating location, providing a basis for independent local verification.
- The analysed content includes booking and cancellation-policy topics but does not provide a verified licensing authority or registration number.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The website has a credible-looking hospitality presentation and meaningful historical continuity, but the confirmed external contradiction prevents the site from being treated as dependable for bookings, payments, or other sensitive transactions. Identity legitimacy remains unverified.

Infrastructure Integrity

The site is served through Cloudflare's CDN/WAF infrastructure, which provides a meaningful defensive layer and limits direct exposure of the hosting environment. All observed addresses were Cloudflare edge addresses, and the origin server was not observable in this analysis; this infrastructure protection is mitigating but is not evidence that the operator is legitimate.

EVIDENCE

- Hosted on AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- Observed edge addresses included 104.21.32.172, 172.67.153.39, 2606:4700:3031::ac43:9927, and 2606:4700:3035::6815:20ac.
- TLS certificate issued by WE1 with DV validation, valid to 2026-10-05T22:15:48+00:00.

Closing Assessment

The appropriate posture is to suspend sensitive interaction until the property, operator, payment beneficiary, and applicable business disclosures have been independently confirmed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- A large share of what the page loaded came from other domains.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alexic.com.ua at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
