## The page as captured

<https://alfaraenatour.com/>

What alfaenatour.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

## Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

The website is a small-to-mid travel agency and booking service presenting curated holiday packages, hotel, airline, and transport arrangements across destinations including Sikkim, Ladakh, Himachal, Kerala, Bali, and Thailand. Its apparent business model is to collect travel and booking details and earn through package sales and booking commissions.

### Scam/Impersonation Risk

No scam, phishing, impersonation, blacklist, or identity contradiction was observed. The homepage presents a conventional travel-service proposition, with destination information, package pricing, testimonials, contact details, and a booking form rather than login or payment-capture functionality. Interactive testing showed some dynamic-rendering irregularities, including substantial page changes and console errors, but no external form submissions, wallet activity, cloaking, clipboard manipulation, or other abuse pattern; these observations are more consistent with ordinary website implementation issues than with a confirmed malicious operation. The available reputation checks also found no malicious or suspicious detections, although the overall identity of the real-world operator remains unverified.

#### EVIDENCE

- Homepage: one booking/reservation form was present, with no login form, hidden sensitive form, or payment collection detected.
- Interactive behavior: 2 console errors and a maximum post-interaction DOM difference of 2149 were recorded; external XHR activity and external POST activity were both 0.
- Domain registration: registered 2020-12-02T14:41:18Z and recorded as approximately 5.72 years old.

#### Regulatory Verification Notes

The public pages describe travel-booking services and provide contact and business-facing information, but no license claim, license number, or registration number is disclosed in the reviewed material. This is a transparency and verification gap, not evidence of a scam. The registration record identifies WebIndya while the organization field is privacy-redacted, and the available evidence does not independently connect the website to a verified legal entity. The domain's established registration continuity, valid transport encryption, identifiable hosting, and absence of available malicious-reputation findings provide a reasonable legitimacy foundation, but they do not establish regulatory authorization.

#### EVIDENCE

- Domain registration: registrar recorded as PDR Ltd. d/b/a PublicDomainRegistry.com.
- Hosting infrastructure: served on AS46606, Unified Layer, US.
- TLS: certificate issued by YR1 with DV validation, valid to 2026-09-24T06:17:34+00:00.

#### What to Verify Next

Before a substantial booking or disclosure of sensitive personal information, the prospective customer should independently confirm the agency's legal entity, physical operating details, cancellation and refund terms, and the identity of the payment recipient. Where travel-sector licensing or registration is applicable, the relevant official registry should be checked using independently sourced contact details rather than relying solely on the website. A small test booking or payment method with meaningful consumer protection is preferable until those checks are complete.

#### EVIDENCE

- About and contact pages: use the published business details as starting points for independent identity confirmation.
- Booking flow: review the information requested and obtain written confirmation of itinerary, supplier, cancellation, and refund obligations.
- Regulatory documentation: no license or registration identifier was identified on the reviewed pages.

#### Summary Verdict

The website has a moderate-trust posture and the available evidence is consistent with an apparently legitimate travel service; no scam or impersonation contradiction was observed. The evidence supports ordinary, lower-sensitivity engagement, while the operator's real-world identity and formal standing should not be treated as independently proven.

## Infrastructure Integrity

The site resolves directly to a likely origin hosted by Unified Layer in the United States, with no CDN or WAF detected. This provides a straightforward hosting picture but limited edge-layer protective mitigation; infrastructure characteristics alone neither establish nor undermine legitimacy.

## Closing Assessment

Proceed with proportionate diligence, reserving substantial financial commitments and sensitive-data disclosure until the business identity, contractual terms, and payment protections have been independently confirmed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

### 01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF\_WHOIS\_PRIVATE

### 02 Dynamic Interaction Caution

- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV\_DOM\_DENSITY\_SPIKE

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of alfaraenatour.com.

- The request stayed on alfaraenatour.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by webhostbox.net, across 2 name servers. NOTED
- The registration is paid up to 2026-12-02. NOTED
- The earliest public archive of this site is from 2021-11-25. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about [alfaraenatour.com](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
