

Is algoldenrbs.com a scam? TrustSniffer's high-risk assessment: 0/100

algoldenrbs.com

Verdict

0

OUT OF 100

CRITICAL RISK

algoldenrbs.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

A plain web server directory index titled 'Index of /' listing a cgi-bin/ entry and timestamps. No forms, social links, or clear business intent.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What algoldenrbs.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website currently presents only a plain web-server directory index titled “Index of /,” showing a `cgi-bin/` entry and a modification timestamp rather than a defined service, identifiable business, or visible commercial purpose.

Scam/Impersonation Risk

The site carries a **confirmed blacklist finding** supported by two external blacklist sources, including multiple malicious detections and Tier-1 security-vendor flags. This is the decisive risk signal and is not offset by the absence of visible forms, payment flows, scripts, or other active abuse mechanisms on the observed page. The domain has established registration and archival continuity, which provides provenance context but does not establish that the present endpoint is legitimate or suitable for sensitive interaction. No conflicting legal identities or explicit brand impersonation were identified in the supplied page-level evidence.

EVIDENCE

- External reputation assessment: 8 malicious detections and 1 suspicious detection among 14 effective evaluations; Tier-1 threat detections from Fortinet and Sophos.
- External reputation assessment: confirmed blacklist status recorded across 2 external blacklist sources.
- Domain registration record: created 2019-09-04T20:01:08Z; age 6.96 years; registrar TUCOWS.COM, CO.
- Web archive: 255 snapshots, first seen 2020-10-29T12:47:53Z, last seen 2026-02-13T17:11:45Z, spanning 7 tracked years.

Regulatory Verification Notes

The observed homepage provides no identifiable operator, business description, licensing claim, registration number, or regulatory disclosure. This is a material transparency gap for any site that might later be associated with financial or other regulated activity, while the available evidence does not establish a regulated entity or independently verify the operator's identity. The page's directory-listing format is also inconsistent with a functioning customer-facing business presence. The site does have basic transport encryption, but domain-validation TLS confirms encrypted transport only and does not validate ownership, licensing, or business legitimacy.

EVIDENCE

- Homepage: title "Index of /," a `cgi-bin/` directory entry, and no visible business, legal, or licensing content.
- Hosting infrastructure: served from AS22611, InMotion Hosting, Inc., US.
- TLS certificate: issuer YR1; DV validation; valid to 2026-10-28T01:10:23+00:00.

What to Verify Next

Sensitive interaction should be withheld unless the intended operator, purpose, and applicable regulatory status are independently established. Any claimed financial service should be checked against the relevant regulator's official register using independently sourced organization details, and the site's official contact and service channels should be confirmed through an offline or separately authenticated route. The observed endpoint should also be revalidated before any future engagement, because its current presentation is only a directory index.

EVIDENCE

- Homepage: the observed content does not identify an operating business or customer service.
- Regulatory verification: no license claim or registration number is presented on the observed page.
- Interaction review: 0 login forms, 0 sensitive forms, 0 external posts, and 0 external XHR requests were observed across 2 successful runs.

Summary Verdict

The overall posture is **critical risk**, with the site unsuitable for credentials, account access, or financial interaction on the available evidence. Historical continuity and basic technical operability do not overcome the

confirmed external reputation contradictions, while real-world operator identity remains unverified.

Infrastructure Integrity

The domain resolves directly to a single apparent origin hosted by InMotion Hosting, Inc. on AS22611 in the United States; no CDN or WAF was detected. This provides a straightforward hosting path but offers no protective infrastructure signal capable of mitigating the established reputation risk.

Closing Assessment

Enterprise controls should block sensitive interaction with the endpoint pending independent operator and regulatory validation; any investigation should remain limited to controlled, non-authenticated observation.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01

Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02

Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of algoldenrbs.com.

- The request stayed on algoldenrbs.com. It was not redirected to another domain.

CLEAR

- Registration is published under TUCOWS.COM, CO.. CLEAR
- DNS for this domain is served by inmotionhosting.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-04. NOTED
- The earliest public archive of this site is from 2020-10-29. CLEAR
- It is hosted on INMOTION, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about algoldenrbs.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
