Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established Moroccan Arabic-language news portal presenting national and regional reporting on politics, economics, society, education, sport, culture, opinion, and family life as part of a commercial digital-publishing operation.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, or adverse threat-reputation signals were observed. The long-established domain, consistent news-media presentation, clean external reputation, and absence of credential-harvesting or deceptive browser behavior support the conclusion that this is a legitimate Alhadat TV publication rather than a fraudulent imitation.

- The domain-registration record shows registration in 2019 (~7.58 years old), with WASSLA-DIGITAL as registrar and expiry on 3 January 2027.
- The homepage remained on the requested Alhadat TV domain and presented a content-rich news homepage without destination mismatch or cloaking.
- Interactive examination of the homepage found no login form, hidden form, external password form, wallet request, clipboard hijacking, or suspicious inline script.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no safe-browsing alert, no abuse reports, and an established traffic rank of 778,052.

Regulatory Verification Notes

The homepage identifies the publishing company, legal declaration, publication director, privacy policy, contact route, and advertising function, providing a coherent institutional identity for the publication. The domain record names SOCIETE DU JOURNALISME MEDIA ET PRODUCTION AUDIOVISUEL as the owner. No regulatory licence claim or licence number was identified, but the observed activity is ordinary news publishing rather than a regulated financial or investment service; this is therefore a matter of disclosure scope, not evidence of deception. No matching broker-reputation record was found, which has no adverse implication for a media publisher.

- The homepage identifies Alhadat TV as the publication and provides named publishing leadership and legal-publication information.
- The domain-registration record attributes ownership to SOCIETE DU JOURNALISME MEDIA ET PRODUCTION AUDIOVISUEL.

- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid to 2 October 2026.
- The homepage provides access to a privacy-policy page and a legal declaration associated with the publication.

What to Verify Next

For institutional advertising, sponsorship, content-licensing, or other contractual engagement, the contracting entity and authorised signatory should be matched against the site's legal declaration and independent corporate records. Commercial terms, invoicing details, editorial-use conditions, and personal-data handling should be documented before funds, campaign assets, or audience data are exchanged. Official contact channels may be independently confirmed when initiating a material business relationship.

- The homepage presents a dedicated advertising offering, indicating a channel for commercial engagement.
- The site displays a cookie-consent banner, creating a basis for reviewing whether the privacy notice fully describes consent choices and data processing.
- The homepage contains no sensitive-data form or untrusted form destination, so any later request for extensive information should be assessed against the purpose of the relevant transaction.

Summary Verdict

The website has a high-trust posture and is assessed as a legitimate, established news publisher. Its coherent institutional presentation, mature provenance, benign observed behavior, and clean reputation converge without contradictory evidence. Normal interaction, including account login and standard use where offered, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure. All four observed addresses were Cloudflare edge nodes, with no direct origin candidate exposed; this reduces origin-server exposure but is a security-control signal rather than independent proof of legitimacy.

- The hosting infrastructure is served from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US).
- Four CDN edge addresses were observed, comprising two IPv4 and two IPv6 addresses, with 0 likely origin addresses.

Closing Assessment

Prospective users may interact with the site normally, while organisations entering material commercial arrangements should apply their standard counterparty and contract-approval controls.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alhadattv.ma.

- The request stayed on alhadattv.ma. It was not redirected to another domain. CLEAR
- Registration is published under WASSLA-DIGITAL. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-03. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alhadattv.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
