

Is aliens.az legit? TrustSniffer's high-trust assessment: 100/100

aliens.az

Verdict

100

OUT OF 100

HIGH TRUST

aliens.az appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Company website for Alians Development, an Azerbaijan-based real estate developer presenting projects, company values, news, and contact details (email, phone, address). Includes a contact form for inquiries and promotional content about projects and offers.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Alians Development is an Azerbaijan-based corporate real-estate website presenting premium residential and commercial development projects, company values, news, sales information, and customer-contact channels. Its apparent business model is property development and monetisation through project sales, leases, and related customer services.

Scam/Impersonation Risk

No phishing, impersonation, or conflicting legal-identity signals were observed. The site presents a coherent corporate profile for Alians Development, with named developments including Sapphire Residence, Blue Waters, Panorama Park, and Metro Park Bakikhanov, alongside project locations and a stated development methodology. The reviewed pages contain no login mechanism, cryptocurrency functionality, investment-yield promises, or other high-risk abuse patterns. Available external reputation signals were clean, including no malicious detections and no abuse reports; however, the real-world operator remains independently unverified, so the on-site identity should be treated as apparently legitimate rather than proven.

EVIDENCE

- Homepage: Presents Alians Development as a premium real-estate developer and identifies named development projects and their locations.
- About/business-model content: Describes research, planning, design, and development stages consistent with the stated real-estate business.
- Historical domain record: Registered 2014 (~11.75 years old).
- Historical web record: 78 archive snapshots spanning 2014–2025 (12 years tracked).

Regulatory Verification Notes

The reviewed content provides a professional corporate presentation and identifies property-development activities, but no licensing claim or license number is presented in the supplied site content. This is a regulatory-transparency item for verification, not evidence of deceptive conduct. The available third-party broker context produced no match, but that signal does not establish licensing, corporate registration, or regulatory status. The site's transport security and hosting configuration provide technical integrity indicators, while the certificate is domain-validated rather than an organisational validation certificate.

EVIDENCE

- Contact page: Provides business contact details and a contact form for enquiries.
- Site content: Describes property-development and sales activities without presenting a regulatory license or registration number.
- Hosting telemetry: Served from AS13335 (Cloudflare; CLOUDFLARENET - Cloudflare, Inc., US).
- TLS telemetry: Certificate issued by YE1, validation level DV, valid to 2026-09-28.

What to Verify Next

Before a property reservation, payment, or submission of sensitive information, independently confirm the legal entity operating the development business through the relevant Azerbaijani corporate and property-regulatory registries. Project-specific checks should include title or development authorisations, the contractual seller, reservation and cancellation terms, delivery obligations, and the availability of payment protection. Contact details should also be confirmed through an independently sourced business record or offline channel rather than relying solely on the website.

EVIDENCE

- About page: Use the stated company identity as the basis for an independent corporate-registry search.
- Project pages: Confirm the legal seller, development permissions, ownership documentation, and delivery terms for the selected project.
- Contact page: Independently corroborate the published business channels before sending documents or funds.
- Sales or contractual materials: Confirm refund, cancellation, escrow or equivalent payment-protection provisions before commitment.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website presenting a coherent real-estate business and a low-risk interaction profile. No contradictory abuse, impersonation, or phishing indicators were identified, although the operator’s real-world identity is not independently verified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and observed addresses are Cloudflare edge servers rather than an exposed origin. This reduces direct origin exposure and is a useful mitigating control, but it is infrastructure protection only and does not independently establish the operator’s identity or legitimacy.

Closing Assessment

Normal browsing and routine enquiry are proportionate to the assessed posture; before any financial commitment or sensitive submission, ordinary independent identity, contractual, and payment-protection checks should be completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of aliens.az.

- The request stayed on aliens.az. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2014-11-17. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aliens.az at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
