

Is alignedpeople.com.au a scam? TrustSniffer's high-risk assessment:
0/100

alignedpeople.com.au

Verdict

0

OUT OF 100

CRITICAL RISK

alignedpeople.com.au shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 75%.

WHAT THIS SITE APPEARS TO BE

A parked domain landing page served by a domain/hosting provider (Webcentral/Netregistry). It informs visitors the domain is not pointed to active content and offers links for domain services and support.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

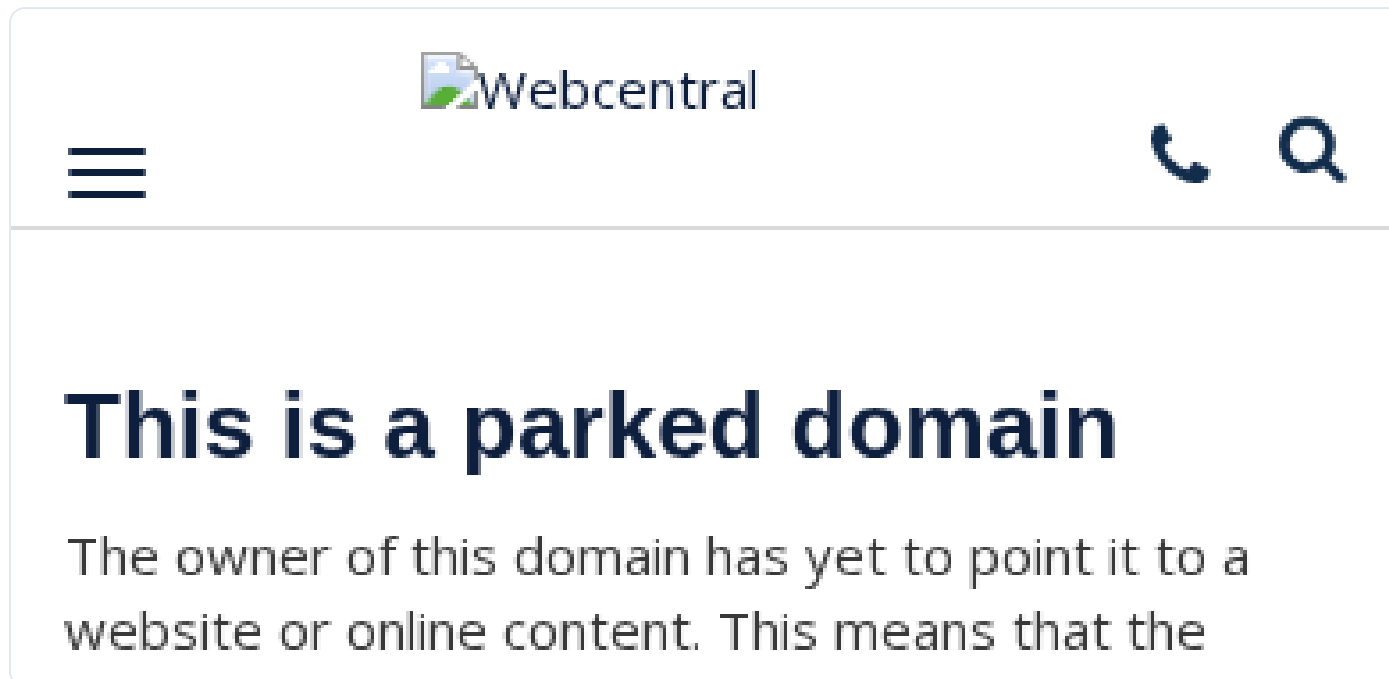

At a glance

The checks that decide most of this verdict.

Malware engines	8 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	10 years old Registered history	CLEAR
Web archive	Archived since 2016 376 snapshots	CLEAR
Certificate	Encrypted connection Issued by YR1	NOTED

The page as captured

https://alignedpeople.com.au/

What alignedpeople.com.au served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

A parked-domain landing page for alignedpeople.com.au, presented through Webcentral/Netregistry, tells visitors that the domain is not currently pointed to active online content and promotes domain registration, transfer, support, and related hosting services rather than an operating business or customer-facing service.

Scam/Impersonation Risk

The page itself is a conventional placeholder: it contains no active service, sensitive form, login form, wallet function, or apparent brand-impersonation content. No identity contradiction, brand impersonation, or phishing behavior was observed in the page content. However, this benign presentation does not resolve the materially adverse external signal: the domain has malicious detections and is blacklisted by two external sources. That convergence supports a critical risk posture for any sensitive interaction, even though the currently served page does not itself display an active attack mechanism.

EVIDENCE

- The homepage states that the domain is parked because its owner has not pointed it to a website or online content; the page contains no sensitive forms.
- Registration continuity records a domain age of 10.045 years; the historical record begins on 2016-08-02.
- The web archive contains 376 snapshots spanning 2016-08-02 to 2026-03-04, with 11 years tracked.
- External reputation checks recorded 8 malicious detections, a Tier-1 threat detection, and confirmed blacklist status from two external sources.

Regulatory Verification Notes

The available page is not an operating financial, commercial, or regulated-service site; it is a domain-provider placeholder. Its footer identifies Netregistry Pty Ltd and an Australian business number, while the technical registration record lists Melbourne IT as registrar and a trustee entity as registrant. Those details identify the hosting or registration context but do not independently verify the real-world operator associated with the domain. No business license, regulated-service authorization, or operating-entity disclosure is presented on the parked page, so regulatory status cannot be established from the supplied content. A valid transport certificate and identifiable hosting environment are technical controls, not evidence of licensing or legitimacy.

EVIDENCE

- The homepage footer states "Copyright © Netregistry Pty Ltd, ABN 13 080 859 721."
- The registration record lists Melbourne IT as registrar and "THE TRUSTEE FOR THE MARSHALL FAMILY TRUST" as registrant.
- The site is served from AS216180 (WHG-AUS - WHG Hosting Services Ltd, GB).
- The TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-11-04T04:47:23+00:00.

What to Verify Next

Before any sensitive engagement, the domain's current status should be confirmed directly with the named registrar or domain provider, and any future operating entity should be checked against the relevant corporate and regulatory registers. Any request to authenticate, submit personal information, transfer funds, or download software should be validated through an independently obtained contact channel rather than relying solely on links presented by the parked page.

EVIDENCE

- The homepage provides links for WHOIS, legal information, support, and customer service that can be used to confirm the domain's current administrative status.
- The page presents no active business service or regulated offering against which a license could be matched.
- The page has no login form, sensitive form, or untrusted form destination in its current state.

Summary Verdict

The overall posture is critical, with the available evidence supporting only passive observation of the currently served placeholder content. The domain's established historical presence and technically valid transport do not outweigh the confirmed external threat and blacklist signals affecting sensitive interaction risk.

Infrastructure Integrity

The site resolves directly to one likely origin IP and has no detected CDN or WAF layer. This provides limited infrastructure separation or protective mediation, although the hosting service and network location are identified.

Closing Assessment

Interaction should remain limited to passive viewing until the domain's reputation, administrative status, and any future operator identity have been independently validated; login, credential submission, downloads, and financial activity should not be undertaken.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01

Governance Risk
 - The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02

Sensitive Interaction Risk
 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alignedpeople.com.au.

- The request stayed on alignedpeople.com.au. It was not redirected to another domain. CLEAR
- Registration is published under Melbourne IT. CLEAR
- DNS for this domain is served by netregistry.net, across 3 name servers. NOTED
- The earliest public archive of this site is from 2016-08-02. CLEAR
- It is hosted on WHG-AUS, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alignedpeople.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
