

Is alirtehal-travel.com safe? TrustSniffer's low-trust assessment: 29/100

alirtehal-travel.com

Verdict

29

OUT OF 100

LOW TRUST

alirtehal-travel.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Website for Al-Irtehal Travel offering travel, tours, business travel and cargo services with phone and email contact details in Arabic and English.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What alirtehal-travel.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Al-Irtehal Travel & Tours & Cargo Services is a bilingual Arabic-English travel-agency website presenting travel planning, tours, business-trip arrangements, and cargo or logistics services, with a conventional service-fee, booking, and shipping-contract business model.

Scam/Impersonation Risk

Confirmed external threat detections and a blacklist hit create a material risk for sensitive interaction, despite the site's ordinary travel-and-cargo presentation. The available evidence does not indicate brand impersonation, phishing forms, or a conflicting legal identity; the concern is instead driven by external reputation signals associated with the domain and its hosting environment. Abuse reports are attributed to shared infrastructure, so they do not by themselves establish that the website operator caused the reported activity, but the attribution does not remove the broader risk signal. The site itself presents no obvious credential-harvesting or investment solicitation mechanism, which is a mitigating content observation rather than a clearance for payments or account use.

EVIDENCE

- External threat telemetry records a confirmed blacklist hit for the website, alongside two malicious and one suspicious detection.
- The hosting IP, 67.20.76.178, has 52 abuse reports attributed to shared infrastructure operated by Unified Layer.
- Registration records show creation on 2024-09-11, with an age of 1.94 years.
- Archive records show 60 snapshots spanning 2015–2025, covering 11 tracked years.

Regulatory Verification Notes

The website describes travel and cargo services but does not state a licensing authority or provide a license or registration number in the supplied homepage content. The real-world operator remains unverified; the registration record names BASSAM DHOMRAN and lists the organization as “ORGANIZATION NAME MASKED,” but those details do not independently establish the legal entity behind the service. A broker-reputation dataset produced no name match, which is a limited contextual signal and not a regulatory determination. The site has a valid domain-validated TLS certificate and stable technical delivery, but transport encryption confirms channel protection only, not licensing or commercial legitimacy.

EVIDENCE

- The homepage identifies “Alirtehal Travel & Tours & Cargo Services” and lists travel, tours, business travel, and cargo services without a stated licensing authority or license number.
- The domain is registered through FastDomain Inc.; the recorded creation date is 2024-09-11 and the expiration date is 2026-09-11.
- The website is served on AS31898, ORACLE-BMC-31898 — Oracle Corporation, US.
- The TLS certificate is issued by YR1 at DV validation level and is valid to 2026-11-02T22:37:51+00:00.

What to Verify Next

Before any booking, shipment instruction, credential submission, or payment, the prospective customer should independently confirm the operating company and its authority to provide the advertised services through the relevant commercial or travel regulator. Payment instructions should be checked against independently obtained company details, and booking, cancellation, refund, cargo-liability, customs, and insurance terms should be obtained in writing. Contact channels should be confirmed through an independent offline route rather than relying solely on the website.

EVIDENCE

- The homepage provides service descriptions but no visible license authority or registration number to anchor a regulatory check.
- The contact page should be used to obtain written booking and cargo terms, while the counterparty should be confirmed independently before funds or documents are sent.
- The site presents no sensitive forms in the captured page and no login mechanism was observed, so any later request for credentials or payment details should be treated as a separate interaction requiring validation.

Summary Verdict

The website has a coherent service presentation and some technically functional characteristics, but the converging external threat detections and confirmed blacklist status produce a low-trust posture for sensitive interaction. Its apparent business purpose is plausible, yet the available evidence is insufficient to establish that the online service is operated by the claimed real-world entity.

Infrastructure Integrity

The site resolves directly to a single origin endpoint rather than a detected CDN or WAF edge, and no protective CDN layer was identified. Oracle Corporation hosting provides a defined infrastructure location, but the absence of an intermediary protection layer means the hosting arrangement should be treated as a technical fact and limited mitigation, not evidence of legitimacy.

Closing Assessment

Restrict use to non-sensitive review until the counterparty, service authority, and payment arrangements have been independently confirmed; credentials, identity documents, and funds should not be provided while those checks remain unresolved.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

Signals weighed against the site

- AbuseIPDB: 52 reports on hosting IP 67.20.76.178 (Unified Layer, Content Delivery Network), 100% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alirtehal-travel.com.

- The request stayed on alirtehal-travel.com. It was not redirected to another domain. CLEAR
- Registration is published under FastDomain Inc.. CLEAR

- DNS for this domain is served by hostmonster.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-11. NOTED
- The earliest public archive of this site is from 2015-03-28. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alirtehal-travel.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
