

Is alishioindustrial.com legit? TrustSniffer's high-trust assessment: 100/100

alishioindustrial.com

Verdict

100
OUT OF 100
HIGH TRUST

alishioindustrial.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not ScamLow Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 70%.

What this site appears to be

Company website for Alishio Industrial Control Corp (AICC). Presents company overview, mission/vision, product categories (flowmeters, valves, sensors, automation), featured projects, contact information (Philippines address, phone, email), and navigation links (About, Products, Projects, Blogs, Careers). No forms or payment flows detected.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What alishioindustrial.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Alishio Industrial Control Corp's website is a corporate B2B supplier site presenting industrial process-control instrumentation, including flowmeters, valves, sensors, and automation solutions, alongside project information, company pages, and contact details for product supply, installation, commissioning, and service enquiries in the Philippines.

Scam/Impersonation Risk

No scam, phishing, impersonation, blacklist, or identity-contradiction signals were observed. The homepage and company pages present a coherent industrial-supplier profile, while the site has no login forms, payment flows, wallet connections, hidden forms, or suspicious redirects. Its historical record is consistent with an established web presence rather than a recently created or repurposed site. The available evidence therefore supports an apparently legitimate, low-risk website, although the real-world operator identity is not independently verified.

EVIDENCE

- Domain registration record: Registered 2018 (~7.73 years old).
- Web archive: 370 snapshots from 2020-05-08 through 2026-06-06, spanning 7 years tracked.
- Homepage behavior: HTTP 200 responses in 2 of 2 runs; no cloaking, hidden forms, wallet activity, clipboard manipulation, or suspicious inline scripts detected.
- External reputation checks: 0 malicious detections, 0 suspicious detections, 0 abuse reports, and no blacklist hit recorded.

Regulatory Verification Notes

The About, Products, Projects, and Contact pages provide a substantive corporate presentation and describe a conventional industrial supply and services model rather than a regulated financial or investment offering. No license, registration number, or regulatory authorization claim was identified on the reviewed pages; for this type of industrial supplier, that is a disclosure point to validate according to the specific goods, installation services, and contracting jurisdiction, not evidence of fraud. The site's apparent legitimacy is supported by its long-running content continuity, valid transport encryption, stable hosting, and clean evaluated reputation signals, while the operator's independent real-world identity remains unverified.

EVIDENCE

- Hosting: Served from AS22612 (NAMECHEAP-NET - Namecheap, Inc., US).
- TLS: SSL.com TLS Issuing RSA CA R1, DV validation, valid to 2027-02-24T02:29:38+00:00.
- Homepage and product pages: Describe flowmeters, valves, sensors, automation, industrial solutions, projects, and service-oriented commercial enquiries.
- Legal and corporate disclosure review: No licensing claim or license number identified on the reviewed company pages.

What to Verify Next

Before a commercial engagement, the prospective counterparty should independently confirm the company's legal registration, physical operating details, authority to represent the named business, and the identity of the contracting entity. Quotations, warranties, delivery obligations, installation scope, dispute terms, and payment-protection arrangements should be checked in the applicable jurisdiction before credentials or payment information are exchanged. Any sector-specific permit or registration requirement should also be confirmed with the relevant official registry.

EVIDENCE

- About and company pages: Use the stated corporate identity and mission information as the basis for independent entity confirmation.
- Contact page: Independently validate the published business contact channels and Philippine operating address.
- Products and Projects pages: Reconcile proposed goods, project references, installation commitments, and service scope with the written commercial agreement.

Summary Verdict

The website presents a **high-trust, low-risk posture** and the evidence is consistent with an established, apparently legitimate industrial supplier. No contradictory signals were identified, but the available evidence does not independently prove the real-world operator identity.

Infrastructure Integrity

The site resolves to a single likely origin address, with no CDN edge layer detected and no CDN or WAF vendor identified. This provides less intermediary traffic-layer separation than a CDN-backed deployment, but the resolved infrastructure is stable and does not, on its own, indicate malicious activity.

EVIDENCE

- Network resolution: 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- Infrastructure status: Resolution completed successfully; no CDN was detected.

Closing Assessment

The appropriate course is ordinary commercial due diligence before credential or payment interactions, with particular attention to independently confirmed counterparty identity, contractual protections, and payment recourse.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alishioindustrial.com.

- The request stayed on alishioindustrial.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by namecheaphosting.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-28. NOTED
- The earliest public archive of this site is from 2020-05-08. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alishioindustrial.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
