

Is alkalimetals.com legit? TrustSniffer's high-trust assessment: 80/100

alkalimetals.com

Verdict

80

OUT OF 100

HIGH TRUST

alkalimetals.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 70%.

What this site appears to be

Alkali Metals Ltd corporate site presenting a large product catalog (industrial and specialty chemicals with CAS numbers), manufacturing/R&D capabilities, certifications, export and investor information, plus contact details. Appears to be an established chemical manufacturer/supplier serving B2B clients.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

## The page as captured

https://alkalimetals.com/

What alkalimetals.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

## Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

Alkali Metals Ltd presents a corporate B2B chemical-manufacturing and supply website offering industrial and specialty chemicals, APIs, and raw materials, supported by product listings, manufacturing and research capabilities, certifications, export information, investor disclosures, and business contact channels.

### Scam/Impersonation Risk

No phishing, impersonation, malicious-behavior, or other contradiction indicators were observed. The site's corporate presentation is internally coherent: it identifies a chemical manufacturing business, provides CAS-numbered product information, describes hazardous-chemistry expertise, API manufacturing, analytical facilities, and research and development, and includes investor-relations material rather than using urgency, speculative financial promises, or consumer deception. The real-world operator identity remains independently unverified, so the legitimacy assessment is evidence-consistent rather than proof of ownership.

#### EVIDENCE

- The homepage identifies Alkali Metals as a chemical manufacturer and supplier and lists products including 2-Amino Pyridine, Sodium Hydride, Sodium Azide, and Trimethyl Borate.
- The site records domain registration on 1998-09-25, with an age of 27.92 years; registrar: GoDaddy.com, LLC.
- Historical coverage records 415 archive snapshots from 1999-04-27 through 2026-05-16, spanning 28 years with a maximum gap of 1 year.
- Page analysis found no login form, sensitive form, hidden form, wallet connection, or suspected brand impersonation.

#### Regulatory Verification Notes

The site contains substantial corporate and investor-facing disclosure material, including annual reports, annual returns, board and committee information, corporate governance, financial results, shareholding patterns, policies, and disclosures under SEBI regulations. It also presents certifications and manufacturing-related information. A specific operating licence or licence number is not identified in the supplied site content; this is a regulatory-transparency item requiring confirmation, not evidence of a scam. The available evidence supports an apparently established business site, but does not independently verify the legal entity operating the domain.

#### EVIDENCE

- The investor section includes “Disclosures under SEBI Regulations,” annual reports, corporate announcements, governance policies, financial results, and shareholder information.
- The site includes dedicated About Us, Promoters, Board of Directors, Key Managerial Personnel, Awards, and Certifications pages.
- Hosting is identified as AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1 at DV validation level and is valid to 2026-11-15T00:16:27+00:00.

#### What to Verify Next

Before credential or payment interactions, an interested counterparty should independently confirm the legal entity and relevant sector permissions through applicable corporate and chemical-industry registries. Procurement teams should validate the business contact channels through an independently sourced corporate record, reconcile contractual counterparties and payment instructions before settlement, and review applicable delivery, returns, liability, and payment-protection terms.

#### EVIDENCE

- The site provides investor-governance and corporate-disclosure pages that can be cross-checked against authoritative registries.
- The site provides dedicated Contact and investor-grievance contact information for independent channel confirmation.
- The business model is presented as B2B supply conducted through product sales and commercial contracts, making counterparty and payment-instruction validation the relevant pre-transaction control.

Summary Verdict

The overall posture is **high trust and low risk**, and the evidence is consistent with an established, apparently legitimate corporate website. No contradictory signals were observed; the remaining uncertainty concerns independent connection of the website to its real-world operator rather than evidence of malicious purpose.

Infrastructure Integrity

The website is protected by Cloudflare CDN and WAF infrastructure, with observed traffic terminating on Cloudflare edge servers rather than a directly exposed origin address. This provides a meaningful defensive layer against routine network exposure, but remains a mitigating infrastructure signal rather than proof of corporate legitimacy.

Closing Assessment

Normal browsing and ordinary business engagement are proportionate to the available risk posture, while independent merchant-identity, contractual, and payment-protection checks should be completed before submitting credentials or making payments.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alkalimetals.com.

- The request stayed on alkalimetals.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-24. NOTED
- The earliest public archive of this site is from 1999-04-27. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about alkalimetals.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
