

Is allegro-reinigung.de safe? TrustSniffer's low-trust assessment: 25/100

allegro-reinigung.de

Verdict

25

OUT OF 100

LOW TRUST

allegro-reinigung.de is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 75%.

What this site appears to be

Website for Allegro Reinigung, a Munich-based textile cleaning business. Contains detailed price lists, membership information (RFID), locations with addresses and opening hours, sustainability practices, service descriptions and tips for garment care.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This is the website of Allegro Reinigung, a Munich-based textile-cleaning business presenting garment and household-textile cleaning, price offers, membership benefits, branch locations, opening hours, sustainability practices, and care guidance; its apparent business model is a local paid cleaning service with optional memberships and add-ons.

Scam/Impersonation Risk

The site's visible content is coherent with a local commercial service and contains no observed brand-impersonation indicators, conflicting legal identities, login form, or sensitive-data form. However, that benign presentation is outweighed by a material external reputation contradiction: multiple threat detections are recorded and the domain is confirmed as blacklisted by two sources. The site should therefore be treated as presenting elevated risk for credentials, account access, payments, or other sensitive interactions. A published contact-channel integrity anomaly is also present: the address `info@example.come` uses a deliverability-breaking domain typo or possible typosquat pattern. The available evidence does not establish that the business content itself is fraudulent, but it does not reconcile the external detections.

EVIDENCE

- External reputation telemetry recorded 6 malicious and 2 suspicious detections from 8 evaluated results, with blacklist status confirmed.
- The domain is 4.736481861738535 years old, equivalent to 1,730 days of registration continuity.
- Archive records show 419 snapshots, spanning 2021-11-25T15:58:00Z to 2026-06-07T02:46:35Z, across 6 tracked years; this indicates sustained historical capture but does not offset the current reputation contradiction.
- The homepage presents a local-service business profile without a login or sensitive-data form.

Regulatory Verification Notes

The site's apparent commercial identity is consistent with Allegro Reinigung, but independent real-world operator verification remains likely rather than verified. The available pages do not present a licensing claim, licensing authority, or registration number; for a textile-cleaning business this is best treated as a disclosure and verification gap, not standalone evidence of wrongdoing. No matching third-party broker profile was identified. The reputation contradiction remains the decisive regulatory-trust concern because ordinary business presentation does not resolve the confirmed external blacklist status.

EVIDENCE

- The homepage identifies the business as a third-generation, owner-managed Munich textile-cleaning company and links to Instagram and Facebook.
- No license claim, licensing authority, or license number is presented in the supplied business-model and page-content evidence.
- Transport encryption is provided by a DV certificate issued by YR2, valid through 2026-10-04T08:49:33+00:00.
- Page-authority telemetry places the site in the mid band, which is contextual only and does not establish legitimacy or regulatory standing.

What to Verify Next

Before any sensitive interaction, an independent party should confirm the business's physical presence and operator details using contact information obtained outside the website. Any applicable German business, consumer-protection, or payment-service requirements should be checked with the relevant official registry or authority rather than relying on on-site statements. Payment should be deferred unless the merchant identity, transaction terms, refund arrangements, and payment-protection options can be independently confirmed.

EVIDENCE

- The site provides branch addresses and opening hours that can be checked through an independent channel.
- The business model involves customer payments, optional membership fees, and add-on services, making merchant-identity and payment-terms validation relevant.
- The site's observed browser behavior showed 2 successful runs, 0 hidden forms, 0 wallet-connect runs, and 0 suspicious inline scripts; these benign technical observations do not clear the external reputation contradiction.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site has a plausible local-business presentation and some consistent technical and historical characteristics, but the confirmed external reputation contradiction prevents the available evidence from supporting ordinary trust in sensitive use.

Infrastructure Integrity

The site resolves directly through Combell NV in Belgium rather than a detected CDN, with two likely origin IP candidates. Automated DNS heuristics characterized the infrastructure as fast-flux-like and fragmented; these indicators are not independently confirmed, but the hosting arrangement and network posture provide no mitigating CDN or WAF layer that would offset the external reputation concern.

EVIDENCE

- Served from AS34762, COMBELL-AS / Combell NV, BE, with observed server IP 185.175.196.11.
- Infrastructure resolution reports 2 unique IPs, 0 edge IPs, and 2 likely origin IPs; no CDN was detected.
- DNS telemetry recorded the unconfirmed heuristic flags `fast\_flux\_like` and `infrastructure\_fragmentation`.

Closing Assessment

Sensitive actions should remain paused unless independent validation establishes the operator, contact channels, transaction terms, and payment protections; any unavoidable engagement should be limited and exposure-controlled until that validation is complete.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
--------	--------

Identity score	76/100

About this assessment

A trust score summarises the evidence TrustSniffer could collect about allegro-reinigung.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
