

Is alliance-prom.ru a scam? TrustSniffer's high-risk assessment: 0/100

alliance-prom.ru

Verdict

0

OUT OF 100

CRITICAL RISK

alliance-prom.ru shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Russian-language site for "АльянсПром" in Novosibirsk describing services to buy non-liquid industrial goods and providing phone/email contact info. Contains service list and brief company description; appears to be a small local procurement buyer.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://alliance-prom.ru/

What alliance-prom.ru served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This Russian-language website presents itself as “АльянсПром,” a Novosibirsk-based industrial procurement business that purchases surplus and obsolete goods—including valves, electric motors, bearings, metalworking tools, electrodes, and electrical equipment—from enterprises and individuals through direct telephone and email contact.

Scam/Impersonation Risk

The site’s stated business model is a conventional local industrial-buyer service, and the homepage contains no login form, payment form, wallet connection, or overt phishing mechanism. However, this benign presentation is materially outweighed by confirmed external threat detections: the domain is blacklisted by multiple external sources, including detections classified as malicious. No separate brand-impersonation, phishing-page, or conflicting legal-entity finding was observed, but the confirmed blacklist status creates a serious risk for sensitive interaction and prevents the site’s ordinary business presentation from being treated as sufficient evidence of safety.

EVIDENCE

- The homepage describes purchases of surplus industrial goods and provides business contact details, with no login or sensitive-data form observed.
- External reputation telemetry recorded 13 malicious and 1 suspicious detections from 19 effective evaluations; Fortinet and Sophos were among the flagged providers.
- The domain is recorded as blacklisted by two external sources, while Google Safe Browsing was recorded as non-malicious.

Regulatory Verification Notes

The About and Contact pages identify “АльянсПром,” associate it with Novosibirsk, describe procurement of non-liquid industrial inventory, and display telephone contact details. They do not provide a clearly stated legal entity, registration number, licensing information, or independently verifiable regulatory status; the operator identity therefore remains unverified and governance disclosure is unclear. The site’s historical and technical indicators provide context but do not overcome the external reputation findings or establish that the stated business is the responsible real-world operator.

EVIDENCE

- Current domain registration: 2025; approximately 1.46 years old; registrar REGRU-RU; expiry 2027-03-04.
- Web-archive records: 59 snapshots spanning 2013–2025, covering 13 years tracked.
- Hosting telemetry: served on AS213780, ARKCORE – Individual Entrepreneur Suvorov Maxim Sergeevich, RU.
- Transport encryption: TLS certificate issued by YE2 with DV validation, valid to 2026-10-12.

What to Verify Next

Before any commercial engagement, an independent corporate-registry search should confirm that the named business exists, identify its legal operator, and establish authority to purchase or resell industrial goods. Any proposed bank-account, collection, shipping, or document-exchange details should be validated through an independently obtained telephone number or other offline channel rather than relying solely on contact details published on the site. The relevant counterparties should also confirm ownership, condition, title, and transfer documentation for goods offered through the site.

EVIDENCE

- The site’s business description is contact-driven and does not present an independently verifiable legal-entity identifier.
- The available identity verification status is unverified.
- The site presents a conventional procurement service, but external reputation evidence requires independent counterpart validation before sensitive or financial dealings.

Summary Verdict

The website has a critical trust posture and should not be treated as a reliable basis for credential submission, payment, or other sensitive interaction. Its credible-looking industrial-business content does not offset the confirmed external blacklist and malicious-detection evidence.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and is a mitigating defensive feature, but all observed addressing was edge-based and the origin server was not observable in this analysis. Protective edge infrastructure can reduce direct exposure without establishing the legitimacy of the operator or resolving the reputation concerns.

Closing Assessment

Passive review is the only proportionate use until the counterparty, transaction authority, and all payment or delivery details have been independently validated; sensitive interaction should be withheld if those checks cannot be completed.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

- 01

Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02

Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alliance-prom.ru.

- The request stayed on alliance-prom.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGRU-RU. CLEAR
- DNS for this domain is served by com., across 2 name servers. NOTED
- The registration is paid up to 2027-03-04. NOTED
- The earliest public archive of this site is from 2013-05-21. CLEAR
- It is hosted on ARKCORE, from a server in CZ. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alliance-prom.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
