

Is alliedmarketresearch.com legit? TrustSniffer's high-trust assessment: 100/100

alliedmarketresearch.com

Verdict

100

OUT OF 100

HIGH TRUST

alliedmarketresearch.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 75%.

What this site appears to be

Allied Market Research presents a long-established business research company offering paid reports, subscriptions, databases, consulting, and customized market intelligence across numerous industries. The page includes extensive corporate information, customer testimonials, contact channels, policies, and standard login, registration, and newsletter forms.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Allied Market Research is an established business-to-business market intelligence provider offering paid research reports, company profiles, subscriptions, databases, consulting, and customized industry analysis to organizational customers.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate research model with named service categories, customer testimonials, contact channels, policies, and conventional login and registration functions. Its long-established domain history, sustained archival presence, strong global traffic footprint, and clean external reputation provide converging evidence of an authentic operating business rather than an impersonation or phishing site. Normal account login and standard use are appropriate.

- The homepage identifies Allied Market Research and presents reports, subscriptions, consulting, company profiles, and industry research.
- The domain was registered in 2013 and is approximately 13.37 years old; archival records contain 5,000 snapshots across 10 tracked years, from 2013-07-27 through 2022-03-22.
- External reputation checks recorded 0 malicious findings, 0 suspicious findings, no blacklist detection, and 0 abuse reports.

Regulatory Verification Notes

The reviewed pages describe a commercial research and consulting business rather than a regulated financial service. No license or registration number is presented in the supplied site content, so regulatory authorization is not applicable on the face of the stated business model but remains a transparency item if a specific engagement requires regulated status. Registration privacy is an administrative detail, not an identity contradiction. The site's policies, contact information, business-service descriptions, and established operating history support a credible corporate presentation.

- The homepage provides toll-free, United Kingdom, and international telephone channels, a corporate email address, Terms of Use, Privacy Policy, and business-email account procedures.
- The domain registrar is GoDaddy.com, LLC; the recorded registration expires on 2028-03-23.
- The site's TLS certificate is issued by WE1 at DV validation level and is valid through 2026-10-25.

What to Verify Next

For a material procurement or subscription decision, the prospective customer should confirm the contracting entity, commercial terms, refund provisions, and any sector-specific authorization requirements through the site’s legal and contact pages and, where necessary, an independent corporate or regulatory registry. Official contact channels should also be confirmed through an independent offline route before sensitive contractual changes are made.

- The account area requires business-email registration and references the site’s Terms of Use and Privacy Policy.
- The homepage exposes dedicated Reports Store, Company Profiles, Avenue Subscription, Our Services, About AMR, and Careers sections.
- The supplied business description identifies organizational sales, consulting, subscriptions, and customized intelligence services.

Summary Verdict

The website presents a legitimate, established, and trustworthy corporate service with strong identity continuity, coherent business purpose, clean reputation signals, and no observed impersonation or phishing contradiction. Its overall posture supports normal interaction, including account login and standard commercial use.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge servers rather than exposed origin candidates. This reduces direct origin exposure and is a mitigating infrastructure characteristic, although it is not by itself proof of legitimacy.

- Hosted on AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- Observed edge IPs were 104.18.28.16, 104.18.29.16, 2606:4700::6812:1c10, and 2606:4700::6812:1d10.
- The origin server was not observable in the analysis.

Closing Assessment

Engagement with the site is appropriate for its stated research and business-intelligence purposes, subject to ordinary procurement, contractual, and payment controls.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alliedmarketresearch.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
