

Is allsportsdigital.com safe? TrustSniffer's low-trust assessment: 30/100

allsportsdigital.com

Verdict

30

OUT OF 100

LOW TRUST

allsportsdigital.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

All Sports Digital - a 'Launching Soon' landing page that collects name and email for updates. Minimal content, newsletter/contact form present, uses reCAPTCHA and cookie notice, likely a pre-launch marketing site.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What allsportsdigital.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

All Sports Digital is a “Launching Soon” pre-launch landing page for a forthcoming digital business or service. It presents a minimal brand page, a contact form, and an email-signup request for updates, promotions, and related announcements; no operational product, account area, or payment function is presented to visitors.

Scam/Impersonation Risk

The site carries a clearly elevated risk of sensitive interaction because external reputation evidence includes a confirmed blacklist designation and multiple malicious detections. This is a material contradiction to the otherwise limited, benign-looking page presentation. The page itself contains no login form, wallet connection, payment workflow, or detected brand-impersonation elements, so the observed page does not demonstrate an active credential or payment-harvesting mechanism; however, that limited interaction surface does not resolve the external reputation conflict. Abuse reports associated with one Amazon CDN address are attributed to shared infrastructure and therefore do not independently establish that the reports concern this site, but the separate blacklist and malicious-detection signals remain decisive. No conflicting legal identities were observed.

EVIDENCE

- External reputation checks recorded a confirmed blacklist result, with 2 malicious and 1 suspicious detection among 3 reported detections.
- The hosting-IP reputation record contains 7 abuse reports for 13.248.243.5, explicitly attributed to shared Amazon CDN infrastructure.
- The homepage is identified as a “Launching Soon” landing page with no login form, hidden form, password submission, wallet connection, or clipboard-hijacking behavior.
- Historical records show first seen 2004-03-30 and last seen 2025-02-26, spanning 22 years tracked; domain registration records show creation on 2008-08-22T21:25:06Z and an age of 18 years.

Regulatory Verification Notes

The available page does not identify a legal operating entity, regulatory status, registration number, or licensing authority. For a pre-launch site this is a disclosure and counterparty-verification gap rather than, by itself, proof of fraud; nevertheless, the operator’s real-world identity remains unverified and the absence of substantive business information prevents meaningful regulatory assessment. Positive technical indicators include registration through GoDaddy.com, LLC and a valid domain-validated TLS certificate issued by GoDaddy TLS Intermediate CA DV - R1v1. These signals support basic technical continuity and transport security, but they do not establish ownership, authorization, or regulatory standing.

EVIDENCE

- Domain registration lists GoDaddy.com, LLC as registrar, with expiration on 2027-08-22T21:25:06Z.
- The site is served through AS16509, Amazon.com, Inc. (AMAZON-02), United States.
- TLS is domain-validated, issued by GoDaddy TLS Intermediate CA DV - R1v1, and valid to 2026-09-23T19:57:58+00:00.
- The homepage contains a newsletter/contact form, reCAPTCHA, cookie notice, and copyright statement, but no stated legal entity or license disclosure.

What to Verify Next

Before any sensitive interaction, an independent source should establish the operator’s legal identity and confirm whether the forthcoming service will require sector-specific authorization. Any future claims about products, subscriptions, financial services, or data handling should be checked against formal terms, privacy documentation, refund provisions, and the relevant public registry. Contact channels should be confirmed through an independently obtained route rather than relying solely on the landing page. Until those checks are complete, interaction should remain limited to passive review.

EVIDENCE

- The homepage currently exposes only one newsletter/contact form and does not provide an account-login workflow.
- No password-external form, wallet provider, wallet-sensitive action, or wallet-drainer behavior was observed.
- The page identifies itself as a pre-launch service and provides no operational product documentation against which business or regulatory claims could be tested.

Summary Verdict

The overall posture is low trust, with elevated risk for sensitive interaction. The website may represent a genuine pre-launch project, but its legitimacy and real-world operator identity are not independently verified, and the confirmed external reputation contradictions prevent it from being treated as a trusted counterparty.

Infrastructure Integrity

The site is protected by a CDN/WAF layer and resolves to two Amazon edge addresses, both on AS16509; no origin candidate was observable. Amazon's infrastructure and the CDN/WAF provide a mitigating layer against direct exposure, but protective hosting infrastructure is not evidence that the website or its operator is legitimate.

Closing Assessment

Prospective users should avoid login, credential, financial, or other sensitive actions and should limit engagement to passive viewing until the operator, intended service, and external reputation concerns have been independently resolved.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page made background requests to destinations TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR

- The page sent data to a destination TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

- The page exchanged network traffic with destinations TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC

Signals weighed against the site

- AbuseIPDB: 7 reports on hosting IP 13.248.243.5 (Amazon Technologies Inc., Content Delivery Network), 15% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of allsportsdigital.com.

- The request stayed on allsportsdigital.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by domaincontrol.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-08-22. [NOTED](#)
- The earliest public archive of this site is from 2004-03-30. [CLEAR](#)
- It is hosted on AMAZON-02, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about allsportsdigital.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
