

Is almadepedra.com.br a scam? TrustSniffer's high-risk assessment:
0/100

almadepedra.com.br

Verdict

0

OUT OF 100

CRITICAL RISK

almadepedra.com.br shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Marketing/landing page for Alma de Pedra IPTV offering paid subscription plans (monthly, trimestral, semestral), describing features, support and activation via WhatsApp; includes FAQs and blog links. No login form or payment flow visible in the captured content.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

ALMA DE PEDRA
IPTV

— **ENTRETENIMENTO DIGITAL**

What almadepedra.com.br served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2002.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a consumer-facing IPTV subscription landing page branded “Alma de Pedra IPTV,” presenting monthly, quarterly, and semiannual entertainment plans, customer support, FAQs, blog content, and activation through WhatsApp. Its apparent business model is to sell recurring access to online television or entertainment content through assisted subscription activation.

Scam/Impersonation Risk

The site presents a relatively conventional marketing page and the captured content showed no login form, credential-harvesting form, payment flow, or suspicious browser behavior. However, this benign page presentation is outweighed by confirmed external threat intelligence: the domain is blacklisted, multiple malicious detections were recorded, and Sophos was among the flagged vendors. The site therefore carries a material risk for sensitive interaction despite the absence of an established brand-impersonation or identity-inconsistency finding. No contradictions were observed in the page content itself beyond the confirmed external reputation signals.

EVIDENCE

- The homepage presents IPTV subscription plans with activation assisted by the support team through WhatsApp; no login or payment form was visible in the captured page.
- Archive records show the domain tracked from 2002-06-28 through 2025-04-08, covering 24 years.
- External scanning recorded 11 malicious detections out of 16 evaluated results, including a Tier-1 detection associated with Sophos; the domain was also confirmed on external blacklists.

Regulatory Verification Notes

The website's captured content does not establish a verified legal operator or regulatory status. It makes a general "authorized content" claim and states that offers are subject to availability and applicable exhibition rights, but no license authority or license number is disclosed in the available material. The independently associated identity remains unverified, while the registration record names Tiago Aparicio. A separate broker-reputation dataset produced no match; that is limited contextual information and is not evidence of licensing or authorization.

EVIDENCE

- The homepage states that content and offers are subject to availability and the relevant exhibition rights, without identifying a licensing authority or registration number.
- The current registration record lists creation date 2026-05-04, expiration date 2027-05-04, and an age of 0.3 years.
- The site's TLS certificate is issued by YE1 at Domain Validation level and is valid through 2026-10-01T20:58:44+00:00.
- The site resolves through AS47583, operated by AS-HOSTINGER, Hostinger International Limited, CY.

What to Verify Next

Before any sensitive interaction, an organization should independently identify the operating entity and confirm any applicable audiovisual, copyright, or consumer-commerce authorization with the relevant Brazilian registry or rights holder. Contact details should be validated through an independently sourced channel rather than relying solely on the website's own activation route. Payment protection, refund terms, and the lawful source of the advertised content should also be confirmed before funds or personal information are provided.

EVIDENCE

- The homepage provides plan selection and directs prospective customers to assisted activation rather than presenting a self-service transaction flow.
- The FAQ and "How it works" content are the appropriate pages for checking activation, compatibility, support, cancellation, and refund terms.
- The site's stated content-rights qualification requires independent confirmation of the specific services and channels covered.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The available evidence does not independently verify the real-world operator, and the confirmed external malicious detections and blacklist status dominate the otherwise conventional presentation and stable page behavior.

Infrastructure Integrity

The site is hosted on Hostinger infrastructure in Ukraine through AS47583, with four resolved addresses assessed as likely origin addresses and no detected CDN edge layer. The valid DV certificate provides transport encryption, but the hosting and TLS arrangements are technical safeguards only and do not offset the adverse reputation findings.

Closing Assessment

Sensitive actions, including credential submission, financial transactions, or provision of personal information, should not proceed unless the operator, authorization, contact channels, and payment protections have been independently validated.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of almadepedra.com.br.

- The request stayed on almadepedra.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-04. NOTED
- The earliest public archive of this site is from 2002-06-28. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about almadepedra.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
