

Is almatafhaj.com safe? TrustSniffer's moderate-trust assessment: 65/100

almatafhaj.com

Verdict

65

OUT OF 100

MODERATE TRUST

almatafhaj.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Website for AL-MATAF Hajj & Umrah Services offering package tiers (Premium, Hilton, Economy), visa assistance, ziyarah tours, contact info and registration form. Contains address and phone/email contact details and developer credit.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Governance Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

AL-MATAF Hajj & Umrah Services is a travel-agency website presenting tiered Hajj and Umrah pilgrimage packages, visa assistance, guided ziyarah tours, booking registration, and customer contact channels, with the apparent business model of selling pilgrimage travel services to customers.

Scam/Impersonation Risk

No phishing, malware, brand-impersonation, or other direct scam contradiction was observed. The homepage presents a coherent travel-service purpose, provides contact and registration functionality, and does not expose login forms, hidden forms, password-submission destinations, wallet-connect activity, or suspicious script behavior. Interactive page changes were observed, but the available behavioral evidence does not attribute them to credential theft, cloaking, or malicious network activity. External reputation checks found no malicious or suspicious detections, although coverage was partial; this supports a measured rather than definitive conclusion.

EVIDENCE

- The homepage identifies AL-MATAF Hajj & Umrah Services and presents Hajj and Umrah booking content, contact details, and registration forms.
- Behavioral testing completed 2 successful runs; it recorded 0 hidden forms, 0 external password forms, 0 wallet-connect runs, 0 wallet-drainer runs, and 0 suspicious inline scripts.
- Historical capture records contain 12 snapshots from 2023-03-06 through 2024-12-27, covering 2 years tracked.
- Domain registration telemetry records creation on 2025-08-19, indicating an age of approximately 1 year; the registrar is GoDaddy.com, LLC.

Regulatory Verification Notes

The site states that it is “Approved by the Government of India & Kingdom of Saudi Arabia” and is a “Cluster Member of CHGO.” Those statements are material regulatory and institutional claims, but the supplied pages do not provide a verifiable license number, registration reference, or independently confirmed regulatory record. The operator identity therefore remains unverified, and the approval statements should be treated as site-presented claims rather than proof of authorization. The business model is a conventional travel-service operation, and no separate broker-reputation match was identified.

EVIDENCE

- The homepage states approval by the Government of India and the Kingdom of Saudi Arabia and identifies cluster membership of CHGO.
- The homepage provides an address, telephone contact, registration form, and service descriptions, but no license number or registration reference is identified in the supplied content.
- Hosting telemetry identifies PUBLIC-DOMAIN-REGISTRY - PDR, US, on AS394695; the resolved country is IN.
- The site's transport encryption uses a DV certificate issued by YR1, valid through 2026-09-14.

What to Verify Next

Before a high-value booking or payment, independently confirm the claimed approvals and CHGO membership with the relevant Indian and Saudi authorities or the organization named by the site. Confirm the contracting legal entity, package inclusions, cancellation and refund terms, visa-service responsibilities, and the payment beneficiary through documentation separate from the website. Contact details should also be validated through an independent, offline route before funds or sensitive identity documents are provided.

EVIDENCE

- The homepage's government-approval and CHGO statements are the specific claims requiring independent confirmation.
- The package and registration content establishes the need to verify contractual terms, refund conditions, and the identity of the receiving payment entity.
- The site's registration and enquiry forms are the relevant interaction points for confirming what customer information and supporting documents are requested.

Summary Verdict

The website presents a **moderate-trust posture** with no observed scam or impersonation contradictions. Available evidence is consistent with an apparently legitimate service website, but the real-world operator identity and institutional claims are not independently verified; the site should not be treated as sufficient assurance for a high-value commitment on its own.

Infrastructure Integrity

The site resolves directly to a single likely origin endpoint rather than a detected CDN edge, and no CDN vendor or WAF was identified in the supplied infrastructure facts. Its hosting is provided by PUBLIC-DOMAIN-REGISTRY - PDR, US, and the valid DV TLS certificate provides baseline transport protection; these infrastructure characteristics are mitigating technical signals, not proof of business legitimacy.

Closing Assessment

Ordinary browsing and informational engagement are proportionate, while substantial payments or sensitive-document submission should follow independent confirmation of the counterparty, authorization claims, and transaction protections.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Dynamic Interaction Caution

- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%
• No on-site identity signals detected	

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of almatafhaj.com.

- The request stayed on almatafhaj.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by bigrockservers.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-19. NOTED
- The earliest public archive of this site is from 2023-03-06. CLEAR
- It is hosted on PUBLIC-DOMAIN-REGISTRY, from a server in IN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about almatafhaj.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
