Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

ALO Estudio Gráfico presents itself as a Mexican design and web-development studio providing corporate identity, website development, digital and print advertising, product photography, hosting, portfolio work, and client-contact channels.

Scam/Impersonation Risk

No contradictions were observed. The site's content is consistent with a small business-to-business creative agency, with no phishing, impersonation, malicious-content, cryptocurrency, wallet-connection, or sensitive-login indicators identified. Available external reputation checks also produced no malicious or suspicious findings, while the absence of an independently verified operator identity means the site's legitimacy remains evidence-consistent rather than proven.

EVIDENCE

- The homepage presents ALO Estudio Gráfico as a design studio and includes service, portfolio, team, and contact content.
- Homepage behavior showed no login form, hidden form, password submission, wallet interaction, clipboard manipulation, or suspicious script activity.
- Page-level analysis recorded no brand-impersonation or phishing indicators.
- Domain registration: 2022-05-20T23:15:05Z; age 4.25 years.

Regulatory Verification Notes

The presented business model concerns creative, web, photography, advertising, and hosting services rather than an inherently regulated financial activity. The supplied identity and service content does not display a licensing claim or registration number; this is a transparency point only if a proposed engagement involves a regulated activity. The site's apparent operator identity is not independently verified, although the named registrar and the site's coherent business presentation support an established-site interpretation. No matching broker-reputation record was identified, which is contextual rather than a legal or licensing determination.

EVIDENCE

- The "Nosotros" and "Servicios" pages describe a design and web-development business serving clients in Mexico.
- The "Contacto" page provides direct business-contact information for engagement.
- Registered 2022-05-20T23:15:05Z; registrar: Akky Online Solutions S.A. de C.V.; expiration 2027-05-20T23:15:05Z.
- Hosted on AS8075 (MICROSOFT-CORP-MSN-AS-BLOCK - Microsoft Corporation, US); TLS certificate issued by YR2, DV validation, valid to 2026-10-14T09:52:07+00:00.

What to Verify Next

Before a credential or payment interaction, an interested party should independently confirm the contracting entity, obtain a written scope and payment schedule, review applicable cancellation or remedial terms, and use payment methods with appropriate protection. If the proposed service falls within a regulated category, the relevant Mexican registry should be checked against the independently confirmed legal entity rather than relying solely on the website's presentation.

EVIDENCE

- The "Cómo trabajamos" and "Contacto" content provides a basis for confirming the intended commercial contact and service-delivery process.
- The portfolio should be checked for verifiable client references or independently corroborated project work.
- Any invoice, contract, or payment instruction should be reconciled with the independently confirmed business identity and the agreed service scope.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The conclusion is strong at the website-risk level, while the real-world operator’s identity remains independently unverified.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, and the observed address is an edge server rather than an exposed origin address. Microsoft Corporation provides the observed hosting infrastructure, which is a mitigating security characteristic but not proof of business legitimacy.

Closing Assessment

Normal commercial engagement is proportionate, subject to ordinary independent checks of the contracting party, service terms, and payment protections before credentials or funds are provided.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of aloestudiografico.com.

- The request stayed on aloestudiografico.com. It was not redirected to another domain. CLEAR
- Registration is published under Akky Online Solutions S.A. de C.V.. CLEAR
- DNS for this domain is served by alo-web.com, across 4 name servers. NOTED
- The registration is paid up to 2027-05-20. NOTED
- The earliest public archive of this site is from 2023-08-17. CLEAR
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aloestudiografico.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
