

Is alorong.com a scam? TrustSniffer's high-risk assessment: 5/100

alorong.com

Verdict

5

OUT OF 100

CRITICAL RISK

alorong.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Alorong appears to be a Bangladesh-focused e-commerce storefront listing many product categories, promotions and contact details. Standard login/registration and cart functionality present. No evidence of financial investment schemes, crypto wallets, or credential harvesting beyond normal account login.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://alorong.com/

What alorong.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2025.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Alorong is a Bangladesh-focused online retail storefront presenting consumer electronics, mobile accessories, home and kitchen appliances, fashion, fitness products, and related lifestyle goods, with an apparent business model based on direct product sales, promotional combinations, account registration, cart checkout, and order tracking.

Scam/Impersonation Risk

The site does not present detected brand-impersonation, hidden-form, wallet-drainer, or credential-harvesting indicators, and its visible content is consistent with ordinary e-commerce. However, this benign page profile is outweighed by confirmed blacklist status and multiple external malicious detections, creating a serious contradiction for any sensitive interaction. The homepage also exhibited suspicious network activity and substantial post-interaction page changes; these signals do not establish the mechanism or intent of the activity, but they reinforce the need for a security-forward posture. No identity contradiction or direct phishing presentation was observed.

EVIDENCE

- Domain registration record: registered 2024-12-09; approximately 1.7 years old.
- External reputation assessment: 8 malicious detections and 2 suspicious detections from 10 evaluated results, with confirmed blacklist status across two external sources.
- Homepage behavior: 5 external XHR requests, 3 external POST requests, 4 non-whitelisted XHR requests, 2 non-whitelisted POST requests, 5,439 DOM mutations, and 36 console errors across 2 successful runs.

Regulatory Verification Notes

The available pages include About, Terms and Conditions, Privacy Policy, Contact, and order-tracking functions, but the reviewed material does not establish an independently verified real-world operator. No financial or other regulatory license is claimed, and no license number or licensing authority is presented; for an ordinary retailer this is a disclosure and merchant-verification issue rather than, by itself, evidence of a scam. Registration through NAMECHEAP INC and use of a privacy service are administrative details, while the transport certificate provides encryption but only domain-level validation. The available third-party broker dataset did not match the site.

EVIDENCE

- Site navigation exposes `/about-us`, `/terms-and-conditions`, `/privacy-policy`, `/contact-us`, and `/order-track`.
- Domain registrar: NAMECHEAP INC; registration expiry: 2026-12-09T07:18:25Z.
- TLS certificate: issuer YR1, DV validation, valid to 2026-10-16T19:59:52+00:00.

What to Verify Next

Before any sensitive engagement, an independent business-record or merchant-identity check should match the operator named in the About and Terms pages to the payment recipient and order documentation. The stated return, refund, delivery, and dispute procedures should be reviewed directly, and any licensing or registration claim should be confirmed with the relevant official registry rather than relying on the site's own statements. Contact channels should be confirmed through an independent route, and any transaction should use a payment method with meaningful purchaser dispute protection.

EVIDENCE

- The site provides dedicated About, Terms and Conditions, Privacy Policy, and Contact pages for comparison against external merchant records.
- The checkout is identified as a placeholder, while login, registration, contact/feedback, and cart-related functions are present.
- The homepage has no structured business metadata or populated meta description, limiting automated corroboration of the merchant profile.

Summary Verdict

The overall posture is **critical trust risk**, with the available evidence unsuitable for treating the website as dependable for sensitive interaction. Its ordinary retail presentation does not resolve the externally corroborated reputation contradiction or the unresolved operator identity.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, which is a mitigating control for direct exposure and traffic handling but is not evidence of legitimacy. Observed infrastructure includes CDN edge servers and a potential origin candidate; the protective layer therefore reduces some network-exposure risk without offsetting the reputation findings.

EVIDENCE

- Hosted on AS16276 (OVH - OVH SAS, FR).
- Observed edge IPs include 15.235.181.69 and 2402:1f00:8001:1a45::a, both associated with AS16276.
- Infrastructure resolution status: resolved; 3 unique IPs observed, including 2 edge IPs and 1 likely origin candidate.

Closing Assessment

Sensitive actions should not proceed unless independent operator, merchant, and payment-protection checks produce satisfactory results; interaction should remain limited to non-sensitive viewing in the interim.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page replaced a large part of its own content after loading.
Behaviour in a sandbox rule:BEHAV_DOM_CHANGE_HIGH
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alorong.com.

- The request stayed on alorong.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by hostingbangladesh.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-09. NOTED
- The earliest public archive of this site is from 2025-02-21. CLEAR
- It is hosted on OVH, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alorong.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
