## Key findings

---

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2006.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

## Full analysis

---

### Overview

The website is a standard 123 Reg domain-parking page for alphapay.co.uk, presenting the domain as available for acquisition while promoting website-building and hosting services and displaying related-search advertising.

### Scam/Impersonation Risk

No identity contradictions, phishing activity, brand impersonation, or confirmed malicious reputation signals were observed. The page openly identifies itself as a 123 Reg parking page, contains no login or sensitive-data forms, and shows no deceptive redirects, cloaking, wallet interaction, or executable abuse behavior. Its long historical footprint and lack of suspicious repurposing further support the conclusion that it is a legitimate parked domain rather than an active impersonation operation.

- The landing page states that alphapay.co.uk is parked by 123 Reg and offers a “Get This Domain” acquisition route.
- The page contains no forms, password fields, hidden forms, wallet connections, clipboard manipulation, or cloaking behavior.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing or confirmed malicious-site finding.
- Historical records contain 22 archive snapshots spanning 2006–2025, covering 20 years, with no semantic drift or suspicious repurposing detected.

### Regulatory Verification Notes

The website does not present itself as a payment provider, financial institution, broker, or operating commercial service; it functions solely as a domain-parking and acquisition page. Consequently, financial licensing disclosures are not expected for the current use. The page identifies 123 Reg Ltd in its copyright notice and provides a privacy policy and an express disclaimer that references to third parties do not imply association or endorsement. The domain also has an established registration record, mainstream registrar, valid transport encryption, and a recognized global traffic footprint.

- The current WHOIS record shows registration on 23 September 2017, approximately 8.87 years old, through 123-Reg Limited, with expiry on 23 September 2027.
- The landing page identifies 123 Reg Ltd, links to its privacy policy, and disclaims control over or endorsement of third-party advertisers.
- The hosting infrastructure is served from AS16509 (Amazon.com, Inc., US).
- The site uses a DV TLS certificate issued by GoDaddy TLS Intermediate CA DV – R1v1, valid until 15 October 2026.

What to Verify Next

Any prospective acquisition should confirm domain-title transfer terms, total purchase and renewal costs, and the identity of the contracting seller or intermediary through the official registrar workflow. Any future service appearing under the domain should be assessed separately because the present findings apply to the current parked page, not to content that may follow a transfer or redevelopment.

- The current page offers domain acquisition but does not provide an operating product, customer account facility, or transaction service.
- The observed page has no internal navigation and is limited to registrar promotion, related-search topics, privacy information, and the acquisition call to action.

Summary Verdict

The website is a legitimate, established, and trustworthy domain-parking page with no observed contradictions or active abuse indicators. Its identity, historical provenance, technical controls, and clean external reputation converge consistently with its stated purpose. Normal interaction and standard use are appropriate.

Infrastructure Integrity

The site is hosted on Amazon infrastructure behind a CDN/WAF arrangement, with both observed addresses operating as edge servers and no origin candidate exposed during analysis. This reduces direct origin exposure and supports operational resilience, although protective infrastructure is a mitigating security control rather than independent proof of legitimacy.

Closing Assessment

Normal browsing and standard interaction are appropriate; a prospective domain purchaser should apply customary contractual, payment, and transfer due diligence before completing an acquisition.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alphapay.co.uk.

- The request stayed on alphapay.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under 123-Reg Limited t/a 123-reg [Tag = 123-REG]. CLEAR

- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-23. NOTED
- The earliest public archive of this site is from 2006-01-29. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alphapay.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
