

Is alphashieldearn.com a scam? TrustSniffer's high-risk assessment:
0/100

alphashieldearn.com

Verdict

0

OUT OF 100

CRITICAL RISK

alphashieldearn.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-10-01 by automated analysis. Classification confidence 55%.

What this site appears to be

Promotional CFD/broker landing page claiming regulated global operation and offering trading across multiple asset classes plus high-return investment plans. Contains prominent deposit/plan CTAs with extremely large percentage return claims and standard marketing copy; lacks verifiable regulation/audit details and shows structural indicators of high economic risk.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What alphashieldearn.com served when TrustSniffer captured it on 2026-10-01. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a promotional online CFD and investment platform presenting access to global financial markets, account creation, trading services, and deposit-based investment plans intended to attract retail clients.

Scam/Impersonation Risk

The site presents a materially unsafe profile for sensitive interaction. Its homepage promotes trading in forex, cryptocurrencies, commodities, indices, shares, and ETFs, alongside copy trading and automated trading, while the investment flow requires deposits before service and advertises guaranteed or exceptionally high returns without corresponding evidence. The page also contains login, signup, and deposit or investment-selection forms, including a sensitive form routed to an untrusted destination. External reputation checks record malicious and suspicious detections, and the domain is confirmed as blacklisted by two external sources. These findings constitute a decisive contradiction to the site's financial-services presentation. No conflicting legal-entity names

or confirmed brand impersonation were observed, but the absence of those specific contradictions does not offset the blacklist and malicious-detection evidence.

EVIDENCE

- Homepage: promotes CFD trading across forex, cryptocurrencies, commodities, indices, shares, and ETFs, with copy-trading and automated-trading functions.
- Investment-plan and deposit flow: presents guaranteed-return and aggressive high-yield claims while requiring funds before the underlying service is provided.
- Site forms: three forms were identified, including login, signup, and deposit or investment selection; the sensitive form analysis identified an untrusted destination.
- Domain registration record: registered 2026-04-01 and approximately 0.5 years old.

Regulatory Verification Notes

The site includes a “Legal & Regulation” navigation item and presents itself as a regulated global operation, but the available material does not provide verifiable licensing details, a license number, or auditable regulatory evidence. Its apparent operator identity is not independently verified. The site's use of cryptocurrency-related payment mechanisms and the absence of substantiated regulatory or audit information are especially significant given the financial-deposit model. A valid transport certificate confirms encrypted communication, not authorization to provide brokerage or investment services.

EVIDENCE

- Legal and regulation content: claims regulated operation but supplies no verified regulator, license number, or audit detail.
- Hosting telemetry: served from AS216395, operated by hostbet - HostBet Cloud Technologies Private Limited, IN; registered through Atak Domain.
- Transport security: TLS certificate issued by YR1 at DV validation level, valid to 2026-10-30.

What to Verify Next

Before any interaction involving credentials, deposits, wallet transfers, or financial information, an institution should confirm the claimed operator and authorization directly with the relevant financial-services regulator using an independently sourced registry. The legal entity, withdrawal terms, custody arrangements, payment beneficiary, and dispute-resolution process should be validated through independently obtained contact channels rather than details supplied solely by the website. The site's published social presence should not be treated as proof of authorization.

EVIDENCE

- Legal and regulation page: use its claimed entity and regulator references as inputs for an independent registry search, not as confirmation.
- Contact and account-creation paths: independently validate the operator and payment beneficiary before considering any account or funding action.
- Deposit and investment-selection flow: require documented withdrawal, custody, and dispute procedures before evaluating the commercial proposition.

Summary Verdict

The website has a **critical trust posture** and is unsuitable for login, credential submission, deposits, wallet transfers, or other financial interaction. Its apparent investment-broker model is contradicted by confirmed external malicious and blacklist findings, compounded by unsupported return claims and an untrusted sensitive-action flow.

Infrastructure Integrity

The site resolves to a single likely origin without a detected CDN or WAF layer. This provides limited intermediary protection, and the hosting infrastructure itself should be treated only as a technical delivery mechanism rather than evidence of legitimacy.

Closing Assessment

The appropriate institutional action is to block sensitive interaction with the site, preserve any related communications or payment instructions, and escalate suspected exposure through established financial-crime, fraud-response, and credential-protection procedures.

Written analysis generated 2026-10-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

3 findings contributed to this verdict, raised by external reputation, page content, several checks together.

01 External reputation

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

02 Page content

- A form on the page submits to a destination TrustSniffer could not verify.

Page content rule:PAGE_FORM_UNTRUSTED_DEST

- The review of the page content rated it high risk.

Page content rule:PAGE_RISK_HIGH

- The page shows few of the signs expected from a trustworthy operator.

Page content rule:PAGE_TRUST_QUALITY_LOW

- The page content shows three or more warning signs that deceptive sites commonly use.

Page content rule:PAGE_RED_FLAGS_STRONG

03 Several checks together

- Several independent checks pointed to risk at the same time.

Several checks together rule:HYB_MULTIPLE_MODULES_HIGH_RISK

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alphashieldearn.com.

- The request stayed on alphashieldearn.com. It was not redirected to another domain. CLEAR
- Registration is published under Atak Domain. CLEAR
- DNS for this domain is served by tela-host.com, across 5 name servers. NOTED
- The registration is paid up to 2027-04-01. NOTED
- It is hosted on hostbet, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alphashieldearn.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
