

Is alreaaiaa.com safe? TrustSniffer's low-trust assessment: 25/100

alreaaiaa.com

Verdict

25

OUT OF 100

LOW TRUST

alreaaiaa.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Arabic-language healthcare membership site offering a paid annual subscription (~171 SAR) for discounts, cashback and redeemable vouchers across listed medical providers. Contact numbers, partner organizations and a tax number are shown.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What alreaaiaa.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This Arabic-language healthcare membership website presents an annual paid subscription that offers visitors discounted medical services, cashback, and redeemable vouchers through listed clinics, laboratories, and hospitals, with account access and subscription enrolment available online.

Scam/Impersonation Risk

The site presents a coherent healthcare-membership proposition and the reviewed page content contains no stated brand-impersonation, phishing, or identity-conflict indicators. However, external reputation evidence records a confirmed blacklist condition, including multiple malicious and suspicious detections. This is a material contradiction that outweighs the otherwise conventional presentation of the service and supports a clearly cautionary posture for credentials, payments, and other sensitive interactions.

EVIDENCE

- External reputation assessment recorded 3 malicious and 2 suspicious detections, with the domain also recorded as blacklisted.
- The homepage and subscription content show an identifiable healthcare-discount business model without page-level red flags or detected brand impersonation.
- The domain registration record lists creation on 2015-01-10 and an age of 11.61 years; the registrar is NAMECHEAP INC.

Regulatory Verification Notes

The visible site content identifies contact numbers, partner healthcare organisations, and a tax number, but the available material does not establish an independently verified operating entity or disclose a licensing authority and license number. For a healthcare-related service collecting subscription payments, that is a substantive verification gap rather than proof of wrongdoing. The business model is commercially understandable, but the external reputation contradiction means the on-page claims should not be treated as sufficient evidence of authorization or operational legitimacy.

EVIDENCE

- The homepage and partner-list content display named clinics, laboratories, hospitals, healthcare offers, and contact numbers.
- The reviewed site content shows a tax number but no stated licensing authority or license number.
- Independent identity verification is unresolved in the available evidence; no matched broker-reputation record was identified.

What to Verify Next

Before any sensitive interaction, an independent party should confirm the operator's legal identity and healthcare-related authorization through the relevant Saudi registry or regulator, confirm directly with several named partner providers that the offers are genuine, and review the subscription, cancellation, refund, and payment-protection terms. Contact details should be validated through independently sourced channels rather than relying solely on the website.

EVIDENCE

- The subscription flow should be checked for the legal seller name, payment recipient, refund terms, and cancellation process.
- The partner-list pages provide specific organisations whose participation can be confirmed independently.
- The site's displayed tax information and operating identity should be matched against official records before payment or account creation.

Summary Verdict

The overall posture is **low trust**, with elevated risk for sensitive interaction. Apparent business coherence and normal page behaviour do not overcome the confirmed external reputation contradiction, while the real-world

operator remains unverified.

Infrastructure Integrity

The website is protected by Cloudflare CDN and WAF services, and the observed addresses are CDN edge infrastructure rather than an independently exposed origin. This provides a meaningful defensive layer against direct infrastructure exposure, but it is only a mitigating technical characteristic and does not establish site legitimacy.

EVIDENCE

- Served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US); observed edge IP count: 4, likely origin IP count: 0.
- TLS certificate issued by WE1 with DV validation, valid to 2026-10-10.

Closing Assessment

Sensitive actions should be deferred until the operator, partner relationships, authorization, and payment protections have been independently confirmed through trusted channels.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alreaaiaa.com.

- The request stayed on alreaaiaa.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-10. NOTED
- The earliest public archive of this site is from 2016-01-21. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alreaaiaa.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
