

Is alsafwa.edu.eg legit? TrustSniffer's high-trust assessment: 100/100

alsafwa.edu.eg

Verdict

100

OUT OF 100

HIGH TRUST

alsafwa.edu.eg appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Website of AlSafwa Higher Institute of Engineering (Egypt). Arabic content describing institute news, academic programs, admissions, contact details, and student services. Contact email and phone numbers are published; social links referenced.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the website of AlSafwa Higher Institute of Engineering in Egypt, presenting institutional news, engineering programs, admissions information, student services, and contact details for an apparent private higher-education provider whose business model involves tuition and related academic services.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence. The homepage presents a coherent institutional purpose, including engineering departments, student activities, graduation events, admissions material, and academic guidance, with no detected phishing indicators, login form, hidden sensitive form, wallet interaction, or deceptive browser behavior. External reputation checks recorded no malicious or suspicious detection, and no brand-impersonation signal was identified. The site's historical continuity is also consistent with an established institutional presence rather than a recently repurposed domain.

EVIDENCE

- Domain registration continuity recorded from 2015; age 10.77 years.
- 52 archive snapshots spanning 2015–2025, covering 11 years.
- The homepage is classified as an institutional/educational page and contains approximately 21,030 characters of substantive Arabic content, including academic departments, admissions, student services, and institute news.
- Behavioral observation of the homepage found no login form, hidden form, password submission to an external destination, wallet activity, cloaking, or suspicious inline scripts.

Regulatory Verification Notes

The homepage identifies the institution and supplies a detailed academic structure, admissions rules, institutional leadership references, quality-related material, and links to several social platforms. This supports an evidence-consistent view of an apparently legitimate educational website, but the real-world operator is not independently verified by the supplied evidence. The available site material does not present a license or registration number, so institutional authorization and the legal entity responsible for tuition collection remain matters for independent confirmation rather than findings of misconduct. Transport security is present through a domain-validated certificate, while the hosting environment is attributable to Network Solutions Hosting.

EVIDENCE

- The homepage title identifies “وزارة التعليم العالي – معهد الصفوة العالي للهندسة” and lists architecture, civil, electronics and communications, and computer-engineering departments.
- Served from AS19871 (NETWORK-SOLUTIONS-HOSTING – Network Solutions, LLC, US).
- TLS certificate issued by YR2 with DV validation, valid to 2026-09-27 04:39:11 UTC.
- The homepage links to Facebook, Instagram, YouTube, WhatsApp, and Twitter social-presence channels.

What to Verify Next

Before credential or tuition-related payment interactions, an institution or payment provider should independently confirm the institute's legal identity through an official education-authority or institutional registry, validate that the published admissions and fee information is current, and confirm refund and payment-protection terms through an independently obtained contact route. Contact channels should also be cross-checked against an official directory or offline institutional record rather than relying solely on the website.

EVIDENCE

- The admissions and transfer material is presented through the institute's academic navigation and should be reconciled with current official institutional records.
- The homepage provides published contact details and student-service references that can be compared with independently sourced institutional contact information.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate educational website. The site’s institutional content, historical continuity, technical stability, and absence of contradictory signals support normal informational use, while operator identity remains likely rather than independently proven.

Infrastructure Integrity

The observed infrastructure resolves through a direct hosting arrangement with one resolved IP, with no CDN or WAF vendor detected and no separate edge or origin candidates identified. This network posture provides only ordinary hosting-level mitigation and should be treated as a supporting technical condition, not as proof of institutional legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; before submitting credentials or making tuition payments, independent checks of the institution, applicable transaction terms, and payment protections should be completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Identity verified on page
- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alsafwa.edu.eg.

- The request stayed on alsafwa.edu.eg. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2015-11-12. CLEAR
- It is hosted on NETWORK-SOLUTIONS-HOSTING, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alsafwa.edu.eg at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
