

Is alsalam-center.com a scam? TrustSniffer's high-risk assessment: 0/100

alsalam-center.com

Verdict

0

OUT OF 100

CRITICAL RISK

alsalam-center.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Arabic-language website for 'مركز السلام' (Al-Salam Center), an addiction treatment and rehabilitation center in Cairo/New Cairo. The site describes services for detox and rehabilitation across various substances, stages of relapse, program goals, contact phone numbers, an email address, and a local address. No forms, payment flows, or investment claims are present.

Evidence status and limitations

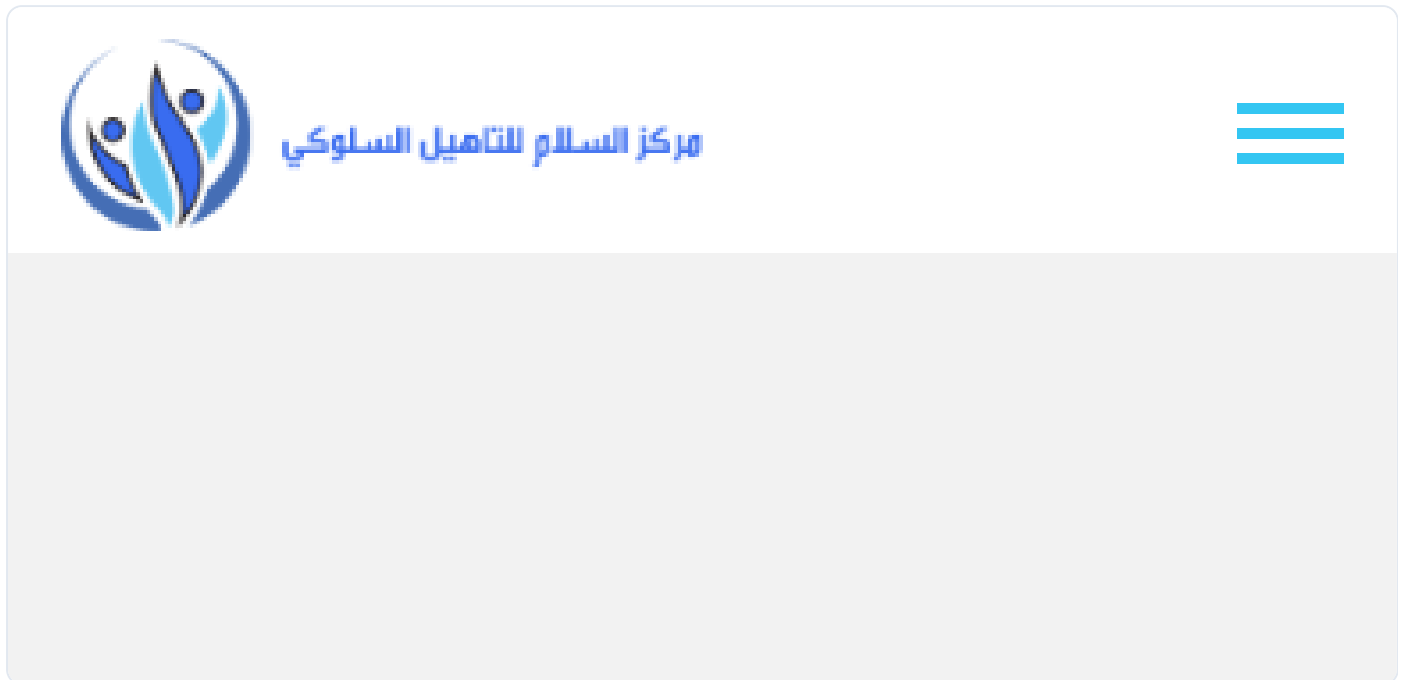

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What alsalam-center.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is an Arabic-language presentation for “مركز السلام” (Al-Salam Center), an apparent addiction-treatment and rehabilitation provider serving Cairo/New Cairo. It presents detoxification, residential rehabilitation, therapy, relapse-prevention information, treatment for several substances, and direct telephone and email contact for prospective patients.

Scam/Impersonation Risk

The principal risk is not generated by the site's visible business model or browser behavior: the pages present a healthcare service, contain no login, payment, investment, or wallet-connect flow, and show no page-level phishing or brand-impersonation indicators. However, the domain is **blacklisted** in the supplied external reputation evidence, with multiple malicious detections and a confirmed blacklist condition. That external signal

directly conflicts with the otherwise ordinary healthcare presentation and is sufficient to make sensitive interaction inappropriate until the site's status is independently resolved. The historical record indicates continuity of the domain over a substantial period, but historical continuity does not negate the current reputation contradiction.

EVIDENCE

- The homepage describes addiction-treatment services and direct patient intake, while the behavioral review recorded no external posts, no hidden forms, no credential forms, and no wallet activity.
- External reputation checks recorded 14 malicious detections and 1 suspicious detection, with a confirmed blacklist result.
- Historical records identify the domain as first seen on 2013-09-10 and last seen on 2025-07-11, across 13 years tracked.

Regulatory Verification Notes

The site's healthcare claims and treatment descriptions are substantive, but the available pages do not state a licensing authority or license number. The homepage also claims that the center has treated many local and regional cases with success rates of up to 90%; this is a material medical-performance claim that requires independent confirmation rather than acceptance as proof of clinical standing. The operator's real-world identity is not independently verified in the available evidence. A third-party broker dataset produced no match, which neither validates the center nor resolves the external reputation concern.

EVIDENCE

- The homepage identifies “مركز السلام” and presents treatment categories including detoxification, rehabilitation, group therapy, psychodrama, and family therapy.
- The homepage claims treatment success rates of up to 90% but does not provide a licensing authority or license number.
- The domain was registered on 2021-05-26 and is approximately 5.24 years old; the recorded registrar is Launchpad.com Inc.
- The site's hosting resolves to AS47583 (AS-HOSTINGER - Hostinger International Limited, CY); its TLS certificate is issued by YE1, uses DV validation, and is valid to 2026-09-22.

What to Verify Next

Before any sensitive engagement, an independent party should confirm that the treatment center is authorized by the relevant Egyptian healthcare or rehabilitation regulator and that the authorization corresponds to the named facility and physical location. The published telephone numbers and address should be validated through an offline or independently sourced channel, and the claimed treatment outcomes should be supported by verifiable clinical or institutional documentation. Until those checks and the blacklist discrepancy are resolved, browsing should remain informational rather than involving personal, medical, credential, or payment data.

EVIDENCE

- The homepage supplies telephone contact details and a local Cairo/New Cairo location for intake.
- The site's visible content provides treatment and outcome claims but no independently verifiable licensing reference.
- The available page analysis found no sensitive submission form or payment flow through which to validate the center's operational identity.

Summary Verdict

The overall posture is **critical trust risk**. The healthcare-oriented content is coherent and technically functional, but the confirmed blacklist and malicious reputation evidence outweigh the site's benign presentation for trust decisions involving sensitive interaction. The operator's identity remains unverified, so legitimacy cannot be treated as established.

Infrastructure Integrity

The site is hosted directly through Hostinger infrastructure, with no CDN or WAF detected and no separate origin-candidate exposure identified in the supplied resolution data. The presence of valid transport encryption protects the connection in transit, but it does not establish the legitimacy of the operator or offset the domain-level reputation concern.

Closing Assessment

Prospective users should defer credentials, personal or medical disclosures, and payments until regulatory authorization, facility identity, contact channels, and the external reputation contradiction have been independently confirmed.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alsalam-center.com.

- The request stayed on alsalam-center.com. It was not redirected to another domain. CLEAR
- Registration is published under Launchpad.com Inc.. CLEAR
- DNS for this domain is served by hostgator.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-26. NOTED
- The earliest public archive of this site is from 2013-09-10. CLEAR
- It is hosted on AS-HOSTINGER, from a server in LT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alsalam-center.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
