

Is alsatary.net legit? TrustSniffer's high-trust assessment: 90/100

alsatary.net

Verdict

90

OUT OF 100

HIGH TRUST

alsatary.net appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 70%.

What this site appears to be

مؤسسة محلية لصيانة وتركيب مكيفات الهواء تقدم خدمات منزلية وتجارية، معلومات اتصال واضحة (هاتف، إيميل)، وصف للخدمات، وروابط إلى المتجر والمقالات

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What alsatary.net served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an apparently local HVAC services business offering residential and commercial air-conditioning installation, maintenance, and repair, supported by service-request functionality, an online shop for parts or accessories, articles, and direct contact channels.

Scam/Impersonation Risk

No contradictions were observed across the available evidence: there is no indication of phishing, brand impersonation, conflicting legal identities, or confirmed blacklist activity. The homepage presents a coherent local-services model, describes air-conditioning work in substantive terms, and provides a physical location, telephone contact, and social-media links. Site behavior also showed no login form, hidden sensitive form, wallet connection, clipboard activity, suspicious script, or external network posting, which is consistent with a conventional service-business website rather than an abuse-oriented interaction surface.

EVIDENCE

- The homepage describes residential and commercial air-conditioning maintenance and repair and identifies the business as “مؤسسة السطري لانظمة التكييف والتبريد.”
- Historical registration continuity shows the domain was registered in 2008 and is approximately 18.21 years old.
- The archive contains 315 snapshots spanning 2008–2026, covering 19 tracked years, with no detected suspicious repurposing or semantic drift.

Regulatory Verification Notes

The available content supports an apparently legitimate local HVAC operator, but it does not independently establish the real-world operator’s legal identity or any regulated status. The about and homepage content describes more than 20 years of service experience, while the contact information identifies an Amman, Jordan location and supplies direct business channels. No license, registration number, or licensing authority is claimed in the supplied pages; for this type of service business, that is a disclosure and verification point rather than evidence of a scam. The available broker-context check produced no match, but that signal is reputational context only and is not a licensing determination.

EVIDENCE

- The homepage and about content describe HVAC installation, maintenance, repair, and project-establishment services and claim a team with more than 20 years of experience.
- The contact content identifies an office in Amman–Sweilih, on Princess Haya Street, and provides telephone and email contact details.
- The site includes an about page, services, frequently asked questions, articles, shop, contact, and privacy-policy links, but the supplied content contains no license or registration number.
- Transport security is provided through a valid DV TLS certificate issued by YR1, expiring on 2026-09-30.

What to Verify Next

Before a credential or payment interaction, an organization should independently confirm the business identity and applicable local commercial or service licensing through the relevant registry. For purchases or paid service requests, the purchaser should review the shop’s terms, returns or cancellation provisions, warranty coverage, and payment-protection options, and confirm the official contact channels through an independent route before committing funds.

EVIDENCE

- The homepage links to the shop and service-request functionality, indicating that both product purchases and paid service engagements may occur.
- The site provides a privacy-policy link, but the supplied evidence does not include detailed purchase, refund, cancellation, or warranty terms.
- The contact page and homepage provide direct business channels that can be compared with independently sourced business information.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. The site's coherent business content, sustained domain history, clean contradiction assessment, and stable technical operation support ordinary use, while the operator's real-world identity remains likely rather than independently verified.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, and the observed edge infrastructure is hosted by OVH in France; the origin server was not observable in this analysis. This reduces direct origin exposure and is a mitigating infrastructure characteristic, but it is not proof of business legitimacy.

EVIDENCE

- Served from AS16276 (OVH - OVH SAS, FR), with the observed edge IP 51.210.208.118.
- TLS certificate issuer: YR1; validation level: DV; valid to 2026-09-30T11:08:42+00:00.
- The infrastructure record identifies one CDN edge IP and zero likely origin-IP candidates.

Closing Assessment

Normal browsing and routine service engagement are proportionate to the assessed posture, subject to ordinary independent checks of merchant identity, transaction terms, and payment protection before credentials or funds are committed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alsatary.net.

- The request stayed on alsatary.net. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by mezathost.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-09. NOTED
- The earliest public archive of this site is from 2008-07-26. CLEAR

- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alsatary.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
