

Is alsheikhhospital.com a scam? TrustSniffer's high-risk assessment:
0/100

alsheikhhospital.com

Verdict

0

OUT OF 100

CRITICAL RISK

alsheikhhospital.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Site for Al-Sheikh Jinnah Memorial (Welfare) Teaching Hospital in Sialkot: nonprofit hospital details, departments, facilities, contact phone and email, and references to welfare/donation activities. No obvious financial product solicitations or credential-harvesting elements on the captured page.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What alsheikhhospital.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents itself as the online presence of Al-Sheikh Jinnah Memorial (Welfare) Teaching Hospital in Sialkot, describing a nonprofit teaching hospital that provides clinical departments, inpatient and outpatient care, emergency and diagnostic facilities, welfare support, subsidized or free services, and donation-related activities.

Scam/Impersonation Risk

The site's public content is consistent with an informational healthcare and nonprofit profile: it lists hospital departments, facilities, welfare activities, contact details, and links to Facebook, LinkedIn, and Instagram, with no captured login form, credential-collection mechanism, financial product solicitation, or apparent brand-impersonation indicator. That benign presentation does not resolve the decisive external threat evidence. The domain is confirmed as blacklisted, with malicious detections from multiple security providers and an active protective decision associated with those detections. The result is a **critical risk for sensitive interaction**, even though the captured page itself does not display obvious phishing mechanics. No identity contradiction was

observed between distinct legal-entity names, and the available identity linkage remains likely rather than independently verified.

EVIDENCE

- The homepage identifies Al-Sheikh Jinnah Memorial (Welfare) Teaching Hospital and describes clinical, emergency, diagnostic, welfare, and donation activities.
- The captured homepage contained no login form, hidden sensitive form, password-external form, wallet connection, or credential-harvesting element.
- External reputation telemetry recorded 14 malicious detections and 1 suspicious detection across 20 evaluated results; the domain was also recorded as blacklisted.
- Historical records show 46 archive snapshots spanning 2015–2026, covering 12 tracked years.

Regulatory Verification Notes

The site describes a hospital associated with the Anjuman-e-Sheikhan NGO and presents an “Accreditations” section, a board of directors, doctors, services, and welfare support. However, the supplied page evidence does not provide a named licensing authority, registration number, or independently verified regulatory status; this is a verification gap rather than, by itself, proof of fraud. The available third-party broker dataset contains no match, but that result is only contextual and does not establish legal status. The website’s valid transport encryption and identifiable hosting provide technical continuity, not evidence that the stated healthcare organization or donation activity has been independently validated.

EVIDENCE

- The homepage and navigation identify “About,” “Board of Directors,” “Accreditations,” “Our Doctors,” “Contact,” and “Donate and Support” sections, but no license authority or license number is supplied in the captured material.
- The domain was registered on 2024-05-15 and is recorded as approximately 2.27 years old, with expiration on 2027-05-15.
- Hosting resolved to AS47583, AS-HOSTINGER – Hostinger International Limited, CY; the associated country was recorded as UA.
- TLS uses issuer YE1 with DV validation and is valid to 2026-10-15.

What to Verify Next

Before any sensitive interaction, an organization should independently confirm that the hospital exists at the stated location, that the named NGO and hospital relationship is genuine, and that any accreditation or charitable-donation authority can be confirmed through official institutional or governmental channels. Any donation route should be validated through an independently obtained telephone number or offline institutional contact, with payment protections and recipient-account ownership checked before funds are sent. The site’s official support and contact channels should also be confirmed through an independent route rather than relying solely on the webpage.

EVIDENCE

- The site's About, Board of Directors, Accreditations, and Contact sections provide the specific institutional claims requiring independent confirmation.
- The site describes donations, welfare support, Zakat support, free camps, and subsidized or free medical services as part of its operating model.
- The captured page showed no sensitive form, so verification should focus on any external payment or communication destination reached after leaving the public site.
- The site links to Facebook, LinkedIn, and Instagram, which may provide additional channels for cross-checking institutional continuity.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The website's healthcare presentation is internally coherent, but confirmed external threat and blacklist signals materially outweigh the benign characteristics of the captured content. The real-world operator is only likely linked to the stated identity, not independently verified.

Infrastructure Integrity

The site has no detected CDN or WAF, and five addresses were assessed as likely origin addresses rather than protected edge addresses. This reduces the mitigating value of protective infrastructure and leaves the service directly exposed at the observed hosting layer; infrastructure characteristics do not establish legitimacy.

Closing Assessment

The site should be treated as read-only informational content unless its institutional identity, regulatory standing, contact channels, and any payment destination have been independently validated; login, credential submission, donations, and other sensitive actions should not proceed on the basis of the website alone.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alsheikhhospital.com.

- The request stayed on alsheikhhospital.com. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-15. NOTED
- The earliest public archive of this site is from 2015-04-05. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alsheikhhospital.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
