

Is alternativaletRASenumeros.com.br a scam? TrustSniffer's high-risk assessment: 0/100

alternativaletRASenumeros.com.br

Verdict

0

OUT OF 100

CRITICAL RISK

alternativaletRASenumeros.com.br shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

A basic web server directory index (Index of /) listing files and a cgi-bin entry. No forms, no social links, and no clear commercial or financial activity.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What alternativalettrasenumeros.com.br served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a basic web-server directory index displaying an “Index of /” file listing and a `cgi-bin/` entry, with no visible commercial offering, financial service, user account area, or clear business purpose.

Scam/Impersonation Risk

The site presents no visible brand, login form, payment workflow, or commercial content, and the captured behavior showed no external requests or suspicious interaction. However, this benign and extremely limited page presentation does not offset the materially adverse external evidence: the domain is recorded as blacklisted by multiple external sources, with malicious detections substantially exceeding the threshold for a serious reputation concern. No distinct legal-entity conflict or direct brand-impersonation finding was observed, but the confirmed blacklist status and malicious detections support treating sensitive interaction as unsafe.

EVIDENCE

- Homepage: displays only an “Index of /” directory listing with a `cgi-bin/` entry; no forms or financial functionality were present.
- External reputation assessment: recorded 12 malicious detections and 1 suspicious detection from 18 effective detections; a Tier-1 security vendor also flagged the domain.
- External reputation assessment: confirmed blacklist status was recorded across two external blacklist sources.

Regulatory Verification Notes

The available page does not provide a substantive legal, corporate, licensing, or service disclosure. The registration record names “RAAZIZ Digital - Tecnologia e Inovação LTDA,” but the available evidence does not independently verify that entity as the operator of the website. No license, licensing authority, or license number is claimed, and the absence of a discernible business model makes the regulatory status of any prospective service unclear. A separate broker-reputation dataset produced no match; this is contextual only and does not establish legitimacy or regulatory standing.

EVIDENCE

- Registration record: created 2020-05-26 and recorded as approximately 6.24 years old, with expiration on 2027-05-26.
- Historical web records: coverage is recorded from 2021-11-26 through 2024-08-30, spanning 4 tracked years.
- Hosting and transport telemetry: served on AS46475, Limestone Networks, Inc., US; TLS was issued by YR1 at DV validation level and is valid to 2026-09-28.
- Homepage: contains only a directory index and no identifiable legal, licensing, terms, privacy, or corporate disclosure.

What to Verify Next

Before any sensitive interaction, independently establish the operator's legal identity and confirm that any proposed financial or regulated activity is authorized by the relevant jurisdictional registry. The registration name should be matched through an authoritative corporate source rather than accepted as proof of control. Official support and contact channels should be confirmed through an independent route, and no credentials, financial information, software, or files should be submitted or downloaded from the directory until those checks are complete.

EVIDENCE

- Homepage: provides no substantive service description against which an operator, license, or regulatory permission can be matched.
- Registration record: supplies a named entity but does not independently demonstrate that the entity controls or operates the website.
- Captured interaction: showed no login or payment form, so the absence of such controls should not be interpreted as evidence of safety for other undiscovered paths or files.

Summary Verdict

The website has a **critical trust posture** for sensitive interaction. The decisive concern is the convergence of confirmed blacklist status and significant malicious-detection evidence, while the site itself provides too little substance to establish a legitimate operating purpose or verified identity.

Infrastructure Integrity

The domain resolves directly to a single likely origin on Limestone Networks infrastructure, with no detected CDN or WAF layer. This offers limited architectural separation between the public service and its origin and should be regarded as a risk-context factor, not as proof of malicious operation or legitimacy.

EVIDENCE

- Hosting infrastructure: one resolved IP was identified, with one likely origin IP and zero detected edge IPs or CDN vendors.
- Network telemetry: the hosting environment is associated with AS46475, Limestone Networks, Inc., in the United States.

Closing Assessment

The appropriate institutional posture is to suspend credential, payment, download, and other sensitive interactions until independent identity, authorization, and channel-validation checks produce affirmative results.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

Analysis engine signal:direct_threat

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [alternativaletrasenumeros.com.br](#).

- The request stayed on [alternativaletrasenumeros.com.br](#). It was not redirected to another domain. CLEAR
- DNS for this domain is served by [com.br](#), across 2 name servers. NOTED
- The registration is paid up to 2027-05-26. NOTED
- The earliest public archive of this site is from 2021-11-26. CLEAR
- It is hosted on LIMESTONENETWORKS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [alternativaletrasenumeros.com.br](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
