

Is alyansblok.ru safe? TrustSniffer's moderate-trust assessment: 70/100

alyansblok.ru

Verdict

70

OUT OF 100

MODERATE TRUST

alyansblok.ru is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Not Scam

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Russian-language site for a Krasnoyarsk-based manufacturer selling vibropressed concrete blocks (ГОСТ 6133-99). Provides product details, certification claim, contact phone and a contact form for orders.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Russian-language local manufacturer and seller of vibropressed concrete construction blocks in Krasnoyarsk. It presents product specifications, manufacturing information, a claimed ГОСТ 6133-99 conformity certification, delivery and payment information, a telephone number, and a contact form intended for customer orders.

Scam/Impersonation Risk

No contradictions were observed: there are no confirmed phishing, impersonation, blacklist, or malicious-reputation indicators in the supplied evidence. The homepage presents a coherent small-business model, identifies the product category and location, and provides ordinary commercial contact and ordering mechanisms rather than login, wallet, or investment functionality. Dynamic testing did identify unusual external network activity and repeated console errors, but the observed behavior did not include hidden forms, credential collection, cloaking, wallet interaction, clipboard manipulation, or a sensitive-data submission flow; these technical irregularities therefore support operational caution rather than a scam conclusion.

EVIDENCE

- Homepage: Describes production of vibropressed construction blocks using concrete materials and steam curing, with Krasnoyarsk location and telephone contact.
- Homepage behavior: 4 external XHR requests and 3 external POST requests were observed, with 30 console errors across 2 successful runs; no hidden forms, password-external forms, wallet-provider activity, or cloaking was detected.
- Domain provenance: Registered 2017-04-11 and currently approximately 9.37 years old; 57 archive snapshots are recorded from 2017 through 2026.

Regulatory Verification Notes

The available evidence is consistent with an ordinary local construction-materials business, but the real-world operator identity is not independently verified. The site makes a conformity claim referencing ГОСТ 6133-99, yet the supplied material does not establish the identity of the certificate holder or independently confirm the certification. No financial-services or other regulated activity is presented, and the available evidence does not provide a verified regulatory registration or licensing basis. A third-party broker dataset produced no match; that is contextual reputational information and is not a licensing determination.

EVIDENCE

- Homepage: Displays the business name “АльянсБлок,” a Krasnoyarsk location, product information, and a “Сертификат соответствия ГОСТ 6133-99” claim.
- “Payment and Delivery” and “Route/Contacts” pages: Present commercial ordering and delivery context, including a contact form; no verified legal-entity or regulator information is established in the supplied page evidence.
- Hosting infrastructure: Served from AS198610, BEGET-AS – Beget LLC, RU.
- Site transport encryption: TLS certificate issued by YR2, domain-validated (DV), valid to 2026-11-10T13:20:27+00:00.

What to Verify Next

Before a high-value order, the prospective customer should independently confirm the legal seller named on the quotation or invoice, validate the ГОСТ conformity certificate with the issuing or relevant certification body, and confirm delivery terms, payment beneficiary, refund conditions, and the official contact route through an independently sourced business record. Payment should be made only through a method that provides appropriate transaction documentation and dispute or recovery options.

EVIDENCE

- Homepage: Contains a single contact form classified as a standard contact form, with no sensitive form fields identified.
- Product and delivery content: Describes concrete-block specifications, manufacturing methods, payment, and delivery topics but does not independently establish the seller’s legal identity.
- Commercial contact details: The site publishes a telephone number with the Krasnoyarsk area code and directs orders through the site contact channel.

Summary Verdict

The website has a **moderate-trust posture** and is assessed as not presenting an identified scam or impersonation pattern. Its substantive product content, consistent local-business presentation, established domain continuity, valid transport encryption, and clean observed threat indicators support an evidence-consistent legitimate appearance, while operator identity and business disclosures remain insufficiently verified for an unequivocal identity conclusion.

Infrastructure Integrity

The site resolves directly to infrastructure operated by BEGET-AS – Beget LLC, RU, on AS198610, with no trusted CDN or WAF identified and a single likely origin address observed. Direct hosting does not itself indicate maliciousness, but it provides less intermediary protection and resilience than a mainstream CDN-backed deployment.

Closing Assessment

Ordinary browsing and preliminary commercial enquiries are proportionate, while independent seller, certification, delivery, and payment checks should be completed before committing funds or sharing information associated with a high-value transaction.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Dynamic Interaction Caution

- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alyansblok.ru.

- The request stayed on alyansblok.ru. It was not redirected to another domain. CLEAR
- Registration is published under BEGET-RU. CLEAR
- DNS for this domain is served by com., across 6 name servers. NOTED
- The registration is paid up to 2027-04-11. NOTED
- The earliest public archive of this site is from 2017-05-24. CLEAR
- It is hosted on BEGET-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alyansblok.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
