

Is alzheimersadvocate.com a scam? TrustSniffer's high-risk assessment: 0/100

alzheimersadvocate.com

Verdict

0

OUT OF 100

CRITICAL RISK

alzheimersadvocate.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

A WordPress site for an Alzheimer's caregiver advocate offering resources, books, training, seminars and consulting with contact and newsletter signup forms.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://alzheimersadvocate.com/>

What alzheimersadvocate.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is an informational Alzheimer's caregiver advocacy and training site presenting caregiver guidance, educational resources, books, seminars, speaking and training services, and consulting, with a service-oriented rather than financial-intermediation business model.

Scam/Impersonation Risk

The site's homepage presents a coherent caregiver-education purpose and the available page analysis found no obvious impersonation, phishing, login, wallet, or payment-capture mechanisms. However, that benign presentation is materially outweighed by confirmed external threat detections and a blacklist hit: multiple evaluated sources classified the domain as malicious or suspicious, including detections associated with Fortinet and Sophos. The evidence therefore supports a clearly cautionary assessment for sensitive interaction, even though no conflicting legal identities or page-level impersonation indicators were observed.

EVIDENCE

- The homepage identifies the service as “Alzheimer’s Advocate & Training Provider” and describes help for caregivers and patients, with no observed login or hidden-form behavior.
- External reputation assessment recorded 10 malicious detections, 1 suspicious detection, and a confirmed blacklist status across two external sources.
- The domain was registered in 2006 and is approximately 20.59 years old; historical records contain 94 snapshots spanning 2007–2026, with 20 years tracked.

Regulatory Verification Notes

The available site content describes caregiving education, books, training, speaking engagements, and consulting, but does not present a license, registration number, or independently verifiable regulated-entity status. The operator’s real-world identity remains unverified; the site’s service claims should therefore be treated as unconfirmed identity assertions rather than proof of a specific individual or organization. The absence of a financial-intermediation model reduces the relevance of investment licensing, but it does not resolve the separate external reputation concern.

EVIDENCE

- The site navigation includes About, Contact, History, Activities, Training, Products, and Consulting pages, but the supplied content does not show a licensing or registration disclosure.
- The domain is hosted on AS26347, DREAMHOST-AS – New Dream Network, LLC, US.
- The site uses a DV TLS certificate issued by YR2, valid through 2026-11-03.

What to Verify Next

Sensitive interaction should be deferred until the operator independently confirms that the site and its published services are intended and currently controlled by the claimed Alzheimer’s caregiver advocate. Any proposed book purchase, training engagement, or consulting arrangement should be validated through an independently sourced contact route and a payment method offering transaction protection. External security detections should also be reviewed with the relevant security or website administrator before the domain is allowlisted or used in an organizational workflow.

EVIDENCE

- The homepage exposes contact and newsletter-signup forms rather than a login or password-submission form.
- Behavioral testing recorded no wallet connection, password-external form, hidden form, clipboard-hijacking, or suspicious inline-script activity.
- The site’s transport encryption is currently valid but uses domain validation only, so it does not independently establish operator identity.

Summary Verdict

The overall posture is critical, with sensitive interaction risk taking precedence over the site’s plausible informational presentation. The available evidence does not support treating the website as suitable for

credentials, personal-data submission, payment activity, or organizational allowlisting.

Infrastructure Integrity

The site resolves through a direct DreamHost-hosted infrastructure arrangement in the United States, with no CDN detected and no edge-IP layer identified. Valid transport encryption is a basic protective control, but the hosting arrangement and certificate do not establish legitimacy or offset the external reputation findings.

Closing Assessment

Until the external detections and operator identity are independently resolved, the appropriate posture is passive viewing only, with no credentials, personal information, or payment details submitted through the site.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of alzheimersadvocate.com.

- The request stayed on alzheimersadvocate.com. It was not redirected to another domain. CLEAR

- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by dreamhost.com, across 3 name servers. NOTED
- The registration is paid up to 2027-01-21. NOTED
- The earliest public archive of this site is from 2007-01-14. CLEAR
- It is hosted on DREAMHOST-AS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about alzheimersadvocate.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
