

Is am-az-on.com a scam? TrustSniffer's high-risk assessment: 0/100

am-az-on.com

Verdict

0

OUT OF 100

CRITICAL RISK

am-az-on.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Minimal landing page 'Am-Az-On' with repeated branding, 'Launching Soon' messaging, an email/contact form, cookie notice and reCAPTCHA. No commerce, financial solicitations, or strong identity claims present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

The page as captured

<https://am-az-on.com/>

What am-az-on.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2025.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Am-Az-On is a minimal “Launching Soon” landing website promoting the Airo AI Builder and inviting visitors to submit contact details for launch updates, promotions, and related communications; its apparent model is product-launch promotion and lead capture rather than immediate commerce or financial services.

Scam/Impersonation Risk

The site presents a **critical interaction risk** because external security intelligence recorded a confirmed blacklist hit and corroborated malicious detections, including a Tier-1 vendor detection. The domain’s “Am-Az-On” naming also creates a material brand-confusion concern because of its similarity to Amazon, although the available page evidence does not establish confirmed impersonation or phishing. Separate abuse reports concern a shared Amazon content-delivery IP rather than a site-specific origin, so that signal should not be treated as conclusive attribution; it nevertheless does not offset the direct domain-level detections. No suspicious contact-email anomaly was identified.

EVIDENCE

- External reputation checks recorded 12 malicious detections and 1 suspicious detection across 18 evaluated results, with Sophos among the flagged vendors.
- The domain was identified on external blacklist sources; Google Safe Browsing did not report a malicious result.
- The homepage repeatedly presents the name “Am-Az-On,” while similarity analysis identified Amazon as the comparison brand.
- Seven abuse reports concern 13.248.243.5, attributed to shared Amazon Technologies Inc. CDN infrastructure rather than specifically to the website.

Regulatory Verification Notes

The available page content is limited to a coming-soon presentation and does not disclose a clearly identifiable operating entity, licensing position, or registration number. This is a verification gap rather than independent proof of misconduct, but it leaves the operator’s real-world identity unverified. The site is registered through GoDaddy.com, LLC, and its transport encryption is a domain-validated certificate from a known commercial issuer; those technical facts support basic deployment integrity but do not validate the operator or business claims. No broker match was returned in the available third-party broker context, which is reputational context only and not a licensing determination.

EVIDENCE

- The domain was registered on 2024-10-23 and is approximately 1.82 years old; registrar: GoDaddy.com, LLC.
- The homepage contains “Launching Soon” messaging and copyright text but does not state a legal entity, license authority, or license number.
- The site’s TLS certificate is domain-validated and issued by GoDaddy TLS Intermediate CA DV - R1v1, valid until 2026-10-16.
- No match was returned in the available third-party broker dataset.

What to Verify Next

Before any sensitive interaction, an independent business-identity check should establish the legal operator, jurisdiction, and a verifiable offline contact route. If the promoted service later introduces paid functionality, account access, or regulated activity, the relevant corporate and regulatory registers should be checked directly rather than relying on statements published on the site. The official support and contact channels should also be confirmed through an independent route before submitting personal information.

EVIDENCE

- The homepage contains one contact/email-signup form and no password or login form.
- Behavioral testing recorded zero wallet-connect runs, zero wallet-sensitive runs, zero password-bearing external forms, and zero hidden forms.
- The page describes email-list updates, promotions, and contact submissions rather than an immediately available transactional service.

Summary Verdict

The available evidence supports a **critical-risk posture for sensitive interaction**, with the domain’s external security detections outweighing its otherwise ordinary coming-soon presentation and standard technical deployment. The operator’s real-world identity is not independently verified, and the site should not be treated as trustworthy for credentials, financial activity, or other sensitive submissions.

Infrastructure Integrity

The website is delivered through Amazon.com, Inc. infrastructure and a CDN/WAF configuration in which the observed addresses are edge servers; the origin server was not observable in this analysis. This provides a mitigating layer against direct origin exposure, but CDN/WAF protection is an infrastructure control and does not establish legitimacy or neutralize the domain-level reputation findings.

EVIDENCE

- Served from AS16509, Amazon.com, Inc., US; observed edge addresses were 13.248.243.5 and 76.223.105.230.
- CDN/WAF status: enabled; 2 edge IPs observed and 0 likely origin candidates identified.
- TLS certificate issuer: GoDaddy TLS Intermediate CA DV - R1v1; validation level: DV; valid to 2026-10-16T15:52:42+00:00.

Closing Assessment

Sensitive use should be withheld: credentials, financial information, account access, and other consequential submissions should not be provided unless the operator and service are independently validated through authoritative channels. The site may be observed passively while that validation remains outstanding.

EVIDENCE

- The homepage’s stated interaction model is limited to launch communications and contact submission.
- The authoritative assessment identifies login, credential, and financial use as unsuitable interaction categories.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 7 reports on hosting IP 13.248.243.5 (Amazon Technologies Inc., Content Delivery Network), 15% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of am-az-on.com.

- The request stayed on am-az-on.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-23. NOTED
- The earliest public archive of this site is from 2025-01-22. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about am-az-on.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
