

Is amanat.news legit? TrustSniffer's high-trust assessment: 85/100

amanat.news

Verdict

85

OUT OF 100

HIGH TRUST

amanat.news appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Regional news site covering events and announcements from PAN Jawa Timur (East Java). The page includes multiple dated articles, category navigation, embedded YouTube livestream, and Instagram references. Content is journalistic/political in nature with no evident financial solicitations or credential requests.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

amanat.news presents itself as “Suara Amanat Jawa Timur,” a regional political news and blog publication covering PAN (Partai Amanat Nasional) activities, East Java public affairs, local events, announcements, and livestream content. Its apparent business model is informational publishing supported by audience engagement, social-media distribution, advertising, and sponsorship.

Scam/Impersonation Risk

No contradictions were observed. The homepage contains dated political and community articles, category navigation, an embedded YouTube livestream, and an Instagram reference, with no evident financial solicitation, credential-collection form, login mechanism, wallet interaction, or brand-impersonation indicator. Interaction testing produced technical page changes and console errors, but the observed behavior was attributed to ordinary page dynamics rather than cloaking, hidden forms, suspicious scripts, or credential- or wallet-targeting activity. The available evidence is therefore consistent with an established, apparently legitimate news site, although the real-world operator identity is not independently verified.

EVIDENCE

- The homepage identifies “Suara Amanat Jawa Timur” and displays articles concerning PAN Jawa Timur, local party activities, and regional events.
- The homepage contains no sensitive forms, login form, hidden form, wallet connection, or external password submission.
- Domain registration records show registration in 2017, with an age of 8.84 years.
- Historical records show 95 archive snapshots spanning 2017–2026, covering 10 tracked years.

Regulatory Verification Notes

The site functions as an editorial and political publication rather than a financial-services platform, so no financial licence claim is expected from the observed business model. The supplied content does not present a corporate registration number, publishing-entity disclosure, or regulatory licence details; this is a transparency item for confirmation, not evidence of fraud or impersonation. No broker-dataset match or adverse external reputation finding was supplied. The site uses domain-validated transport encryption, which protects the connection but does not independently establish the operator’s legal identity.

EVIDENCE

- The homepage describes a regional news/blog model focused on PAN Jawa Timur and does not advertise regulated financial products or investment services.
- The supplied homepage content contains no licence number, regulator reference, or formal corporate-registration disclosure.
- The site’s TLS certificate is issued by YR2 at DV validation level and is valid to 2026-10-23.
- The domain registrar is PDR Ltd. d/b/a PublicDomainRegistry.com.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the publication’s editorial affiliation and operating entity through official PAN Jawa Timur or other offline institutional channels, rather than relying solely on on-site branding. Any commercial arrangement should also be supported by written terms identifying the contracting entity, applicable return or cancellation provisions, and payment protections. If the site later introduces subscriptions, donations, or other payment features, the relevant legal and tax disclosures should be checked at that time.

EVIDENCE

- The homepage provides identifiable editorial categories, named article authors, dated stories, and links to social and livestream channels that can be cross-checked independently.
- The captured site has no account, payment, donation, or subscription form requiring immediate verification of transaction controls.
- The available identity signal connects the site only tentatively to a real-world entity and does not constitute independent operator verification.

Summary Verdict

The overall posture is high trust and low risk, with the content, technical stability, historical continuity, and clean reputation signals converging on an established, apparently legitimate website. The principal qualification is that the real-world operator identity remains likely rather than independently verified.

Infrastructure Integrity

The site resolves directly to a single origin endpoint without a detected CDN or WAF layer. Hosting is provided by IDNIC-JALANET-AS-ID—PT. Jupiter Jala Arta, Indonesia, on AS131775; this is a conventional identifiable hosting arrangement, although the absence of an intermediary protective layer means that CDN/WAF mitigation should not be credited.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; credential or payment interactions should proceed only after the publication’s operating entity, commercial terms, and payment protections have been independently confirmed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of amanat.news.

- The request stayed on amanat.news. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by co.id, across 4 name servers. NOTED
- The registration is paid up to 2026-10-19. NOTED
- The earliest public archive of this site is from 2017-11-13. CLEAR
- It is hosted on IDNIC-JALANET-AS-ID, from a server in ID. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about amanat.news at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
