

Is amarekombucha.com.br a scam? TrustSniffer's high-risk assessment: 0/100

amarekombucha.com.br

Verdict

0

OUT OF 100

CRITICAL RISK

amarekombucha.com.br shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Minimal Plesk login page requesting username and password with cookie consent text. No public-facing product information, contact details, or verification present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What amarekombucha.com.br served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website at amarekombucha.com.br currently presents a minimal Plesk administrative login page titled "Mithril - Alper," requesting a username and password with cookie-consent text; it provides no public description of a product, service, or business purpose.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. An external blacklist designation is confirmed, and the page requests credentials without providing the public context needed to establish why access is required or who operates the portal. The absence of a detected brand-impersonation signal does not offset the blacklist finding or the credential-collection exposure. No identity contradiction between multiple legal entities was established, but the operator remains unverified.

EVIDENCE

- The external reputation assessment records the domain as blacklisted.
- The login page contains one username-and-password form and is classified as "Login-only / Unknown."
- The domain was registered in 2017 and is approximately 9.3 years old.

Regulatory Verification Notes

The site does not present a company profile, service explanation, contact details, licensing statement, registration number, or other public authorization information. This is a material verification gap for a credential-bearing portal, although the missing disclosure alone is not evidence of a scam. The domain's technical controls provide transport security, but domain validation does not establish the operator's legal identity or regulatory status.

EVIDENCE

- The public page contains 421 characters of visible text and no public-facing product or verification information.
- The site does not state a license authority or license number.
- Hosted on AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- TLS certificate issued by WE1 with DV validation, valid to 2026-10-19T11:39:26+00:00.

What to Verify Next

Before any sensitive interaction, an independent offline or previously trusted channel should confirm that this exact portal is operated by the intended organization and that the requested credentials are expected. Any applicable business authorization should be checked directly with the relevant official registry, and the organization should confirm the portal's purpose, access scope, and incident-reporting route through independently sourced contact details. Pending those checks, credentials and financial activity should not be submitted.

EVIDENCE

- The page offers no independent contact or organizational verification route.
- The portal's stated function and business purpose are not explained.
- The observed form is specifically a Plesk login rather than a documented customer-service or transaction workflow.

Summary Verdict

The overall posture is critical, with the available evidence unsuitable for trusting sensitive interactions. The website's real-world operator identity is unverified, and the combination of confirmed external reputation risk with an unexplained credential-request page prevents a positive legitimacy conclusion.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses are CDN edge servers on AS13335; the origin server was not observable in this analysis. This infrastructure can reduce direct exposure of the origin and

mitigate some network-level risk, but it does not establish legitimacy or neutralize the site’s reputation and content concerns.

Closing Assessment

The appropriate institutional posture is to suspend credential submission and financial interaction unless independent provenance, operational purpose, and any applicable authorization are confirmed through trusted channels.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by page content, registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The page presents a sign-in form, and the operator behind it could not be independently verified.
Page content rule:PAGE_TYPE_LOGIN_UNVERIFIED
- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- A sign-in path on this site handles sensitive information.
Page content rule:PAGE_LOGIN_PATH_SENSITIVE
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of amarekombucha.com.br.

- The request stayed on amarekombucha.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2031-05-04. CLEAR
- The earliest public archive of this site is from 2019-01-24. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about amarekombucha.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
