

Is ambient-mdk.rs a scam? TrustSniffer's high-risk assessment: 5/100

ambient-mdk.rs

Verdict

5

OUT OF 100

CRITICAL RISK

ambient-mdk.rs shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal site page for 'Ambient MDK' showing a 'Nothing Found' / search prompt and site footer. No interactive elements or monetization evident on this capture.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

Ambient MDK

Nothing Found

What ambient-mdk.rs served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Ambient MDK is a minimal informational website presenting a WordPress-style page with the site name, navigation, a “Nothing Found” message, search functionality, and a footer dated 2026. The captured page appears intended as a small personal or informational site rather than an operational commercial service, but it provides too little substantive content to establish a reliable business purpose.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk** because external reputation data records four malicious detections, one suspicious detection, and a confirmed blacklist hit from multiple external sources. These findings outweigh the benign characteristics of the capture: the homepage showed no login form, payment mechanism, wallet connection, suspicious script, or external submission activity, and no page-level brand-impersonation indicator was identified. Historical records show continuity across the same general informational category rather than a detected suspicious repurposing event, but that does not resolve the current reputation contradiction or independently verify the operator’s identity. Normal browsing may be possible, but login, credential submission, and financial interaction are not appropriate on the basis of the available evidence.

EVIDENCE

- The homepage displayed “Nothing Found,” a search prompt, and no interactive or monetization elements.
- External reputation assessment recorded 4 malicious detections, 1 suspicious detection, and a confirmed blacklist hit from multiple sources.
- Domain registration is dated 2026, with an age of approximately 0.44 years; the registrar is Stanco d.o.o.
- Historical records contain 90 archive snapshots spanning 2016–2025, representing 10 years tracked.

Regulatory Verification Notes

The captured site does not present a corporate identity, regulatory status, licence number, or other formal business disclosure. Because the visible page is informational and contains no apparent financial service offering, the regulatory significance of that omission cannot be determined from the capture alone; it remains a transparency and verification gap rather than independent proof of fraud. The operator’s real-world identity is unverified. The recorded external blacklist status should be treated as a serious reputational warning, not as a regulatory determination. The available broker-context check returned no matching broker signal.

EVIDENCE

- The captured homepage contains only the “Ambient MDK” branding, navigation, search prompt, category label, and footer, with no licence or registration disclosure.
- Registration records identify Stanco d.o.o. as registrar and list the registrant type as Individual.
- Confirmed technical evidence identifies hosting on AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- The site uses a valid DV TLS certificate issued by YE2, valid until 2026-10-11 15:18:55 UTC.

What to Verify Next

Before any sensitive interaction, an institution should independently establish the operator’s identity and determine whether the intended activity requires licensing or registration. Any claimed business relationship should be confirmed through an independently sourced contact route and, where relevant, through the applicable official corporate or regulatory registry. Until those checks are complete, activity should remain limited to passive inspection and no credentials, authentication material, or financial information should be submitted.

EVIDENCE

- The captured page provides no substantive business description against which an operator or regulated activity can be matched.
- No licence number, regulatory authority, or corporate registration reference is presented on the visible site.
- No login form, sensitive form, payment flow, or wallet interaction was present in the captured page.

Summary Verdict

The website should be treated as an unverified and materially unsafe destination for sensitive interaction. The combination of confirmed external reputation contradictions, minimal site substance, and unverified operator

identity supports a critical trust posture despite the absence of malicious behavior in the limited page capture.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN/WAF infrastructure and resolved only to Cloudflare edge addresses, with no origin server candidate observed. This provides a mitigating layer against direct origin exposure, but CDN protection is an infrastructure characteristic and does not establish the legitimacy of the website or offset the external reputation findings.

Closing Assessment

Prospective users and institutions should defer account, credential, payment, and other financial interactions until independent identity, regulatory, and contact-channel checks have been completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ambient-mdk.rs.

- The request stayed on ambient-mdk.rs. It was not redirected to another domain. CLEAR
- Registration is published under Stanco d.o.o.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED

- The registration is paid up to 2027-03-15. NOTED
- The earliest public archive of this site is from 2016-03-19. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ambient-mdk.rs at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
