

Is americatv.com.ar legit? TrustSniffer's high-trust assessment: 100/100

americatv.com.ar

Verdict

100

OUT OF 100

HIGH TRUST

americatv.com.ar appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-04 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-style homepage for Argentina's América TV, offering live broadcasts, schedules, program pages, entertainment reporting, and content from affiliated Grupo América media outlets. The page is heavily advertising-supported and presents an extensive consent-management interface covering numerous data and advertising partners.

Evidence status and limitations

Evidence completeness: UNKNOWN

Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the online portal of Argentina's América TV, presenting live television, programme schedules, entertainment reporting, video clips, and content from related Grupo América media outlets through an advertising-supported publishing model that uses audience measurement and personalised-content services.

Scam/Impersonation Risk

No phishing, brand impersonation, conflicting legal identity, or other identity contradiction was observed. The site's extensive historical continuity, established audience footprint, and clean external threat reputation strongly support its authenticity as an operating television and entertainment platform. Interactive testing also found no credential-harvesting forms, cloaking, wallet-related activity, clipboard manipulation, or suspicious inline scripts.

- Domain records show registration in 2013 (~12.65 years old), with AMERICA T.V. SA named as the registrant and nicar as the registrar.
- The domain has 5,000 archive snapshots spanning 2009-10-16 to 2025-03-28 (17 years tracked), with no evidence of suspicious repurposing or a prior conflicting business identity.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, and no reported abuse associated with the observed hosting address.
- The homepage contained no login form, hidden form, sensitive form, untrusted form destination, or detected brand-impersonation indicators.

Regulatory Verification Notes

The published service is a news and entertainment media portal rather than a financial, investment, brokerage, or cryptocurrency platform. No regulated financial activity or corresponding licence claim was presented, so the absence of financial licensing information is not anomalous for the stated business model. The homepage provides privacy controls and clearly reflects an advertising-funded model, although its consent interface encompasses personalised advertising, audience profiling, cross-device linking, and precise-geolocation requests; these are data-governance considerations rather than legitimacy concerns.

- The homepage identifies América TV and links the service to Grupo América, alongside privacy, contact, and network-media references.
- The homepage presents a consent-management interface covering advertising and audience-personalisation partners.

- The site's transport encryption uses a DV certificate issued by ZeroSSL ECC DV SSL CA 2, valid to 2026-09-11.
- The observed registration record expires on 2026-12-18 and identifies AMERICA T.V. SA as the domain owner.

What to Verify Next

Routine institutional onboarding should confirm that the domain remains the broadcaster's current official digital property and document the applicable privacy settings for the intended use. Organisations permitting access from managed devices should also review whether optional geolocation, profiling, and cross-device consent choices align with internal privacy policy.

- The homepage footer provides official contact and corporate-network navigation suitable for comparison with independently maintained corporate records.
- The homepage's consent controls provide the mechanism for reviewing and adjusting optional data-processing choices.
- The programme, live-broadcast, and affiliated-media navigation supplies internally consistent brand context for an authenticity check.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence across identity, provenance, content, reputation, and observed behaviour. Normal interaction, including account login where offered and standard use of the service, is appropriate.

Infrastructure Integrity

The site is hosted on Amazon infrastructure and protected through an AWS CDN/WAF configuration. The observed address was an edge endpoint rather than the origin server; this reduces direct origin exposure but serves only as a technical mitigation, not independent proof of legitimacy.

- The hosting infrastructure served the site from AS16509 (AMAZON-02 — Amazon.com, Inc., US).
- Infrastructure observation identified one AWS edge address and no exposed origin candidate.

Closing Assessment

Prospective users and enterprise environments may engage with the site normally, applying standard privacy-consent preferences appropriate to an advertising-supported media service.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [americatv.com.ar](#).

- The request stayed on [americatv.com.ar](#). It was not redirected to another domain. CLEAR
- Registration is published under [nicar](#). CLEAR
- DNS for this domain is served by [awsdns-00.net](#), across 4 name servers. NOTED
- The registration is paid up to 2026-12-18. NOTED
- The earliest public archive of this site is from 2009-10-16. CLEAR
- It is hosted on [AMAZON-02](#), from a server in [US](#). NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [americatv.com.ar](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
