

Is americatv.com.pe safe? TrustSniffer's moderate-trust assessment: 70/100

americatv.com.pe

Verdict

70

OUT OF 100

MODERATE TRUST

americatv.com.pe is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Not Scam

Governance Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

WHAT THIS SITE APPEARS TO BE

Spanish-language media site (América TV) offering news, sports and entertainment content. Heavy use of third-party ad vendors and a consent management platform is evident; core function is editorial content distribution funded by advertising.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

No screenshot is retained for this report.

## Key findings

---

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

## Full analysis

---

### Overview

This website is a Spanish-language Peruvian media publisher presenting news, sports, entertainment, television programming, and live-content features, with an apparent business model based primarily on editorial content distribution, advertising, personalized advertising partners, and data-driven monetization.

### Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent news-and-entertainment service rather than a financial, investment, or credential-harvesting flow; behavioral testing found no login form, sensitive form, hidden form, wallet connection, clipboard manipulation, cloaking, or suspicious script activity. External reputation checks produced no malicious or suspicious detections, and no brand-impersonation signal was identified. The principal residual concern is ordinary uncertainty about independently confirming the operating entity, not evidence of an active scam or impersonation campaign.

#### EVIDENCE

- The homepage is classified as “News / Media” and contains extensive Spanish-language news, sports, entertainment, and television content, with no sensitive form detected.
- Behavioral testing recorded 2 successful runs, 0 wallet-connect runs, 0 wallet-drainer runs, 0 hidden forms, 0 suspicious inline scripts, and a cloaking classification of “none.”
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, with blacklist and phishing checks negative; the domain had a traffic rank of 47777 and was within the top 1 million.
- The site's hosting IP reputation was whitelisted, with 0 abuse reports and usage classified as Content Delivery Network.

### Regulatory Verification Notes

The available evidence is consistent with an established media publisher, but the real-world operator identity is not independently verified by the supplied material. Registration data associates the domain with “compania peruana de radiodifusion s.a.” and records NIC.PE as registrar; this is a useful identity signal, but it does not by itself prove that the website is currently operated by that entity. No financial-service license claim, license number, or regulatory authority is identified in the supplied page content. Because the site operates as an advertising-funded publisher rather than presenting a regulated financial product, the more relevant verification issues are corporate affiliation, privacy practices, advertising-partner disclosures, and consent handling. The extensive use of third-party advertising and consent-management technology warrants review of cookie and data-use choices, but is not evidence of fraud.

#### EVIDENCE

- Domain registration data identifies NIC.PE as registrar and “compania peruana de radiodifusion s.a.” as the recorded owner.
- Server telemetry identified AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- The site's transport encryption uses a DV certificate issued by WE1, valid to 2026-09-26T14:46:24+00:00.
- The homepage identifies an advertising-funded publishing model using an IAB TCF Consent Management Platform, 20 ad networks, 3 tracking pixels, and 1 analytics service.

#### What to Verify Next

Before high-value commercial, partnership, or sensitive account activity, the prospective counterparty should independently confirm that the recorded corporate entity is the current operator, validate any relevant media or broadcasting registrations through the applicable Peruvian authority, and review the site's privacy, cookie, and advertising-consent terms. Official contact channels should be confirmed through an independently sourced corporate or broadcast-company reference rather than relying solely on web-page details.

#### EVIDENCE

- The available identity signal is a domain-registration association, while independent identity verification remains incomplete.
- The supplied page analysis identifies personalized advertising, data-driven ad networks, and consent management as material operational features.
- The homepage has no sensitive transaction form, so any later request for credentials, payment, or other sensitive information would represent a change in the observed interaction profile.

#### Summary Verdict

The site has a **moderate-trust, not-scam posture** supported by coherent editorial content, benign observed behavior, valid transport security, and clean external reputation results. Its legitimacy is apparent and evidence-consistent, but the available material does not independently verify the real-world operator sufficiently for an unconditional high-confidence identity conclusion.

#### Infrastructure Integrity

The website is protected by AWS CloudFront CDN/WAF infrastructure, with observed addresses belonging to CDN edge servers and no origin server address observable in the analysis. This provides a meaningful layer of exposure mitigation and operational resilience, although protective delivery infrastructure is not, by itself, proof of ownership or legitimacy.

#### EVIDENCE

- Edge hosting was observed on AS16509 (AMAZON-02 - Amazon.com, Inc., US) through AWS CloudFront.
- Four CDN edge IP addresses were observed, with 0 likely origin-IP candidates.

## Closing Assessment

Routine editorial browsing is proportionate to the observed posture; credential submission, payments, contractual engagement, or other high-value actions should follow independent entity, regulatory, privacy, and contact-channel verification.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

### 01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF\_WHOIS\_INCOMPLETE

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of americatv.com.pe.

- The request stayed on americatv.com.pe. It was not redirected to another domain. CLEAR
- Registration is published under NIC.PE. CLEAR
- DNS for this domain is served by awsdns-18.com, across 4 name servers. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about americatv.com.pe at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
