STUDIO G.I. Srl

Amministratori Professionisti di Condominio a Torino dal 1995

What amministrazioni-torino.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website presents itself as the online presence of Studio G.I. S.r.l., a Torino-based condominium and property administration firm. It describes services including condominium management, insurance oversight, maintenance coordination, office contact arrangements, documentation, and access to a client area, indicating a professional local-business model funded through administration services and related contracts.

Scam/Impersonation Risk

Confirmed external reputation contradictions materially outweigh the site's otherwise conventional presentation. The reviewed homepage contains coherent local-business content, contact information, service descriptions, and no investment solicitation, cryptocurrency request, credential-harvesting form, or payment demand; however, the domain is reported as blacklisted by multiple external sources, with several malicious classifications and an additional suspicious classification. The site's behavioral inspection also recorded suspicious inline scripts and substantial browser console errors. No conflicting legal-entity names or direct brand-impersonation indicators were observed, but the confirmed blacklist status is sufficient to make sensitive interaction inappropriate.

EVIDENCE

- The homepage identifies Studio G.I. Amministrazioni Stabili Torino and describes condominium administration services, while the page analysis found no login form, sensitive form, investment solicitation, cryptocurrency feature, or payment request.
- External reputation checks recorded 4 malicious and 1 suspicious detections, with a confirmed blacklist signal from 2 sources.
- Behavioral inspection of the homepage recorded 2 suspicious inline scripts and 66 console errors across 2 successful runs.
- Domain registration evidence: registered through GoDaddy.com, LLC on 2011-05-04 and recorded as approximately 15.31 years old, with expiry on 2027-05-04.

Regulatory Verification Notes

The website's apparent business identity is Studio G.I. S.r.l., but the available evidence does not independently verify that identity. No professional license, registration number, or licensing authority is claimed in the reviewed business information, so the legal and regulatory status of the administration service remains a verification matter rather than an established fact. The absence of a broker-dataset match provides no positive regulatory conclusion. A valid transport certificate and established domain registration are technical or administrative signals only; they do not resolve the external reputation contradiction.

EVIDENCE

- The homepage and business description present Studio G.I. S.r.l. as a Torino condominium/property administration firm and provide service, office, and client-area information.
- Hosted on AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- TLS certificate issued by WE1 with DV validation, valid to 2026-11-16.
- The site's reviewed content contains no stated license authority or license number.

What to Verify Next

Before any sensitive interaction, an institution should independently confirm that Studio G.I. S.r.l. is the operator through an authoritative Italian business registry or a trusted offline channel, and confirm any authorization required for the services offered. Contact details should be validated using an independently sourced telephone number or physical business record rather than relying solely on the website. Any client-area access, credential submission, document exchange, or financial instruction should remain suspended until those checks and the blacklist discrepancy have been resolved through trusted channels.

EVIDENCE

- The homepage provides the claimed business name, Torino location, telephone contacts, office hours, and client-area reference for independent comparison.
- The legal and service information does not provide a license number or licensing authority to validate.
- The site presents documentation and privacy information, but the available evidence does not establish that these materials are associated with a verified real-world operator.

Summary Verdict

The overall posture is **critical trust risk**, driven by confirmed external reputation contradictions and an unverified connection between the website and its claimed operator. Its professional-looking content and technically functional presentation do not provide a sufficient basis for trusted account, credential, or financial interaction.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were Cloudflare edge servers rather than an independently observable origin. This reduces direct exposure of the underlying host and is a mitigating infrastructure characteristic, but it does not establish legitimacy or offset the external reputation findings.

EVIDENCE

- Cloudflare protection was detected with 4 observed edge addresses and 0 likely origin addresses.
- Edge address 104.21.30.71 resolved through AS13335; the infrastructure provider was CLOUDFLARENET — Cloudflare, Inc., US.

Closing Assessment

The appropriate business posture is to restrict activity to passive review while treating login, credential, document, and financial actions as requiring independent validation and explicit risk approval.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of amministrazioni-torino.com.

- The request stayed on amministrazioni-torino.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-04. NOTED
- The earliest public archive of this site is from 2011-06-02. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about amministrazioni-torino.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals

were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
