

Is ammkmedia.com legit? TrustSniffer's high-trust assessment: 100/100

ammkmedia.com

Verdict

100

OUT OF 100

HIGH TRUST

ammkmedia.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

AMMK (Aalmi Majlis Muftian-e-Kiram) website presenting online Islamic specialization courses using a WordPress LMS. Lists course offerings, instructors, contact details in Lahore, Pakistan, and pricing. No evident credential-harvesting, payment wallets, or aggressive investment claims.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the online presence of Aalmi Majlis Muftian-e-Kiram (AMMK), presenting a WordPress-based learning platform for online Islamic specialization education. Its apparent business model is the delivery of paid, instructor-led Islamic studies courses through an online learning-management system, with contact and enrollment information associated with Lahore, Pakistan.

Scam/Impersonation Risk

No contradictions were observed, including no detected phishing, impersonation, blacklist, or malicious-content indicators. The homepage presents a coherent educational model rather than a financial or credential-harvesting operation: it lists one- and two-year Takhasus fil-Iftaa courses, named instructors, lesson and student counts, and a course price of \$110. The site's observed behavior also showed no sensitive forms, wallet-connect activity, external posting, cloaking, or suspicious scripts. Some homepage counters display zero values despite course-level enrollment figures, which is a presentation-quality issue but does not, on the supplied evidence, establish deceptive intent.

EVIDENCE

- The homepage identifies AMMK as an Islamic educational institution and displays course offerings, instructors, lesson counts, enrollment figures, and \$110 pricing.
- The homepage's technical behavior recorded no login form, hidden form, sensitive form, wallet activity, external post, suspicious inline script, or cloaking.
- The domain registration record shows creation on 2018-12-02T15:03:47Z, an age of 7.72 years, and expiry on 2028-12-02T15:03:47Z.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate educational website, but the real-world operator has not been independently verified. The site presents the names AMMK and Aalmi Majlis Muftian-e-Kiram, identifies Lahore, Pakistan, and references educational, advisory, and administrative bodies; these are on-site representations rather than independent proof of legal-entity status. No licensing authority or license number is stated in the supplied site content, so any accreditation, registration, or authorization applicable to the courses remains a transparency item for independent confirmation. Available external reputation checks contained no malicious detections, blacklist hit, or abuse reports, although reputation coverage was partial.

EVIDENCE

- The homepage and About Us material identify "Aalmi Majlis Muftian-e-Kiram, Lahore, Pakistan" and reference the site's educational, Shura, and administrative sections.
- The site content contains no stated licensing authority or license number.
- The site's transport encryption uses a certificate issued by YR2 with Domain Validation (DV), valid to 2026-10-16T09:58:53+00:00.

What to Verify Next

Before credential or payment interactions, an organization's legal identity and the authenticity of its contact channels should be confirmed through an independent route rather than relying solely on the website. Any claimed educational accreditation, registration, or authorization should be checked with the relevant Pakistani or applicable institutional registry, and course fees should be handled through payment methods offering appropriate transaction protection and recourse. Published terms should also be reviewed for refunds, enrollment cancellation, and delivery obligations.

EVIDENCE

- The homepage provides organizational identity, course, instructor, and location information but does not independently establish the operating legal entity.
- The supplied content describes paid enrollment but does not provide a licensing authority or license number.
- The site uses a conventional WordPress LMS structure with no observed untrusted payment destination or external sensitive form.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence converging on an established, apparently legitimate educational website and no observed scam or impersonation contradictions. This conclusion supports ordinary site use in principle, while remaining distinct from independent confirmation of the operator’s real-world identity.

Infrastructure Integrity

The website is protected by a CDN/WAF arrangement, and the observed origin was not directly exposed in this analysis. This is a mitigating technical control that reduces direct infrastructure exposure, but it is not proof of organizational legitimacy.

EVIDENCE

- The observed edge address was 37.27.232.161 on AS24940, operated by HETZNER-AS - Hetzner Online GmbH, DE.
- The infrastructure resolved through a CDN/WAF configuration with 1 observed edge IP and 0 origin candidates.

Closing Assessment

Credential or payment use should proceed only after ordinary independent checks of merchant identity, return or refund terms, and available payment protections have been completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ammkmedia.com.

- The request stayed on ammkmedia.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by neondns.com, across 2 name servers. NOTED
- The registration is paid up to 2028-12-02. CLEAR
- The earliest public archive of this site is from 2019-05-06. CLEAR

- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ammkmedia.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
