Key findings

- Automated classification: Governance Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Amren Specialized Dermatology Clinic is a local healthcare website presenting dermatology services, medical and cosmetic treatment information, doctor-related content, contact details, and an online appointment-request process for prospective patients.

Scam/Impersonation Risk

No contradictory impersonation, phishing, or malicious-reputation signals were observed. The homepage presents a coherent dermatology-clinic purpose, a “Meet The Doctor” pathway, appointment requests, emergency-contact messaging, and treatment-related blog content; the available behavioral evidence also found no login form, hidden form, wallet activity, cloaking, or suspicious script behavior. The site’s apparent legitimacy is therefore supported by consistent page substance and benign interaction behavior, although the real-world operator identity remains unverified.

EVIDENCE

- Homepage: healthcare-focused content identifies Amren Specialized Dermatology Clinic and describes skin, hair, and nail care.
- Homepage interaction: one appointment/contact form was detected, with no sensitive form, external untrusted destination, or password submission.
- Domain registration: created 2024-08-29T11:23:01Z and listed as approximately 1.98 years old.
- Historical telemetry: 0 archive snapshots recorded, with a tracking window from 2023-07-23T22:42:51Z to 2026-02-26T13:54:20Z covering 4 years.

Regulatory Verification Notes

The website's business model is ordinary medical and cosmetic dermatology care, but the available material does not state a licensing authority or license number. This is a regulatory-disclosure gap rather than evidence of a scam. The clinic name and service presentation are internally consistent, while independent connection to a legally established healthcare operator has not been verified. A third-party broker dataset produced no matching record; that result is contextual only and does not establish licensing or regulatory status.

EVIDENCE

- Homepage: describes medical, cosmetic, and surgical dermatology services and provides appointment and emergency-assistance pathways.
- Site content: no licensing authority or license number is stated in the available clinic material.
- Registrar record: TuringSign Inc. d/b/a Cosmotown; domain expiration is 2027-08-29T11:23:01Z.
- Hosting and transport: served from AS51713 (WHG-LON - WHG Hosting Services Ltd, GB); TLS certificate issued by YR2 at DV validation level, valid to 2026-09-30T06:27:39+00:00.

What to Verify Next

Before a sensitive medical or payment commitment, an independent party should confirm that the clinic name, physical operating details, treating clinician, and applicable professional authorization correspond to an official healthcare registry. Appointment arrangements should be confirmed through a contact channel obtained independently of the website, and any payment request should be checked for a named healthcare business and an appropriate consumer-protection or refund process.

EVIDENCE

- Homepage: provides a "Meet The Doctor" option and appointment-request workflow suitable for cross-checking clinician details.
- Contact pathway: publishes clinic contact and operating-hours information that can be reconciled through an independent source.
- Services and blog pages: describe the treatments offered and can be compared with the clinic's externally confirmed scope of practice.

Summary Verdict

The site presents a **moderate-trust posture** consistent with a functioning local dermatology clinic and shows no observed active abuse or impersonation pattern. Its principal limitation is governance and identity assurance: the evidence supports apparent legitimacy, but does not independently prove the real-world operator or regulatory standing.

Infrastructure Integrity

The site resolves directly to a single likely origin rather than a detected CDN edge, and is hosted by WHG-LON - WHG Hosting Services Ltd in Great Britain on AS51713. The hosting environment is a conventional data-center/web-hosting arrangement; valid DV TLS provides transport protection but is only a mitigating technical control, not proof of clinic legitimacy.

Closing Assessment

Ordinary browsing and appointment research are proportionate, while independent identity, professional-authorization, and payment-protection checks should precede sensitive or high-value commitments.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of amrendermatologicclinic.com.

- The request stayed on amrendermatologicclinic.com. It was not redirected to another domain. CLEAR
- Registration is published under TuringSign Inc. d/b/a Cosmotown. CLEAR
- DNS for this domain is served by mysecurecloudhost.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-29. NOTED
- The earliest public archive of this site is from 2023-07-23. CLEAR
- It is hosted on WHG-LON, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about amrendermatologicclinic.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
