Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the Bulgarian-language Amuse Bouche platform, presenting cooking and pastry courses, scheduled culinary events, vouchers, team-building services, a culinary blog, and contact information for an apparently Sofia-based local business.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no indications of phishing, brand impersonation, conflicting legal identities, or malicious site behavior. The site's login, registration, and contact functionality did not direct submissions to an untrusted destination, and behavioral testing found no hidden forms, wallet activity, clipboard manipulation, cloaking, or suspicious inline scripts. Available external reputation checks also found no malicious or suspicious detections or abuse reports. This supports a low scam and impersonation risk assessment, while the real-world operator remains independently unverified.

EVIDENCE

- Domain registration: created on 2011-11-19 and recorded as approximately 14.76 years old.
- Site behavior: two successful behavioral runs recorded no cloaking, hidden forms, password submissions to external forms, wallet-drainer activity, or clipboard hijacking.
- External reputation: malicious detections 0, suspicious detections 0, and abuse reports 0 in the available checks.

Regulatory Verification Notes

The site presents a conventional local-service model: paid cooking and pastry courses, vouchers, team-building events, scheduled classes such as sushi, ramen, Asian street food, and raw desserts, plus editorial content. Its About and contact material supports an apparent Sofia-based business presence, but the available evidence does not independently verify the legal operator behind the site. No regulated third-party status or licensing number is indicated; for this type of culinary education and events service, that is a transparency point for routine confirmation rather than evidence of wrongdoing. A separate broker-reputation dataset returned no match, which is contextual reputational information and not a licensing determination.

EVIDENCE

- About and contact pages: identify Amuse Bouche as a local culinary business and provide business contact information.
- Registration record: registrar listed as ENOM, INC.
- Transport encryption: TLS certificate issued by YR1 at DV validation level, valid to 2026-09-29.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the merchant's legal name and operating contact details, review the terms, cancellation, voucher, and refund provisions, and use payment methods offering appropriate purchase protection. Where a particular course or event requires a regulatory or food-safety qualification, that requirement should be checked with the relevant Bulgarian authority or registry. Official contact channels should also be confirmed through an independent source rather than relying solely on details supplied by the website.

EVIDENCE

- Terms, FAQ, and policy pages: provide the relevant materials for checking cancellation, voucher, and refund conditions.
- Account and transaction workflow: includes login and registration functionality, making independent confirmation of the merchant identity appropriate before credential submission.
- Business-information pages: provide the contact and service details to be compared with an independently sourced business record.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website operating with a high-trust, low-risk posture. The coherent service presentation and convergence of positive technical, behavioral, and

reputational signals support normal site interaction, although the operator’s real-world identity is not independently verified.

Infrastructure Integrity

The website is protected by a CDN/WAF arrangement, providing a mitigating layer against direct exposure and routine web abuse. The observed address belongs to Hetzner infrastructure, while the analysis identified no origin-server candidate; this is an infrastructure characteristic, not proof of legitimacy.

EVIDENCE

- Hosting: served from AS24940, HETZNER-AS — Hetzner Online GmbH, Germany, using edge IP 162.55.34.121.
- Network protection: CDN/WAF protection was detected, with one observed edge address and zero likely origin candidates.
- TLS: certificate issuer YR1, validation level DV, expiry 2026-09-29.

Closing Assessment

The site is suitable for ordinary browsing and service evaluation; credential or payment use should follow the independent merchant-identity, policy, and payment-protection checks outlined above.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of amusebouche-bg.com.

- The request stayed on amusebouche-bg.com. It was not redirected to another domain. CLEAR
- Registration is published under ENOM, INC.. CLEAR
- DNS for this domain is served by bgdns.net, across 2 name servers. NOTED
- The registration is paid up to 2026-11-19. NOTED
- The earliest public archive of this site is from 2011-12-03. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about amusebouche-bg.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
