

Is anastasiapierce.com a scam? TrustSniffer's high-risk assessment:
5/100

anastasiapierce.com

Verdict

5

OUT OF 100

CRITICAL RISK

anastasiapierce.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

A content-centric adult website/blog focused on explicit videos and photo galleries of models (tags and post titles indicate MILF, fetish, hardcore content). The visible page is an index of posts and tags with pagination and category lists; no login, checkout, or verifiable corporate/legal contact information is shown in the provided snippet.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	3 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	24 years old Registered history	CLEAR

The page as captured

https://anastasiapierce.com/

What anastasiapierce.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is an adult-content blog presenting explicit videos, photo galleries, model-focused posts, and category tags such as hardcore, fetish, masturbation, and anal content. Its apparent business model is content publishing, potentially supported by advertising, referrals, paid downloads, or subscriptions, although no clear purchase flow is visible.

Scam/Impersonation Risk

No specific brand impersonation or identity inconsistency was observed in the supplied page evidence, and the homepage does not present a login form, payment form, wallet connection, or other obvious credential-capture mechanism. However, external reputation evidence records malicious detections and a confirmed blacklist status from multiple sources. That contradiction materially elevates the risk of sensitive interaction despite the site's apparently straightforward adult-content purpose. The external reputation result should therefore be treated as a substantive security concern rather than as a consequence of the site's content category.

EVIDENCE

- External reputation telemetry recorded 3 malicious detections and 2 suspicious detections.
- The domain was marked `external\_blacklist=true`; Google Safe Browsing was recorded as not malicious.
- The homepage behavior assessment found no login form, hidden form, password-external form, wallet connection, clipboard hijacking, or cloaking.

Regulatory Verification Notes

The site's visible material does not establish a verifiable corporate operator, and the supplied page capture shows no clear corporate or legal contact information. No licensing or registration claim is presented for the content service; this is a disclosure and verification gap, not by itself evidence of fraud. Identity verification remains incomplete. Several establishment signals are present—long-running domain registration, historical continuity, a known registrar, and valid transport encryption—but these signals do not overcome the confirmed external reputation contradiction or prove the real-world operator's identity.

EVIDENCE

- Domain registration: created 2002-07-26T01:19:42Z, approximately 24.08 years old; registrar GoDaddy.com, LLC; expiration 2027-07-26T01:19:42Z.
- Archive record: first seen 2002-10-07T08:42:10Z, last seen 2026-08-11T21:10:07Z, spanning 25 years tracked.
- Hosting telemetry: served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- TLS telemetry: certificate issued by WE1 at DV validation level, valid to 2026-09-28T23:01:44+00:00.

What to Verify Next

Before any sensitive interaction, an enterprise or payment provider should independently resolve the external reputation finding and establish which real-world party operates the domain. Any proposed commercial arrangement should also be supported by independently confirmed business details, applicable legal obligations, and a payment method with meaningful dispute protections. Access controls should prevent credential or financial use until those checks are complete.

EVIDENCE

- Independent reputation adjudication is required because the domain carries a confirmed blacklist status from multiple external sources.
- Operator verification remains necessary because the available identity evidence does not independently connect the site to a verified legal entity.
- The homepage capture contains no login, checkout, or sensitive-data submission form, limiting the observed interaction surface during testing.

Summary Verdict

The overall posture is **critical**, with sensitive interaction risk elevated to a level incompatible with login, credential submission, or financial activity. The website can be characterized as an identifiable adult-content

publishing site, but its apparent purpose does not offset the confirmed external contradiction or the unresolved operator identity.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge servers rather than an exposed origin. This provides meaningful exposure reduction and can mitigate direct-origin attacks, but it is only a protective infrastructure signal and does not establish legitimacy or neutralize the reputation finding.

Closing Assessment

Sensitive actions should not be undertaken on this site; any necessary access should remain strictly read-only until the reputation status and operator identity have been independently resolved.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01

Governance Risk
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN
- 02

Sensitive Interaction Risk
 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of anastasiapierce.com.

- The request stayed on anastasiapierce.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-26. NOTED
- The earliest public archive of this site is from 2002-10-07. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about anastasiapierce.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
