

Is ancfcc.gov.ma legit? TrustSniffer's high-trust assessment: 100/100

ancfcc.gov.ma

Verdict

100

OUT OF 100

HIGH TRUST

ancfcc.gov.ma appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-04 by automated analysis. Classification confidence 75%.

What this site appears to be

French- and Arabic-language portal for ANCFCC, Morocco's National Agency for Land Conservation, Cadastre and Cartography. It presents institutional information and online services for property certificates, cadastral plans, document verification, mapping, complaints, fee payments, supplier invoices, and downloadable forms.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the French- and Arabic-language public-service portal of Morocco's National Agency for Land Conservation, Cadastre and Cartography, presenting institutional information and services for property certificates, cadastral plans, document authentication, mapping, complaints, land-conservation fee payments, supplier invoicing, and professional land administration.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or deceptive claims were observed. The institutional purpose is consistent with the agency identity, the Moroccan government namespace, and a long, continuous operating history. Threat-reputation checks were clean, while observed browser behaviour showed no hidden forms, credential forwarding, cloaking, clipboard manipulation, suspicious scripts, or cryptocurrency-wallet activity.

- The homepage identifies ANCFCC and provides agency-specific institutional, cadastral, cartographic, property-registration, and professional-service content.
- The domain is registered through WANA CORPORATE to Agence Nationale de la Conservation Fonciere du Cadastre et de la Cartographie; registered 31 January 2007 (~19.52 years old), with expiry on 31 January 2027.
- The web archive contains 403 snapshots spanning 22 July 2010–20 July 2026 (17 years tracked), with no established semantic repurposing.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no abuse reports, and no signature matches.

Regulatory Verification Notes

The site presents a coherent public-agency identity, including sections for its mission, director-general, board, organisation, publications, and professional functions. Its placement under Morocco's restricted government namespace materially supports that institutional status. No licensing claim or license number is presented, but a general commercial-services license is not an expected legitimacy requirement for the stated governmental land-administration role; this therefore does not constitute an adverse finding. No contradictory third-party broker identity was matched.

- The homepage navigation provides institutional sections covering the agency's presentation, statutory missions, governance structure, organisation chart, and operational functions.

- The domain uses the verified Moroccan government suffix `gov.ma`, classified as a sovereign government namespace.
- The site's transport encryption uses a valid DV certificate issued by Go Daddy Secure Certificate Authority - G2, valid to 22 January 2027.
- The observed page contained no sensitive form and no form submitting data to an untrusted destination.

What to Verify Next

For consequential property transactions, users should confirm that the selected service corresponds to the intended certificate, cadastral, payment, or document-verification workflow and independently reconcile resulting reference numbers with the relevant land-conservation office. Payment amounts, beneficiary details, and issued documents should be checked against the portal's published procedures before final submission.

- The homepage separates property-certificate and cadastral-plan workflows into ordering, tracking, and verification functions.
- The homepage provides a dedicated authenticity-checking function for delivered documents.
- The homepage distinguishes public land-conservation fee payment, complaint submission, mapping, and professional-service functions.

Summary Verdict

This is a legitimate, established, and trustworthy government website. Its institutional identity, sovereign namespace, long operating history, clean threat reputation, coherent public-service content, and benign observed behaviour converge strongly, with no contradictory risk signals. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is served through Microsoft Corporation infrastructure with a CDN/WAF layer. Only the protected edge address was observed; this reduces direct exposure of the underlying service but is treated as a security control rather than independent proof of institutional legitimacy.

- The hosting infrastructure served the site from AS8075 (Microsoft Corporation, US), using observed edge address 52.155.88.163.
- The infrastructure assessment identified one CDN/WAF edge address and no exposed origin-server candidate.

Closing Assessment

Prospective users may proceed with normal use, applying standard transaction controls and retaining confirmations for any consequential property or payment activity.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ancfcc.gov.ma.

- The request stayed on ancfcc.gov.ma. It was not redirected to another domain. CLEAR
- Registration is published under WANA CORPORATE. CLEAR
- DNS for this domain is served by wanacorp.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-31. NOTED
- The earliest public archive of this site is from 2010-07-22. CLEAR
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ancfcc.gov.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
